**HP Operations Manager i 10.x Software**

**Exam B****QUESTION 1**

Which Monitoring Automation element(s) may be used to verify monitoring deployment?

- A. Node Configuration Report
- B. Assignments & Tuning GUI
- C. Inventory Report
- D. Assignment Report

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

**QUESTION 2**

DRAG DROP

You are working with events. Put the phases of the OMi Operator Workflow in the suggested order.

**Select and Place:**

## Phases

Remediate

Analyze

Prioritize

Close

## Order

1

2

3

4

**Correct Answer:**

## Phases

## Order

1

Analyze

2

Prioritize

3

Close

4

Remediate

Section: (none)  
Explanation

### QUESTION 3

Which web server(s) is/are supported when OMi is installed on Microsoft Windows?

- A. Apache HTTP Server only
- B. IIS only
- C. IIS and Oracle HTTP Server
- D. IIS and Apache HTTP server

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Reference: [http://www.tutorialspoint.com/qc/qc\\_environment\\_setup.htm](http://www.tutorialspoint.com/qc/qc_environment_setup.htm)

#### QUESTION 4

The General System Service Availability aspect contains different monitoring elements for monitoring NFS on AIX, HP-UX, Linux, Windows, and Solaris. What does Monitoring Automation rely on to support assignment of this aspect to any CI or CI Type computer, while deploying the correct monitoring for only that Operating System?

- A. Auto Assignment rules
- B. Version Control
- C. Deployment Conditions
- D. Assignment View

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 5

You generate the following event:

```
sendEvent -title "Number of threads in the standby pool too low" -severity major -category OS -application WebLogic  
AdminServer -omServiceId weblogicasAdminServer47001webserver.mydomain@@webserver.mydomain -etiHint  
ThreadPoolAvailability:Low -relatedCiHint weblogicas:AdminServer@@webserver.mydomain
```

How many hints in this event are used in order to try to resolve the related CI?

- A. 4
- B. 3
- C. 5
- D. 6

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 6

Once the RTSM contains the topology for a new application, you need to begin creating views for the application. Which RTSM Administration module should be used?

- A. IT Universe Manager
- B. Discovery Control Panel
- C. Integration Studio
- D. Modeling Studio

**Correct Answer:** A

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 7

Which functions can you perform with the ContentAutoUpload command-line interface? (Select two.)

- A. Specify a different gateway server from where content packs are uploaded.
- B. Retrigger the default content pack upload.
- C. Export a custom content pack.
- D. Specify a different folder from where content packs are uploaded.
- E. Delete a predefined content pack.

**Correct Answer:** CD

**Section:** (none)

**Explanation****Explanation/Reference:****QUESTION 8**

What enables you to view and modify the default configuration of OMi?

- A. Administration > Setup and Maintenance > System Settings
- B. Administration > Setup and Maintenance > Connected Servers
- C. Administration > Setup and Maintenance > Infrastructure Settings
- D. Administration > Setup and Maintenance > OMi Configuration

**Correct Answer:** C

**Section:** (none)

**Explanation****Explanation/Reference:**

Reference: [http://update.external.hp.com/HPSoftware/webhelp/bsm/Content/OMi/AdminGuide/om\\_settings\\_admin\\_about.htm](http://update.external.hp.com/HPSoftware/webhelp/bsm/Content/OMi/AdminGuide/om_settings_admin_about.htm)

**QUESTION 9**

When right-clicking over a CI to access graphs from within OMi, which graphs are accessed?

- A. the default graphs for the CIT of the selected CI
- B. the saved graphs for the selected CI
- C. the default graphs defined for the operator who accessed them
- D. all templates for the CIT of the selected CI

**Correct Answer:** A

**Section:** (none)

**Explanation****Explanation/Reference:****QUESTION 10****HOTSPOT**

In the graphic, click the appropriate location to open the “Event Details” pane.

**Hot Area:**

#### QUESTION 11

Which task needs to be completed before installing a Management Pack, using the appropriate GUI-based wizard?

- A. stop the database
- B. disable HP Operations agent
- C. disable HP OMI
- D. stop the WDE process

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 12**

For Notifications, where do you configure schedules?

- A. Notification Manager
- B. Scheduler
- C. Recipients
- D. General Notification Rule Properties

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 13**

You are asked to create a rule to assign events to a special user group if they are not resolved within 1 hour. Which type of rule should you create?

- A. time-based event automation
- B. time-delayed event forwarding
- C. user group assignment
- D. stream-based event correlation

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### **QUESTION 14**

Which of these can be done in My Workspace? (Select two.)

- A. deploy new components on BSM application server

- B. view My Workspaces pages using a slideshow
- C. create new pages containing OMi components and external components
- D. develop a groovy script component
- E. wire between two different pages

**Correct Answer:** AC

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 15

What is a key benefit of switching from Smart Plug-ins to Management Packs? (Select two.)

- A. Each Management Pack provides graph templates to graph metrics collected by the Management Pack.
- B. Each Management Pack performs topology discovery.
- C. Each Management Pack is configured in a consistent way, regardless of the application being monitored.
- D. Each Management Pack supports parameterization helping reduce the number of policy templates to manage.
- E. Events generated by Management Pack policies contain ETI Hints and CI Hints.

**Correct Answer:** AE

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 16

You configure integration to an external application in order to forward events and synchronize event changes. But, when you select an event, there is no context menu to manually forward the event to the external application.

What should be done to fix this problem?

- A. Edit the Event Forwarding rule, and set the forwarding type to Synchronize and Transfer Control.
- B. Edit the Connected Server, and select Enable Synchronize and Transfer Control.
- C. Edit the Connected Server's Groovy script to include the forwardChange() method.
- D. Edit the User Role, and enable the Synchronize and Transfer Control permission.

**Correct Answer:** A

**QUESTION 18**

According to the documentation, what are IT Systems Administrators' activities? (Select two.)

- A. Escalate problems by forwarding the event to an external event processing application.
- B. Integrate new applications and CIs into the monitoring process.
- C. Oversee the installation of OMi servers or components, and validate the installation procedures.
- D. Tune the values against which the application is to be monitored.
- E. Define roles and permissions, and create users and groups to provide access to the features for specialist operators.

**Correct Answer: CE**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 19**

When RTSM and UCMDB are integrated, what should be checked in order to see which one is defined as a CMS?

- A. JMX Console > RTSM Instances Services > getisGlobalIdGenerator
- B. JMX Console > CMS Instances Services > getisGlobalIdGenerator
- C. JMX Console > Multiple UCMDDB Instances Services > getisGlobalIdGenerator
- D. JMX Console > UCMDDB Instances Services > setAsNonGlobalIdGenerator

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 20

To which elements can you restrict access by creating a role in the Users, Groups, and Roles UI?

- A. The KPIs that a user can view in the KPI Over Time page.
- B. The attributes of a CI that a user can view.
- C. The components in the Component Gallery that a user can choose.
- D. The CIs that a user can view.

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 21

In which GUI can you see the parameter values that are configured on a monitored mode?

- A. Administration > Monitoring > Policy Templates
- B. Administration > Setup and Maintenance > Monitored Nodes
- C. Administration > Monitoring > Management Templates & Aspects
- D. Administration > Monitoring > Assignments & Tuning

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:****QUESTION 22**

When OMi is integrated with Application Performance Management, what does OMi use to show the performance data stored within the profile database?

- A. Connected Server
- B. Performance for Metrics
- C. BSM Connector
- D. Performance Studio

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:**

Reference: <https://hpln.hp.com/system/files/OMi10-Integrations-Guide.pdf>

**QUESTION 23**

In the event pipeline, which of these event attributes is identified first?

- A. the event priority
- B. related events
- C. the node name
- D. the related CI

**Correct Answer:** B

**Section:** (none)

**Explanation**

**Explanation/Reference:****QUESTION 24**

Which best describes Monitoring Automation (MA)? (Select two.)

- A. MA uses information in the RTSM to automate the deployment and adjustment of monitoring.
- B. MA allows developers to design dedicated Operations Orchestration flows in order to extend its capabilities.
- C. MA is limited by the fact that it is restricted to SiteScope agentless monitors only.

- D. MA simplifies monitoring configuration for dynamic, hybrid environments.
- E. MA enables administrators to manually record the monitoring configurations, step-by-step, for auditing purposes.

**Correct Answer:** BD

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 25

Which OMi installation option shows all available installation wizard pages?

- A. Distributed
- B. Extended
- C. Custom
- D. Full

**Correct Answer:** C

**Section:** (none)

**Explanation**

**Explanation/Reference:**

#### QUESTION 26

According to the documentation, what are IT Systems Administrators' activities? (Select two.)

- A. Escalate problems by forwarding the event to an external event processing application.
- B. Integrate new applications and CIs into the monitoring process.
- C. Oversee the installation of OMi servers or components, and validate the installation procedures.
- D. Tune the values against which the application is to be monitored.
- E. Define roles and permissions, and create users and groups to provide access to the features for specialist operators.

**Correct Answer:** CE

#### QUESTION 37

Which databases (User Schemas) exist in OMi by default?

- A. Data Collection, Data Aggregation, History, RTSM
- B. Management, Event, RTSM
- C. Management, Data, History, RTSM
- D. Configuration, Samples, UCMDB

**Correct Answer:** D

**Section:** (none)

**Explanation**

**Explanation/Reference:****QUESTION 38**

If two different TBEC rules can mark an event as a symptom, which rule is given precedence?

- A. The rule with the highest weighting.
- B. The rule with the fewest CI relationships between the cause CI and the symptom CI.
- C. The rule which has a cause event with a higher severity.
- D. The rule which has a cause event with a higher ETI status.

**Correct Answer:** A

**Section:** (none)

**Explanation****Explanation/Reference:**

Explanation:

If you mark an event as a cause of a symptom event, then you can select a Rule Weight to apply. Correlation rule weighting is used to override existing cause-symptom relationships created by a correlation rule with better correlations available from a more recently matched correlation rule. Better possible correlations are indicated by assigning a higher weighting to the correlation rule.

**QUESTION 39**

Which event attribute can be used to change the state of related events? (Select two.)

- A. Event Type Indicator
- B. Key
- C. Category
- D. Event ID
- E. Custom Message Attribute

**Correct Answer:** AB

**Section:** (none)

**Explanation****Explanation/Reference:**

**QUESTION 40**

DRAG DROP

Put the steps for moving from an SPI to the corresponding Management Pack in the order suggested by the documentation.

**Select and Place:**

Steps		Order
Customize the Management Pack.		1
Prepare nodes for deployment.		2
Start monitoring the application by deploying Management Templates.		3
Install the OMI Management Pack.	>	4
Plan the move.	<	5

**Correct Answer:**

Steps		Order
		1 Plan the move.
		2 Install the OMI Management Pack.
		3 Customize the Management Pack.
	>	4 Prepare nodes for deployment.
	<	5 Start monitoring the application by deploying Management Templates.

**Section: (none)**

**Explanation**

**Explanation/Reference:**

**QUESTION 41**

You are asked to populate the RTSM for a new application. The infrastructure supporting this application is being monitored by a 3rd party monitoring tool, and this tool contains the topology. You are told that you will not be able to connect to the 3rd party monitoring tool directly, and must populate the RTSM from a file that you will be given periodically. You have received the following example of the data you must use:

```
<interface>
<id>47244646131</id>
<uuid>5231327f-6079-4af1-9af0-c9f5d7f50729</uuid>
<ifName>Pseudo Interface</ifName>
<ifAlias>10.32.6.3</ifAlias>
<ifType>1</ifType>
