Exam A**QUESTION 1**

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a new image of Windows 10 that contains a push-button reset solution.

You need to test whether push-button reset works as expected.

Solution: From Windows 10, you press and hold the SHIFT key, and then you restart the computer. After the computer restarts, you click Troubleshoot, and then you click Reset this PC.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

References:

<https://support.microsoft.com/en-us/help/12415/windows-10-recovery-options>

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/push-button-reset-overview>

**QUESTION 2**

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a new image of Windows 10 that contains a push-button reset solution.

You need to test whether push-button reset works as expected.

Solution: You start the computer from the installation media for Windows 10. You click Troubleshoot, you click System Restore, you click the Windows 10 installation, and then you restore a system restore point.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

References: <https://support.microsoft.com/en-us/help/12415/windows-10-recovery-options>
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/push-button-reset-overview>

QUESTION 3

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a new image of Windows 10 that contains a push-button reset solution.

You need to test whether push-button reset works as expected.

Solution: From Windows 10, you open the Settings app, you click Update & security, and then you click Recovery. From Reset this PC, you click Get Started. Does this meet the goal?

A. Yes

B. No

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

References:

<https://support.microsoft.com/en-us/help/12415/windows-10-recovery-options>
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/push-button-reset-overview>

**QUESTION 4**

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You run dism.exe/Get-Packages, and then you pipe the output to dism.exe/Add-Package.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-or-remove-packages-offline-using-dism>

QUESTION 5

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You copy all the updates to the same folder. You run dism.exe/Add-Package once and specify the /PackagePath parameter once.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-or-remove-packages-offline-using-dism>

QUESTION 6

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You run dism.exe/Add-Package once and specify the /PackagePath parameter for each folder that contains the updates.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Section: (none)

References

QUESTION 7

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create an MSR partition of 120 MB that uses the ReFS file system.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section: (none)
Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefi-based-hard-drive-partitions>

QUESTION 8

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create a primary partition of 250 MB that uses the NTFS file system.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

This partition must be at least 300 MB

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigpt-based-hard-drive-partitions>

QUESTION 9

Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question-in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are configuring a reference computer for a new UEFI-based deployment image of the 64-bit version of Windows 10. The reference computer has two physical hard disk drives.

You need to configure a partition on Disk 0 to support a recovery partition.

Solution: You create an EFI system partition of 150 MB that uses the NTFS file system.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefigpt-based-hard-drive-partitions>

QUESTION 10

You plan to create an image of Windows 10 that contains a push-button reset solution. The solution will have custom settings for each edition of Windows 10.

You need to prepare the push-button reset solution.

What should you include in the solution?

- A. an unattended file and a bare metal recovery configuration
- B. an unattended file and extensibility scripts
- C. extensibility scripts and system restore points
- D. a bare metal recovery configuration and Scanstate packages

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-a-script-to-push-button-reset-features>

QUESTION 11

You deploy Windows 10 and Microsoft Office 2016 to a test computer.

You plan to capture an image of the test computer, and then to deploy the image to computers that will be sold to your customers.

You need to ensure that when a customer first starts an Office application, the customer is prompted to try, buy, or activate Office.

What should you run on the test computer before the capture?

- A. officedeploymenttool.exe
- B. setup.exe/admin
- C. oemsetup.cmd Mode=OEM
- D. setup.exe/configure

Correct Answer: C**Section:** (none)**Explanation****Explanation/Reference:**

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/prepare-a-snapshot-of-the-pc-generalize-and-capture-windows-images-blue-sxs>

QUESTION 12

You have a computer named Computer1.

You deploy an image of Windows 10 to Computer1. You start Computer1 in audit mode, and then you install several device drivers.

You need to capture an image of Computer1.

Which tool should you use?

- A. Windows System Image Manager (Windows SIM)
- B. dism.exe
- C. Express Deployment Tool (EDT) for Windows 10
- D. scanstate.exe

Correct Answer: B**Section:** (none)**Explanation****Explanation/Reference:**

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/prepare-a-snapshot-of-the-pc-generalize-and-capture-windows-images-blue-sxs>

QUESTION 13

You have an image of Windows 10.
You discover that files in the Windows Component Store are corrupt.
You need to repair the files in the component store.
What should you do?

- A. Run dism.exe and specify the /Cleanup-Image and the /RestoreHealth parameters.
- B. Run dism.exe and specify the /Cleanup-Image and the /StartComponentCleanup parameters.
- C. Run sfc.exe and specify the /scanfile and /offwindir parameters.
- D. Run sfc.exe and specify the /scannow parameter.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 14

You have a computer that runs Windows 10. The computer starts in UEFI mode and has a 64-bit processor.
You insert a USB key in the computer. The USB key has a drive letter of F.
You need to ensure that you can start the computer by using Windows Preinstallation Environment (Windows PE) from the USB key.
Which two commands should you run? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. makewinpemedia.cmd /UFD C:\WinPe F:
- B. makewinpemedia.cmd /ISO C:\WinPe F:
- C. copype.cmd amd64 C:\WinPe
- D. dism.exe /Export-Image /SourceImageFile:C:\WinPE\boot.wim/SourceIndex:1/DestinationImageFile:F:\boot.wim
- E. copype.cmd x86 C:\WinPe

Correct Answer: AE

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpe-create-usb-bootable-drive>

QUESTION 15

You are preparing a push-button reset solution.

You extract a Windows Recovery Environment (Windows RE) boot image from an image of Windows 10.

You plan to use scanstate.exe to capture several Windows desktop applications.

Which two folders from the Window Assessment and Deployment Kit (Windows ADK) should you include in the Windows RE build environment?

- A. User State Migration Tool (USMT) and Windows Preinstallation Environment
- B. Windows Preinstallation Environment and Common
- C. User State Migration Tool (USMT) and Windows Setup
- D. Windows Setup and Deployment Tools

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/deploy-push-button-reset-features>

QUESTION 16

You deploy an image of Windows 10 to a computer, and then you install Microsoft Office 2016 on the computer.

You plan to deliver the computer to a customer.

You need to ensure that the computer meets the terms of the OEM license agreement. The solution must ensure that the customer can customize the Windows operating system, create user accounts, name the computer, and perform other tasks.

Which sysprep.exe parameter should you specify?

- A. /mode
- B. /generalize
- C. /audit
- D. /oobe

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/sysprep-command-line-options>

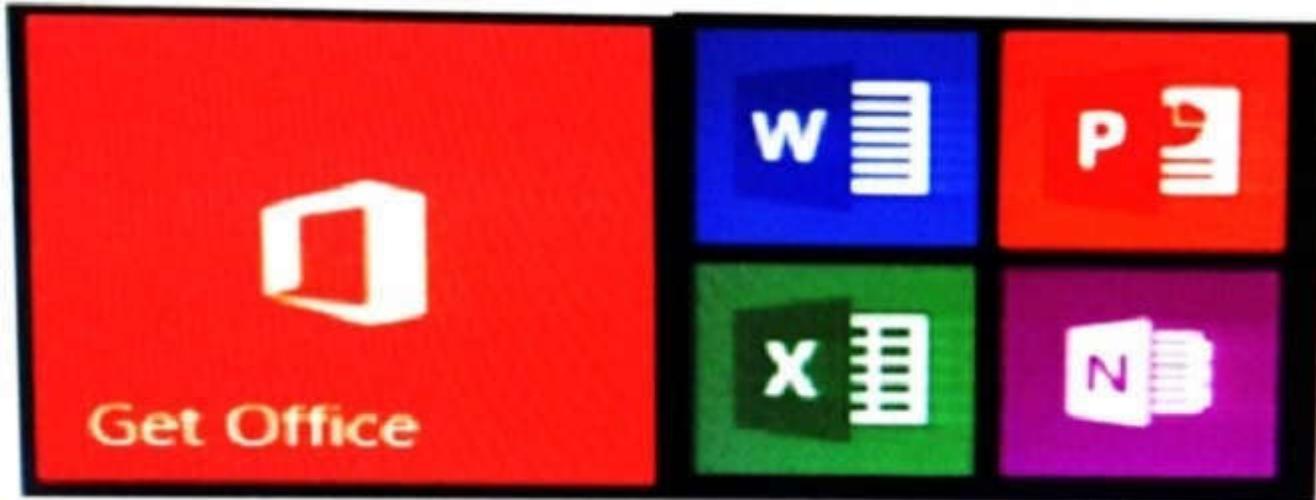

QUESTION 17

You have an image of Windows 10 that runs the Windows 10 Anniversary Update.

You plan to deploy the image to several new computers.

You add Microsoft Office 2016 to the image.

You need to ensure that when the image is deployed, users will see the Office 2016 tiles on the Start menu as shown in the exhibit. (Click the Exhibit tab.)

What should you do?

-  VCEplus
- A. Create a LayoutModification.xml file and save the file in the C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\ folder.
 - B. Modify the DefaultLayouts.xml file and save the file in the C:\Users\Default\AppData\Local\Microsoft\WindowsApps\ folder.
 - C. Modify the DefaultLayouts.xml file and save the file in the C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\ folder.
 - D. Create a LayoutModification.xml file and save the file in the C:\Users\Default\AppData\Local\Microsoft\WindowsApps\ folder.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

QUESTION 18

You are testing the push-button reset feature.

When you attempt to recover a computer, you discover that after each restart, the computer enters the Installing Windows phase.

You discover that a third-party antivirus application is captured in the customization package.

You need to modify the image to ensure that the push-button reset can complete successfully.

What should you do first?

- A. Run scanstate.exe and specify the /hardlink parameter.
- B. Copy the subfolders of the Windows Assessment and Deployment KIT (Windows ADK) files from the User State Migration Tool (USMT) and Windows Setup.
- C. In the Scanstate configuration file, modify the Migrate attribute for the antivirus application.
- D. Run dism.exe and specify the /Cleanup-Wim and /Cleanup-MountPoints parameters.

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

QUESTION 19

You deploy an image of Windows 10.

From audit mode, you install several applications for a customer, and then you run sysprep.exe/oobe/quit.

You need to identify whether any errors occurred when you ran sysprep.exe.

Which folder contains the log files?

- A. %WINDIR%\Logs
- B. %WINDIR%\System32\LogFiles
- C. %WINDIR%\Panther\
- D. %WINDIR%\System32\Sysprep\Panther

Correct Answer: C

Section: (none)

Explanation

Explanation/Reference:

QUESTION 20

You have a computer named Computer1 that runs Windows 10.

On Computer1, you have a DVD that contains the installation source files of Windows 10 Pro.

You open Windows System Image Manager as shown in the exhibit. (Click the Exhibit tab.)

You need to configure the answer file for Windows 10 by using Windows System Image Manager (Windows SIM). What should you do first?

- A. Copy the installation files for Windows 10 to a hard disk.
- B. Create a catalog file (.clg).
- C. Select a distribution share.
- D. Select an image of Windows 10.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

References: [https://technet.microsoft.com/en-us/library/cc749317\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/cc749317(v=ws.10).aspx)

QUESTION 21

You deploy an image of Windows 10 to several computers by using an answer file. The answer file contains the following information.

```
<OEMInformation>
  <Manufacturer>Fabrikam, Inc.</Manufacturer>
  <SupportHours>8 AM – 8 PM (CST) Monday – Friday</SupportHours>
  <SupportPhone>1-800-555-1212</SupportPhone>
  <SupportURL>HTTP://SUPPORT.FABRIKAM.COM</SupportURL>
  <Logo>%windir%\system32\oobe\info\fabrikam.bmp</Logo>
<OEMInformation>
```

You need to verify whether the support information is displayed in Windows.

What should you do?

- A. From the Start menu, open Msconfig.
- B. From the Settings app, click System, and then click About.
- C. From the Start menu, open Msinfo32.
- D. From Control Panel, open System.

Correct Answer: D

Section: (none)

Explanation

Explanation/Reference:

This is a tricky question. The support information is displayed in two places as defined in answers B and D. However, the logo will only be displayed in the System Control Panel applet.

QUESTION 22

You plan to deploy a Windows Preinstallation Environment (Windows PE) image.

Your company uses a graphical application to help installers choose an installation method for Windows 10.

The application must be started by using the following command.

installerGui.bat/Full/Interactive

You need to configure Windows PE to run the graphical application during startup.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a [boot loader] section in the INI file and add the command.
- B. Create a Boot.ini file in the root folder of the image.

- C. Create a Winpeshl.ini file in the \Windows\System32 folder of the image.
- D. Create a [LaunchApp] section in the INI file and add the command.
- E. Create a [LaunchApps] section in the INI file and add the command.

Correct Answer: CE

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/winpeshlini-reference-launching-an-app-when-winpe-starts>

QUESTION 23

You create the working directories for a custom Windows Preinstallation Environment (Windows PE) image.

You need to create an ISO image of Windows PE that can be written to a DVD. The ISO image must be bootable.

Which command should you use?

- A. bcdboot.exe
- B. oscdimg.exe
- C. bootsect.exe
- D. efsboot.exe

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/oscdimg-command-line-options>

QUESTION 24

You use an answer file to automate the installation of Windows 10.

You need to add your company's support information to computers that you deploy.

Which component should you add to the answer file?

- A. Microsoft-Windows-Setup
- B. Microsoft-Windows-PnpCustomizationsNonWinPE
- C. Microsoft-Windows-Shell-Setup
- D. Microsoft-Windows-Deployment

Correct Answer: C

Section: (none)
Explanation**Explanation/Reference:**

References: <https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/unattend/microsoft-windows-shell-setup-oeminformation>

QUESTION 25

This question requires that you evaluate the underlined text to determine if it is correct.

To provide the default product key for OEM activation, you create an answer file by using Windows System Image Manager (Windows SIM), and you add the Microsoft-Windows-Shell-Setup component and the ProductKey component to the generalize pass.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. auditSystem pass
- C. specialize pass
- D. windowsPE pass

Correct Answer: C**Section: (none)**
Explanation**Explanation/Reference:**

References: <https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/unattend/microsoft-windows-shell-setup-productkey>

QUESTION 26

You have a server named Server1 that runs Windows Server 2016. Server1 is located on a network that is disconnected from the Internet.

You have a computer named Computer1 that runs Windows 10.

You download the Windows Assessment and Deployment Kit (Windows ADK) setup on Computer1.

You need to create an installation source on a USB drive that can be used to install Windows ADK on Server1.

Which installation option should you use when you run the Windows ADK setup on Computer1?

- A. /list
- B. /layout
- C. /ceip
- D. /features
- E. /installpath

Correct Answer: B

Section: (none)
Explanation

Explanation/Reference:

References: <https://technet.microsoft.com/en-gb/library/dn621908.aspx>

QUESTION 27

You have an image of Windows 10 named Image1.wim. Image1.wim contains a Windows Recovery Environment (Windows RE) image.

You need to add a driver to Windows RE.

Which tool or cmdlet should you use?

- A. Express Deployment Tool (EDT) for Windows 10
- B. Add-WindowsDriver
- C. Windows Imaging and Configuration Designer (Windows ICD)
- D. Add-WindowsPackage

Correct Answer: C

Section: (none)
Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacturer/desktop/customize-windows-re>

QUESTION 28

You have a reference image of the 64-bit version of Windows 10. The reference image contains an application named App1.

You need to ensure that App1 is pinned to the Start menu.

Which tool or tools should you use to apply the custom Start layout to the image?

- A. image.exe and Windows Preinstallation Environment (Windows PE)
- B. dism.exe and File Explorer
- C. Microsoft Application Compatibility Toolkit (ACT)
- D. Windows System Image Manager (Windows SIM)

Correct Answer: D

Section: (none)
Explanation

Explanation/Reference:

Explanation

QUESTION 29

You have a Windows Recovery Environment (Windows RE) image.

You make changes to applications, languages, and updates in the image.

After the changes, the size of the image increases to 500 MB.

You need to modify the deployment script to ensure that the recovery partition has the required amount of free space. The solution must minimize the space of the recovery partition.

To which size should you set the recovery partition?

- A. 550 MB
- B. 820 MB
- C. 1024 MB
- D. 1524 MB

Correct Answer: B

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/configure-uefiprt-based-hard-drive-partitions>

QUESTION 30

You have a generalized image of the 64-bit version of Windows 10. The image is released to the Out-of-Box-Experience (OOBE).

You need to ensure that when the image is deployed to a computer, the computer starts in audit mode.

What should you do?

- A. Create an answer file, and then copy the answer file to the image.
- B. When the computer starts, press SHIFT+F10, and then run sysprep.exe /audit.
- C. Create a provisioning package, and then copy the provisioning package to the image.
- D. When the computer starts, press SHIFT+F10, and then run imagex.exe.

Correct Answer: A

Section: (none)

Explanation

Explanation/Reference:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/boot-windows-to-audit-mode-or-oobe>
