On the “Customers” worksheet, format the table so that every other row is shaded. Use a technique that automatically updates the formatting if you insert a new row.

Correct Answer: See explanation below.
Section: (none)
Explanation

Explanation/Reference:
Explanation:
1. On the “Customers” worksheet, click the **Select All** button **OR** press Ctrl+A.
2. Click the arrow next to **Conditional Formatting** from the **Home** tab in the **Styles** group, then select **New Rule**.
3. Click **Select a Rule Type** in the **New Formatting Rule** dialog box, then select **Use a formula to determine which cells to format**.
4. In the **Format values where this formula is true** box, enter =MOD(ROW(),2)=0.
5. Click on **Format**.
6. Click the **Fill** tab from the **Format Cells** dialog box.
7. Select the desired shade background and then click **OK**, you are able to view how the background would look in the **Preview** window in the **New Formatting Rule** dialog box.
8. Once satisfied, apply the formatting to the cells by clicking **OK**.

On the “Customers” worksheet, **sort** the table to order the records by the “CountryOrRegion” field, with customers in the United States first and customers in Canada second. Then sort the customers in each country alphabetically (from A to Z) by the “StateOrProvince” field. Finally, sort the customers in each state or province in ascending order by the ‘PostalCode” field.

Correct Answer: See explanation below.
Section: (none)
Explanation

Explanation/Reference:
Explanation:
1. Select a cell in the “CountryOrRegion” field on the “Customers” worksheet.
2. Select Sort from the **Sort & Filter** group in the **Data** tab.
3. In the **Sort** dialog box, under **Column** in the **Sort by** box, Select the “CountryOrRegion” field.
4. Under the **Sort On** option, select the type of sort desired, in this case **Values**, to sort by text.
5. Under **Order**, select **Custom List**, then set it for customers in the United States to appear first, then the customers in Canada.
6. Then to add another column to sort by, click **Add Level**.
7. In the **Sort** dialog box, under **Column** in the **Sort by** box, Select the “StateOrProvince” field.
8. Under the **Sort On** option, select **Values**.
9. Under **Order**, select **A to Z**.
10. Add a final column by clicking **Add Level**.
11. In the **Sort** dialog box, under **Column** in the **Sort by** box, Select the “PostalCode” field.
12. Under **Sort On**, select **Values**.
13. Under **Order**, select **Smallest to Largest**.
14. Click **OK**.

On the “Customers” worksheet, enter a formula in cell N2 that uses an Excel function to return the average age of the customers based on the values in the “CurrentAge” column.

Correct Answer: See explanation below.
Section: (none)
Explanation

Explanation/Reference:
Explanation:
1. Select cell N2 on the “Customers” worksheet, which is where you want the Excel function to return the result to.
2. In the **Address** bar, type the average function syntax; **=AVERAGE(K1:K101)**.

On the “Orders” worksheet, use an automatic formatting method to format cells in the “OrderTotal” column that contain above-average values by applying Green Fill with Dark Green Text. Use a technique that automatically updates the formatting if the column values change.

Correct Answer: See explanation below.
Section: (none)
Explanation

Explanation/Reference:
Explanation:
1. Select the cells in the “OrderTotal” column which is the data range you are required to highlight the cells which are above-average.
2. Click **Conditional Formatting** from the **Home** tab, then select **Top/Bottom Rules**, then select the **Above Average** option.
3. A popped up dialog box will then appear, select the Green Fill with Dark Green Text option as desired.
4. Click **OK**.
