Project Management Professional v5

Sections

1. Initiation
2. Planning
3. Executing
4. Monitoring and Controlling
5. Closing
6. Mix Questions

Exam A**QUESTION 1**

Which of the following is an input to the Perform Qualitative Risk Analysis process?

- A. Risk register
- B. Risk data quality assessment
- C. Risk categorization
- D. Risk urgency

Correct Answer: A

Section: Initiation

Explanation

Explanation/Reference:

QUESTION 2

Which of the following Process Groups covers all Project Management Knowledge Areas?

- A. Executing

- B. Monitoring and Controlling
- C. Planning
- D. Initiating

Correct Answer: C
Section: Initiation
Explanation

Explanation/Reference:

QUESTION 3

What is the most accurate rough order of magnitude (ROM)?

- A. In the Initiation phase, the estimate is in the range of +/- 50%.
- B. In the Planning phase, the estimate is in the range of +/- 50%.
- C. In the Monitoring and Controlling phase, the estimate is in the range of +/- 15%.
- D. In the Closing phase, the estimate is in the range of +/- 15%.

Correct Answer: A
Section: Initiation
Explanation

Explanation/Reference:

QUESTION 4

Project contracts generally fall into which of the following three broad categories?

- A. Fixed-price, cost reimbursable, time and materials
- B. Make-or-buy, margin analysis, fixed-price
- C. Time and materials, fixed-price, margin analysis
- D. Make-or-buy, lump-sum, cost-plus-incentive

Correct Answer: A
Section: Initiation
Explanation

Explanation/Reference:

QUESTION 5

Requirements documentation, requirements management plan, and requirements traceability matrix are all outputs of which process?

- A. Control Scope
- B. Collect Requirements
- C. Create WBS
- D. Define Scope

Correct Answer: B

Section: Initiation

Explanation

Explanation/Reference:

QUESTION 6

Which of the following is a strategy to deal with positive risks or opportunities?

- A. Mitigate

Explanation

Explanation/Reference:

QUESTION 188

Which is used to solicit proposals from prospective sellers?

- A. Procurement statement of work

- B. Resource calendars
- C. Procurement document
- D. Independent estimates

Correct Answer: C

Section: Planning

Explanation

Explanation/Reference:

QUESTION 189

Which can be used to determine whether a process is stable or has predictable performance?

- A. Matrix diagram
- B. Histogram
- C. Control chart
- D. Flowchart

Correct Answer: C

Section: Planning

Explanation

Explanation/Reference:

QUESTION 190

Which of the following is an input to Control Scope?

- A. Project schedule
- B. Organizational process assets updates
- C. Project document updates
- D. Work performance information

Correct Answer: B

Section: Planning

Explanation

Explanation/Reference:

QUESTION 191

Co-location is a tool and technique of:

- A. Develop Human Resource Plan.
- B. Manage Project Team.
- C. Develop Project Team.
- D. Acquire Project Team.

Correct Answer: C

Section: Planning

Explanation

Explanation/Reference:

QUESTION 192

In a construction project schedule, what is the logical relationship between the delivery of the concrete materials and the pouring of concrete?

- A. Start-to-start (SS)
- B. Start-to-finish (SF)
- C. Finish-to-finish (FF)
- D. Finish-to-start (FS)

Correct Answer: D

Section: Planning

Explanation

Explanation/Reference:

QUESTION 193

A required input for Create WBS is a project:

- A. quality plan.
- B. schedule network.
- C. management document update.
- D. scope statement.

Correct Answer: D
Section: Planning
Explanation

Explanation/Reference:

QUESTION 194

Which of the following is an input to Develop Human Resource Plan?

- A. Team performance assessment
- B. Roles and responsibilities
- C. Staffing management plan
- D. Enterprise environmental factors

Correct Answer: D
Section: Planning
Explanation

Explanation/Reference:

QUESTION 195

The process of identifying the stakeholders' information needs is completed during:

- A. Plan Communications.
- B. Manage Stakeholder Expectations.
- C. Stakeholder Analysis.
- D. Identify Stakeholders.

Correct Answer: A
Section: Planning
Explanation

Explanation/Reference:

QUESTION 196

"Tailoring" is defined as the:

- A. effort of addressing each process to determine which are appropriate and their appropriate degree of rigor.
- B. act of creating a project team with the specialized skills required to produce a required product or service.
- C. action taken to bring a defective or nonconforming component into compliance with requirements or specifications.
- D. adjustment of the respective influences of time, cost, and quality in order to most efficiently achieve scope.

Correct Answer: A

Section: Planning

Explanation

Explanation/Reference:

QUESTION 197

Which is an input to the Verify Scope process?

- A. Performance report
- B. Work breakdown structure (WBS)
- C. Requested changes
- D. Project management plan

Correct Answer: D

Section: Planning

- B. Monitoring and Controlling
- C. Executing
- D. Initiating

Correct Answer: A
Section: Planning
Explanation

Explanation/Reference:
QUESTION 242

The specific technique for identifying a problem, discovering the causes that lead to it, and developing preventive actions is:

- A. Inspection
- B. Use of quality checklists
- C. Root cause analysis
- D. Use of matrix diagrams

Correct Answer: C
Section: Planning
Explanation

Explanation/Reference:

QUESTION 243

At which stage of the project should certain factors such as the unavailability of human resources due to constraint be considered?

- A. Initiation
- B. Execution
- C. Planning
- D. Monitoring and Controlling

Correct Answer: C
Section: Planning
Explanation

Explanation/Reference:

QUESTION 244

A project is ready to complete the planning process, and all planning documents have been reviewed and approved by stakeholders. What should the project manager do next?

- A. Conduct a kick-off meeting
- B. Create the schedule baseline
- C. Acquire the resources.
- D. Determine the budget.

Correct Answer: A

Section: Planning

Explanation

Explanation/Reference:

QUESTION 245

While preparing for a kick-off meeting, a project manager learns that some project activities were underestimated, which will cause delays and cost overruns. It is not possible to update project planning before the kick-off meeting.

What should the project manager do?

- A. Postpone the kick-off meeting, perform updates, and present realistic plans.
- B. Reschedule the kick-off meeting and present the current plan with a commitment to review an updated plan with stakeholders.
- C. Present the project management plan but add a risk reserve to address the estimation defect.
- D. Document the schedule constraint in the issue log and present it during the kick-off meeting.

Correct Answer: C

Section: Planning

Explanation

Explanation/Reference:

QUESTION 246

A major stakeholder is replaced during the planning phase. The new stakeholder has a different view on the project's business needs and wants to immediately include these newly identified business requirements in the scope to avoid any delays.

What should the project manager do next?

- A. Update the project scope statement.
- B. Conduct the Perform Integrated Change Control process
- C. Update the project charter.

D. Perform project management plan updates.

Correct Answer: B

Section: Planning

Explanation

Explanation/Reference:

QUESTION 247

In the late stages of project planning, a project manager develops a risk response plan with subject matter experts (SMEs) and project team members. The team identifies additional efforts required to mitigate the risk of poor quality in some deliverables.

What should the project manager do next?

- A. Update the project and quality management plans to reflect the added efforts.
- B. Conduct a make-or-buy analysis to determine the best option.
- C. Document the additional efforts in the organizational process assets.
- D. Generate a change request for approval of the added costs associated with added efforts.

Correct Answer: A

Section: Planning

Explanation

Explanation/Reference:

QUESTION 248

A project manager learns there are several unexpected issues in the project's execution. The customer is dissatisfied because the deliverables are taking longer than planned, the costs have increased, and the quality of deliverables is affected.

What process should the project manager have performed with greater emphasis during project planning?

- A. Plan Risk Management
- B. Identify Risks
- C. Monitor Risks
- D. Plan Risk Responses

Correct Answer: D

Section: Planning
Explanation

Explanation/Reference:

QUESTION 249

To complete planning, a project manager wants to organize and summarize the project's 1,000 required tests into a manageable list. What tool should the project manager use?

- A. Histogram
- B. Ishikawa diagram
- C. Affinity diagram
- D. Control chart

Correct Answer: C

Section: Planning

Explanation

Explanation/Reference:

QUESTION 250

A project manager joins a project during its initial planning phase. The project involves various local government institutions. While interviewing the project sponsor, the project manager learns of the importance of keeping the security officers of two of these institutions satisfied, since project development will be affected without their involvement.

What should the project manager use to record and monitor this information?

- A. Responsibility assignment matrix (RAM)
- B. Power/interest grid
- C. Communication matrix
- D. Risk register

Correct Answer: B

Section: Planning

Explanation

Explanation/Reference:

QUESTION 251

During a project's first planning meeting, the project team revised some requirements for parts and the manufacturers available for them. The team also revised delivery times and determined what parts could be made on site. After the meeting, the team created a document to establish what, and how items should be procured from each vendor.

What document did the team create?

- A. Procurement statement of work (SOW)
- B. Procurement management plan
- C. Requirements management plan
- D. Resource requirements

Correct Answer: B

Section: Planning

Explanation

Explanation/Reference:

QUESTION 252

During risk management planning meetings, the project manager realizes that there is a very broad spectrum of risks being identified. This has made it difficult to properly maintain the risk register.

What should the project manager do?

- A. Develop a risk breakdown structure (RBS) to help organize and classify identified risks.
- B. Conduct a root cause analysis to allow for proper risk evaluation.
- C. Generate a probability and impact matrix to calculate the relative probability of the identified risks.
- D. Create a decision tree to calculate the expected monetary value of each risk.

Correct Answer: A

Section: Planning

Explanation

Explanation/Reference:

QUESTION 253

A new project manager joins an existing project near the end of its planning phase. What plan should the project manager review first?

- A. Requirements management
- B. Schedule management
- C. Scope management
- D. Project management

Correct Answer: C

Section: Planning

Explanation

Explanation/Reference:

QUESTION 254

While working on a project, the project manager realizes that stakeholders' delivery expectations differ from what was initially planned. What should the project manager have done to avoid this?

- A. Created acceptance criteria, an assumptions log, and requirements documentation.
- B. Discussed expectations and possible changes with the project sponsor
- C. Develop a requirements traceability matrix
- D. Maintained a risk register for out-of-scope requirements

Correct Answer: A

Section: Planning

Explanation

Explanation/Reference:

QUESTION 255

After reviewing the project management plan, a project manager notices that some of the resistant team members have become supportive.

Where should the project manager update this information?

- A. Quality management plan
- B. Resource management plan
- C. Stakeholder engagement plan
- D. Communications management plan

Correct Answer: C

Section: Planning**Explanation****Explanation/Reference:****QUESTION 256**

The project manager is about to finalize the project management plan when they discover a mistake. The team meets and identifies that the mistake will not have a high impact on the project.

What should the project manager do?

- A. Wait for plan approval, and then submit a change request.
- B. Inform management, and allow them to decide next steps.
- C. Correct the mistake, and submit the plan for approval.
- D. Escalate the situation to the project management office (PMO) for review.

Correct Answer: B

Section: Planning**Explanation****Explanation/Reference:****QUESTION 257**

While reviewing project performance, the project manager notices misalignment with the project management plan. The project manager works with the team to modify an activity to ensure future success.

What does this describe?

- A. Preventive action
- B. Defect repair
- C. Corrective action
- D. Accomplished action

Correct Answer: A

Section: Planning**Explanation****Explanation/Reference:**

QUESTION 258

A project manager joins a project involving the provision, installation, and deployment of communications equipment for an international customer. The project team will include partners from multiple countries.

What should the project manager do to prepare for a formal project kick-off meeting to develop an implementation strategy?

- A. Meet with partnering representatives to establish a common understanding of project assumptions, constraints, and regulations governing the project.
- B. Work with the project team to develop a list of assumptions and constraints to meet the applicable laws and regulations.
- C. Instruct the partners to explain how they will perform their portion of the work and what they need from the other partners.
- D. Create a risk register that documents the high-risk areas, and identify risk mitigation strategies the negative impact of their occurrence.

Correct Answer: A

Section: Planning

Explanation

Explanation/Reference:

QUESTION 259

Processes in the Planning Process Group are typically carried out during which part of the project life cycle?

- A. Only once, at the beginning
- B. At the beginning and the end
- C. Once during each phase
- D. Repeatedly

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

QUESTION 266

A project manager managing a cross-cultural virtual project team across several time zones should be concerned about the impacts of which communication technology factor?

- A. Urgent information need
- B. Sensitivity of information
- C. Project environment
- D. Ease of use

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 267

The number of potential communication channels for a project with 5 stakeholders is:

- A. 10.
- B. 12.
- C. 20.
- D. 24.

Correct Answer: A
Section: Executing
Explanation

Explanation/Reference:

QUESTION 268

Which tool or technique of the Define Activities process allows for work to exist at various levels of detail depending on where it is in the project life cycle?

- A. Historical relationships
- B. Dependency determination
- C. Bottom-up estimating
- D. Rolling wave planning

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

QUESTION 269

An output of the Create WBS process is:

- A. Scope baseline.
- B. Change requests.
- C. Accepted deliverables.
- D. Variance analysis.

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 270

A tool or technique used in the Control Procurements process is:

- A. Expert judgment.
- B. Performance reporting.
- C. Bidder conferences.
- D. Reserve analysis.

Correct Answer: B
Section: Executing
Explanation
Explanation/Reference:

QUESTION 271

Which type of project management office (PMO) supplies templates, best practices, and training to project teams?

- A. Supportive
- B. Directive
- C. Controlling
- D. Instructive

Correct Answer: A
Section: Executing
Explanation

Explanation/Reference:

QUESTION 272

Which Define Activities output extends the description of the activity by identifying the multiple components associated with each activity?

- A. Project document updates
- B. Activity list
- C. Activity attributes
- D. Project calendars

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 273

An input to the Identify Stakeholders process is:

- A. The project management plan.
- B. The stakeholder register.
- C. Procurement documents.
- D. Stakeholder analysis.

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 274

What is the estimate at completion (EAC) if the budget at completion (BAC) is \$100, the actual cost (AC) is \$50, and the earned value (EV) is \$25?

- A. \$50
- B. \$100
- C. \$125
- D. \$200

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

Explanation:

$EAC = BAC / CPI$ and $CPI = EV / AC$

$CPI = EV / AC = 25 / 50 = 0.5$

$EAC = BAC / CPI = 100 / 0.5 = \200

QUESTION 275

Job satisfaction, challenging work, and sufficient financial compensation are values related to which interpersonal skill?

- A. Influencing
- B. Motivation
- C. Negotiation
- D. Trust building

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 282

Which schedule method allows the project team to place buffers on the project schedule path to account for limited resources and project uncertainties?

- A. Critical path method
- B. Critical chain method
- C. Resource leveling
- D. Schedule network analysis

Correct Answer: B

Section: Executing
Explanation

Explanation/Reference:

QUESTION 283

Correlated and contextualized information on how closely the scope is being maintained relative to the scope baseline is contained within:

- A. project documents updates.

- B. project management plan updates.
- C. change requests.
- D. work performance information.

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

QUESTION 284

The most appropriate project life cycle model for an environment with a high level of change and extensive stakeholder involvement in projects is:

- A. adaptive
- B. reflexive
- C. predictive
- D. iterative

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 285

Variance and trend analysis is a tool and technique used in which process?

- A. Perform Qualitative Risk Analysis
- B. Perform Quantitative Risk Analysis
- C. Control Risks
- D. Plan Risk Responses

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 286

An intentional activity to modify a nonconforming product or product component is called:

- A. defect repair
- B. work repair
- C. corrective action
- D. preventive action

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 287

Which quality tool incorporates the upper and lower specification limits allowed within an agreement?

- A. Control chart
- B. Flowchart
- C. Checksheet
- D. Pareto diagram

Correct Answer: A

Section: Executing

Explanation/Reference:

QUESTION 300

Which of the seven basic quality tools is especially useful for gathering attributes data while performing inspections to identify defects?

- A. Histograms
- B. Scatter diagrams
- C. Flowcharts
- D. Checksheets

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

QUESTION 301

The most commonly used type of precedence relationship in the precedence diagramming method (PDM) is:

- A. start-to-start (SS)
- B. start-to-finish (SF)
- C. finish-to-start (FS) D. finish-to-finish (FF)

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 302

Which technique is used in Perform Quantitative Risk Analysis?

- A. Sensitivity analysis
- B. Probability and impact matrix
- C. Risk data quality assessment
- D. Risk categorization

Correct Answer: A
Section: Executing
Explanation

Explanation/Reference:

QUESTION 303

Which illustrates the connection between work that needs to be done and its project team members?

- A. Work breakdown structure (WBS)
- B. Network diagrams
- C. Staffing management plan
- D. Responsibility assignment matrix (RAM)

Correct Answer: D
Section: Executing
Explanation

Explanation/Reference:

QUESTION 304

Which tools or techniques will a project manager use for Develop Project Team?

- A. Negotiation
- B. Roles and responsibilities
- C. Recognition and rewards
- D. Prizing and promoting

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 305

Which of the following is an input to Direct and Manage Project Execution?

- A. Requested changes
- B. Approved change requests
- C. Work performance information
- D. Implemented defect repair

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 306

When would resource leveling be applied to a schedule model?

- A. Before constraints have been identified
- B. Before it has been analyzed by the critical path method
- C. After it has been analyzed by the critical path method
- D. After critical activities have been removed from the critical path

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 307

While implementing an approved change, a critical defect was introduced. Removing the defect will delay the product delivery. What is the MOST appropriate approach to managing this situation?

- A. Utilize the change control process.
- B. Crash the schedule to fix the defect.
- C. Leave the defect in and work around it.
- D. Fast-track the remaining development.

Correct Answer: A
Section: Executing
Explanation

Explanation/Reference:

QUESTION 308

Which tool and technique identifies inefficient and ineffective policies, processes, and procedures?

- A. Scope audits
- B. Scope reviews
- C. Quality audits

QUESTION 373

Which characteristic do projects and operational work share in common?

- A. Performed by systems
- B. Constrained by limited resources
- C. Repetitiveness
- D. Uniqueness

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 374

What does a CPI value greater than 1.0 indicate?

- A. Cost right at the estimated value
- B. Cost under the estimated value
- C. Cost right at the actual value
- D. Cost over the estimated value

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 375

Which of the following is an output from Control Scope?

- A. Change requests
- B. Variance analysis
- C. Accepted deliverables
- D. Requirements documentation

Correct Answer: A
Section: Executing
Explanation

Explanation/Reference:

QUESTION 376

Managing procurement relationships and monitoring contract performance are part of which process?

- A. Conduct Procurements
- B. Plan Procurements
- C. Administer Procurements
- D. Close Procurements

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 377

Fast tracking is a schedule compression technique used to shorten the project schedule without changing project scope. Which of the following can result from fast tracking?

- A. The risk of achieving the shortened project time is increased.
- B. The critical path will have positive total float.
- C. Contingency reserves are released for redeployment by the project manager.
- D. Duration buffers are added to maintain a focus on planned activity durations.

Correct Answer: A
Section: Executing
Explanation

Explanation/Reference:

QUESTION 378

An input to the Estimate Activity Resources process is:

- A. Activity resource requirements.
- B. Published estimating data.
- C. Resource calendars.
- D. Resource breakdown structure (RBS).

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 379

Which process requires implementation of approved changes?

- A. Direct and Manage Project Execution
- B. Monitor and Control Project Work
- C. Perform Integrated Change Control
- D. Close Project or Phase

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 380

Resource calendars are included in the:

- A. staffing management plan.
- B. work breakdown structure (WBS).
- C. project communications plan.
- D. project charter.

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 381

Expected monetary value (EMV) is computed by which equation?

- A. Value of each possible outcome multiplied by probability of occurrence
- B. Value of each possible outcome multiplied by probability of non-occurrence
- C. Multiplying the value of each possible outcome by the probability of occurrence and adding the products together
- D. Multiplying the value of each possible outcome by the probability of non-occurrence and adding the products together

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 382

The project has a current cost performance index of 0.80. Assuming this performance will continue, the new estimate at completion is \$1000. What was the original budget at completion for the project?

- A. \$800
- B. \$1000
- C. \$1250
- D. \$1800

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 383

Who determines which dependencies are mandatory during the Sequence Activities process?

- A. Project manager

- B. External stakeholders
- C. Internal stakeholders
- D. Project team

Correct Answer: D
Section: Executing
Explanation

Explanation/Reference:

QUESTION 384

Which of the following is an input to Direct and Manage Project Execution?

- A. Performance reports
- B. Project charter
- C. Outputs from planning processes
- D. Enterprise environmental factors

Correct Answer: D
Section: Executing
Explanation

Explanation/Reference:

QUESTION 385

Using the three-point estimating technique, if the most likely duration is four months, the optimistic duration is two months, and the pessimistic duration is one year, how many months is the expected activity duration?

- A. Two
- B. Four
- C. Five
- D. Twelve

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 386

Which Process Group contains the processes performed to complete the work defined in the project management plan to satisfy the project specifications?

- A. Initiating
- B. Planning
- C. Executing
- D. Closing

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 387

A project manager at a publishing company decides to initiate the editing phase of the project as soon as each chapter is written. Which type of Sequence Activities tool and technique is involved, considering that there was a start-to-start relationship with a 15-day delay?

- A. Slack
- B. FloatC. Lag
- D. Lead

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 388

Which of the following change requests can bring expected future performance of the project work in line with the project management plan?

- A. Corrective action
- B. Defect repair
- C. Preventative action

D. Probable action

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 389

The correct equation for schedule variance (SV) is earned value:

- A. minus planned value [EV - PV].
- B. minus actual cost [EV - AC].
- C. divided by planned value [EV/PV],
- D. divided by actual cost [EV/AC].

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 390

After Define Activities and Sequence Activities, the next process is:

- A. Estimate Activity Resources.
- B. Estimate Activity Durations.
- C. Develop Schedule.
- D. Control Schedule.

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 391

Which risk response strategy is common for both positive and negative risks?

- A. Share
- B. Accept
- C. Mitigate
- D. Transfer

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 392

Which of the following is an output of the Conduct Procurements process?

- A. Project statement of work
- B. Selected sellers
- C. Risk register updates
- D. Teaming agreements

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 393

The technique of subdividing project deliverables into smaller, more manageable components until the work and deliverables are defined to the work package level is called:

- A. a control chart.
- B. baseline.
- C. Create WBS.
- D. decomposition.

Correct Answer: D
Section: Executing
Explanation

Explanation/Reference:

QUESTION 394

The group technique that enhances brainstorming with a voting process used to rank the most useful ideas for prioritization is called the:

- A. majority rule technique.
- B. nominal group technique.
- C. Delphi technique,
- D. idea/mind mapping technique.

Correct Answer: B
Section: Executing
Explanation

Explanation/Reference:

QUESTION 395

At which stage of team development do members begin to work together, adjust work habits, and trust each other?

- A. Forming
- B. Storming
- C. Norming
- D. Performing

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 396

Which of the following can be used as an input for Define Scope?

- A. Product analysis
- B. Project charter
- C. Scope baseline
- D. Project scope statement

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 397

A project manager has created an issue log to document issues communicated by project team members during weekly team meetings. This is an input of:

- A. Manage Stakeholder Expectations.
- B. Monitor and Control Risks.
- C. Plan Risk Management.
- D. Report Performance.

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 398

Approved change requests, approved corrective actions, and updates to organizational process assets are all outputs of which project management process?

- A. Risk response planning
- B. Manage stakeholders
- C. Scope definition
- D. Performance reporting

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 399

Which of the following buffers protects the target finish date from slippage along the critical chain?

- A. Critical buffer
- B. Project buffer
- C. Duration buffer
- D. Feeding buffer

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 400

Activity Duration	Days	Predecessor
A	5	
B	2	
C	4	A
D	2	B,C
E	5	D

Which of the following is the correct network diagram for the table?

- A. Begin-A-C-D-E-End-B-D
- B. Begin-A-B-C-D-E-End
- C. Begin-A-B-D-E-End A-C-D
- D. Begin-A-C-D-E-End-B-C

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 401

Which illustrates the connection between work that needs to be done and its project team members?

- A. Work breakdown structure
- B. Network diagrams
- C. Staffing management plan
- D. Responsibility matrix

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

QUESTION 402

Which tool or technique measures performance of the project as it moves from project initiation through project closure?

- A. Resource leveling
- B. Parametric measuring
- C. Pareto chart
- D. Earned value

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

QUESTION 403

A risk may be graded into different priorities by which process?

- A. Risk monitoring and controlling
- B. Risk response planning
- C. Qualitative risk analysis
- D. Quantitative risk analysis

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 404

What is the tool and technique used to request seller responses?

- A. Procurement documents
- B. Expert judgment
- C. Bidder conferences
- D. Contract types

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 405

What are assigned risk ratings based upon?

- A. Root cause analysis
- B. Assessed probability and impact

- C. Expert judgment
- D. Risk Identification

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 406

Which of following could be organizational process assets?

- A. Historical information
- B. Industry standards
- C. Organization infrastructure
- D. Marketplace conditions

Correct Answer: A

Explanation

Explanation/Reference:

QUESTION 410

When managing a project team, what helps to reduce the amount of conflict?

- A. Clear role definition
- B. Negotiation
- C. Risk response planning
- D. Team member replacement

Correct Answer: A
Section: Executing
Explanation

Explanation/Reference:

QUESTION 411

Which of the following processes is necessary to ensure that the project employs all processes needed to meet its requirements?

- A. Perform Quality Control
- B. Quality Policy
- C. Perform Quality Assurance
- D. Quality Planning

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 412

Which schedule development tool and technique produces a theoretical early start date and late start date?

- A. Critical path method
- B. Variance analysis
- C. Schedule compression

D. Schedule comparison bar charts

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 413

Which of the following processes are within the Initiating Process Group?

- A. Develop Project Management Plan and Identify Stakeholders
- B. Develop Project Management Plan and Plan Communications
- C. Develop Project Charter and Identify Stakeholders
- D. Develop Project Charter and Develop Project Scope Statement

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 414

How is scheduled variance calculated using the earned value technique?

- A. EV less AC
- B. AC less PV
- C. EV less PV
- D. AC less EV

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 415

What is one of the MAJOR outputs of activity sequencing?

- A. Responsibility assignment matrix
- B. Work breakdown structure update
- C. Project network diagram
- D. Mandatory dependencies list

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 416

What scope definition technique is used to generate different approaches to execute and perform the work of the project?

- A. Build vs. buy
- B. Expert judgment
- C. Alternatives identification
- D. Product analysis

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 417

Which of the following correctly describes when organizations and stakeholders are willing to accept varying degrees of risk?

- A. Risk analysis
- B. Risk tolerance
- C. Risk management
- D. Risk attitude

Correct Answer: B

Section: Executing
Explanation

Explanation/Reference:

QUESTION 418

Quality and credibility of the qualitative risk analysis process requires that different levels of the risk's probabilities and impacts be defined is the definition of what?

- A. Risk breakdown structure (RBS)
- B. Risk probability and impact
- C. Qualitative risk analysis
- D. Risk response planning

Correct Answer: B

Section: Executing
Explanation

Explanation/Reference:

QUESTION 419

The traditional organization chart structure that can be used to show positions and relationships in a graphic top-down format is called a:

- A. Responsible, accountable, consult, and inform (RACI) chart.
- B. Matrix-based chart.
- C. Human resource chart.
- D. Hierarchical-type chart.

Correct Answer: D

Section: Executing
Explanation

Explanation/Reference:

QUESTION 420

Which of the following is a component of three-point estimates?

- A. Probabilistic
- B. Most likely

- C. Expected
- D. Anticipated

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 421

Inputs to the Define Activities process include:

- A. Project scope statement, resource calendars, and work performance information.
- B. Scope baseline, enterprise environmental factors, and organizational process assets.
- C. Project scope statement, approved change requests, and WBS dictionary.
- D. Scope baseline, enterprise environmental factors, and activity duration estimates.

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 422

Organizational process assets can be divided into which of the following two categories?

- A. Project files and corporate knowledge base
- B. Templates, and processes and procedures
- C. Standards, and processes and procedures
- D. Corporate knowledge base and processes and procedures

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

QUESTION 423

A car company authorized a project to build more fuel-efficient cars in response to gasoline shortages. With which of the following strategic considerations was this project mainly concerned?

- A. Market demand
- B. Legal requirements
- C. Strategic Opportunity
- D. Technological advance

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 424

A Pareto chart is a specific type of:

- A. control chart
- B. histogram
- C. cause-and-effect diagram
- D. scatter diagram

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 425

What is a tool and technique used in the Develop Project Management Plan process?

- A. Project management information system (PMIS)
- B. Project charter
- C. Quality assurance
- D. Expert judgment

Correct Answer: D
Section: Executing
Explanation

Explanation/Reference:

QUESTION 426

The Plan Procurements process includes documenting project purchasing decisions and what other steps?

- A. Specifying the approach and identifying potential sellers
- B. Specifying the approach and selecting a seller
- C. Identifying potential sellers and obtaining seller responses
- D. Specifying the approach and managing procurement relationships

Correct Answer: A
Section: Executing
Explanation
Explanation/Reference:

QUESTION 427

An imposed date for completion of the project by the customer is an example of a project:

- A. deliverable
- B. assumption
- C. constraint
- D. exclusion

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 428

Information distribution involves making needed information available to project stakeholders in a timely manner. What is an output from information distribution?

- A. Earned value analysis
- B. Trend analysis
- C. Project records
- D. Performance reviews

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 429

Who is responsible for reviewing change requests and approving or rejecting the change requests?

- A. Change control board
- B. Project manager
- C. Project management office
- D. Project sponsor

Correct Answer: A

Explanation

Explanation/Reference:

QUESTION 430

Based on the following metrics: EV=\$20,000, AC=\$22,000, and PV=\$28,000, what is the project CV?

- A. -8000
- B. -2000
- C. 2000
- D. 8000

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 431

Which stakeholder communicates with higher levels of management to gather organizational support and promote project benefits?

- A. Portfolio manager
- B. Project sponsor
- C. Project manager
- D. Project management office

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 432

Activities on the critical path have which type of float?

- A. Zero free float
- B. Zero or negative float
- C. Negative and positive float
- D. Zero or positive float

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 433

Your project has an EV of 100 work-days, an AC of 120 work-days, and a PV of 80 work days. What should be your concern?

- A. There is a cost under run.
- B. There is a cost overrun.
- C. May not meet deadline.
- D. The project is 20 days behind schedule.

Correct Answer: B

Explanation

Explanation/Reference:

QUESTION 434

The project manager for XYZ stationers is sequencing the activities for the project to set up a new office. It is known from knowledge of best practices that it is better to wait for the painters to finish painting the walls before the new floors are installed. This is an example of which of the following types of dependency?

- A. Precedence
- B. Discretionary
- C. External
- D. Mandatory

Correct Answer: B
Section: Executing
Explanation

Explanation/Reference:

QUESTION 435

Which of the following is an input into the Develop Project Team process?

- A. Enterprise environmental factors
- B. Organizational process assets
- C. Project staff assignments
- D. Performance reports

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 436

A process is defined as:

- A. A set of interrelated actions and activities performed to achieve a certain objective.
- B. A set of guidelines that explains how to carry out a particular task.
- C. The inputs for a task and the tools and techniques required to carry out the task.
- D. A collection of logically related project activities, usually culminating in the completion of a major deliverable.

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 437

Which of the following is an output of the Plan Quality process?

- A. Project document update
- B. Control chart
- C. Cost performance baseline
- D. Organizational process asset update

Correct Answer: A

Explanation

Explanation/Reference:

QUESTION 440

Which process group contains the processes performed to finalize all activities?

- A. Planning Process Group
- B. Executing Process Group
- C. Monitoring and Controlling Process Group
- D. Closing Process Group

Correct Answer: D
Section: Executing
Explanation

Explanation/Reference:

QUESTION 441

Which of the following will provide the basis for estimating, scheduling, executing, and monitoring and controlling project work?

- A. Activities
- B. Milestone list
- C. Work breakdown structure (WBS)
- D. Work packages

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 442

The process of developing a detailed description of the project and product is known as:

- A. Create WBS. B. Verify Scope.
- C. Collect Requirements.
- D. Define Scope.

Correct Answer: D

Section: Executing

Explanation

Explanation/Reference:

QUESTION 443

Which of the following is a tool or technique for the Plan Procurements process?

- A. Bidder conferences
- B. Proposal evaluation techniques
- C. Contract types
- D. Contract change control systems

Correct Answer: C

Section: Executing
Explanation

Explanation/Reference:

QUESTION 444

In which of the following types of organizations is resource availability moderate to high?

- A. Weak matrix
- B. Balanced matrix
- C. Strong matrix
- D. Projectized

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 445

Which of the following makes changes to formally control documentation to reflect modified or additional ideas or content?

- A. Defect repair
- B. Updates
- C. Corrective action
- D. Performance reports

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 465

Team performance assessments is an output of which of the following processes?

- A. Develop Human Resource Plan
- B. Perform Quality Control
- C. Develop Project Team
- D. Manage Project Team

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 466

Project management processes are:

- A. Static; they must not change across different projects.
- B. Applied globally and across all industry groups.
- C. Discrete elements with well-defined interfaces.
- D. Project phases, applied as required in different projects.

Correct Answer: B
Section: Executing
Explanation

Explanation/Reference:

QUESTION 467

Issue change requests and adapt approved changes into the project's scope, plans, and environment is an activity included in which of the following project management processes?

- A. Direct and Manage Project Execution
- B. Monitor and Control Project Work
- C. Perform Integrated Change Control
- D. Monitor and Control Risks

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 468

The Process Group in which the internal and external stakeholders interact and influence the overall outcome of the project is the:

- A. Monitoring and Controlling Process Group.
- B. Initiating Process Group.
- C. Planning Process Group.
- D. Executing Process Group.

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 469

Which of the following is a schematic display of the project's schedule activities and the logical relationships among them?

- A. Gantt chart
- B. Project schedule network diagram
- C. Project milestone list
- D. Activity list

Correct Answer: B
Section: Executing
Explanation

Explanation/Reference:

QUESTION 470

Which of the following procurement processes results in the awarding of a procurement contract?

- A. Administer Procurements
- B. Close Procurements
- C. Conduct Procurements
- D. Plan Procurements

Correct Answer: C
Section: Executing
Explanation

Explanation/Reference:

QUESTION 471

To which process is work performance information an input?

- A. Contract administration
- B. Direction and management of project execution
- C. Create WBS
- D. Qualitative risk analysis

Correct Answer: A
Section: Executing
Explanation

Explanation/Reference:

QUESTION 472

Decomposition, rolling wave planning, and templates are all tools and techniques for which of the following?

- A. Define Activities
- B. Estimate Activity Durations
- C. Develop Schedule
- D. Sequence Activities

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 473

The run chart created during the Perform Quality Control process on a project is used to show the:

- A. relationship between two variables
- B. data points plotted in the order in which they occur
- C. most common cause of problems in a process
- D. frequency of occurrence

Correct Answer: B

Section: Executing

Explanation

Explanation/Reference:

QUESTION 474

An output of the Manage Project Team process is:

- A. project management plan updates
- B. project staff assignments updates
- C. team performance assessments
- D. resource calendar updates

Correct Answer: A

Section: Executing
Explanation

Explanation/Reference:

QUESTION 475

Within project integration management, the statement of work (SOW) references which aspects of the project?

- A. Strategic plan, business need, and product scope description
- B. Contract, enterprise environmental factors, and organizational process assets
- C. Business plan, project management plan, and project schedule
- D. Product lifecycle, business objective, and management strategy

Correct Answer: A

Section: Executing
Explanation

Explanation/Reference:

QUESTION 476

Which of the following are examples of interactive communication?

- A. Intranet sites
- B. Voice mails
- C. Video conferences
- D. Press releases

Correct Answer: C

Section: Executing
Explanation

Explanation/Reference:

QUESTION 477

Which of the following are inputs into the Administer Procurements process?

- A. Payment systems, organizational process assets update, and claims administration
- B. Inspections and audits, contract change control system, and project management plan updates
- C. Procurement documents, performance reports, and approved change requests
- D. Project documents, seller proposals, and payment systems

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 478

Which characteristic is unique to project work and does not apply to operational work?

- A. Performed by individuals
- B. Limited by constraints
- C. Temporary
- D. Performed to achieve organizational objectives

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 479

Which of the following is an input to the Plan Risk Responses process?

- A. Risk urgency assessment
- B. Organizational process assets
- C. Risk register
- D. Schedule management plan

Correct Answer: C

Section: Executing

Explanation

Explanation/Reference:

QUESTION 480

Project Management Process Groups are linked by:

- A. the outputs they produce
- B. discrete or one-time events
- C. the project management plan
- D. common tools and techniques

Correct Answer: A

Section: Executing

Explanation

Explanation/Reference:

QUESTION 481

The ways in which the roles and responsibilities, reporting relationships, and staffing management will be addressed and structured within a project is described in the:

- A. Human resource management plan.
- B. Activity resource requirements.
- C. Personnel assessment tools,
- D. Multi-criteria decision analysis.

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 482

An input to the Plan Procurement Management process is:

- A. Source selection criteria.

- B. Market research.
- C. A stakeholder register.
- D. A records management system.

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 483

Reserve analysis is a tool and technique used in which process?

- A. Plan Risk Management
- B. Plan Risk Responses
- C. Identify RisksD. Control Risks

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 484

Which type of dependency is established based on knowledge of best practices within a particular application area or some unusual aspect of the project in which a specific sequence is desired, even though there may be other acceptable sequences?

- A. External
- B. Internal
- C. Mandatory
- D. Discretionary

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 485

The Monitoring and Controlling Process Group includes processes that:

- A. Establish the scope, objectives, and course of action of a project,
- B. Define a new project or a new phase of an existing project.
- C. Track, review, and regulate the progress and performance of a project.
- D. Complete the work defined in the project management plan.

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 486

Which Control Quality tool is also known as an arrow diagram?

- A. Matrix diagram
- B. Affinity diagram
- C. Tree diagram
- D. Activity network diagram

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 487

An effective technique for resolving conflict that incorporates multiple viewpoints from differing perspectives to achieve consensus and commitment is:

- A. smooth/accommodate.
- B. force/direct.
- C. collaborate/problem solve.
- D. compromise/reconcile.

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 488

Which tool or technique is used in validating the scope of a project?

- A. Facilitated workshops
- B. Interviews
- C. Inspection
- D. Meetings

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 489

Configuration identification, configuration status accounting, and configuration verification and audit are all activities in which process?

- A. Perform Quality Assurance
- B. Direct and Manage Project Work
- C. Monitor and Control Project Work
- D. Perform Integrated Change Control

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 490

Which tool or technique is used in the Estimate Costs process?

- A. Acquisition
- B. Earned value management
- C. Vendor bid analysis
- D. Forecasting

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 491

Which tool or technique is used in the Perform Integrated Change Control process?

- A. Decomposition
- B. Modeling techniques
- C. Resource optimization
- D. Meetings

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 492

A logical relationship in which a successor activity cannot start until a predecessor activity has finished is known as:

- A. Start-to-start (SS).
- B. Start-to-finish (SF).
- C. Finish-to-start (FS).
- D. Finish-to-finish (FF).

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 493

Which type of contract gives both the seller and the buyer flexibility to deviate from performance with financial incentives?

- A. Cost Plus Incentive Fee (CPIF)
- B. Fixed Price Incentive Fee (FPIF)
- C. Cost Plus Award Fee (CPAF)
- D. Time and Material (T&M)

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 494

The degree, amount, or volume of risk that an organization or individual will withstand is known as its risk:

- A. Analysis
- B. Appetite
- C. Tolerance
- D. Response

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 495

An output of the Perform Integrated Change Control process is:

- A. Deliverables.
- B. Validated changes.
- C. The change log.

D. The requirements traceability matrix.

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 496

During which process does the project team receive bids and proposals?

- A. Conduct Procurements
- B. Plan Procurements
- C. Estimate Costs
- D. Control Budget

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 497

The process of monitoring the status of the project and product scope as well as managing the changes to the scope baseline is known as:

- A. Validate Scope.
- B. Plan Scope Management.
- C. Control Scope.
- D. Define Scope.

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 498

Which output is the approved version of the time-phased project budget?

- A. Resource calendar
- B. Scope baseline
- C. Trend analysis
- D. Cost baseline

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 499

The purpose of the Project Communications Management Knowledge Area is to:

- A. Monitor and control communications throughout the entire project life cycle.
- B. Maintain an optimal flow of information among all project participants.
- C. Develop an appropriate approach for project communications.
- D. Ensure timely and appropriate collection of project information.

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 500

Processes in the Initiating Process Group may be completed at the organizational level and be outside of the project's:

- A. Level of control.
- B. Communication channels.
- C. Scope.
- D. Strategic alignment.

Correct Answer: A

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 501

Specification of both the deliverables and the processes is the focus of:

- A. Change control
- B. Configuration control
- C. Project monitoring and control
- D. Issue control

Correct Answer: A

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 502

Which output of Project Cost Management consists of quantitative assessments of the probable costs required to complete project work?

- A. Activity cost estimates
- B. Earned value management
- C. Cost management plan
- D. Cost baseline

Correct Answer: A

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 503

While processes in the Planning Process Group seek to collect feedback and define project documents to guide project work, organizational procedures dictate when the project planning:

- A. ends.
- B. begins.
- C. delays.
- D. deviates.

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 504

Which item is a cost of conformance?

- A. Training
- B. Liabilities
- C. Lost business
- D. Scrap

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 505

Which key interpersonal skill of a project manager is defined as the strategy of sharing power and relying on interpersonal skills to convince others to cooperate toward common goals?

- A. Collaboration
- B. Negotiation
- C. Decision making
- D. Influencing

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 506

Activity cost estimates and the project schedule are inputs to which Project Cost Management process?

- A. Estimate Costs
- B. Control Costs
- C. Plan Cost Management
- D. Determine Budget

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 507

Which change request is an intentional activity that realigns the performance of the project work with the project management plan?

- A. Update
- B. Preventive action
- C. Defect repair
- D. Corrective action

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 508

Using parametric estimating, if an assigned resource is capable of producing 120 units per hour, how many hours are required to produce 12,000 units?

- A. 100
- B. 120
- C. 1,000
- D. 1,200

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 509

Perform Integrated Change Control is the process of:

- A. Reviewing, approving, and managing all change requests
- B. Facilitating change management, manuals, or automation tools
- C. Comparing actual results with planned results in order to expand or change a project
- D. Documenting changes according to the change control system by the change control board

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 510

When painting a bedroom, preparing the walls can be done while the paint is being chosen. This is an example of a:

- A. lead
- B. lag
- C. mandatory dependency
- D. internal dependency

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 511

Which action is included in the Control Costs process?

- A. Identify how the project costs will be planned, structured, and controlled
- B. Determine policies, objectives, and responsibilities to satisfy stakeholder needs
- C. Develop an approximation of the monetary resources needed to complete project activities
- D. Monitor cost performance to isolate and understand variances from the approved cost baseline

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 512

An element of the modern quality management approach used to achieve compatibility with the International Organization for Standardization (ISO) is known as:

<https://vceplus.com/>

- A. Forecasting.
- B. Brainstorming.
- C. Historical databases.
- D. Cost of quality.

Correct Answer: D

<https://vceplus.com/>

Explanation/Reference:

QUESTION 513

An input to the Control Quality process is:

- A. Activity attributes
- B. Quality control measurements
- C. Enterprise environmental factors
- D. Deliverables

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 514

The chart below is an example of a:

ID	Requirements Description	Project Objectives	WBS Deliverables	Product Design	Product Development	Test Cases
001						
002						
003						

- A. Responsibility assignment matrix (RAM)
- B. Work breakdown structure (WBS)
- C. RACI chart
- D. Requirements traceability matrix

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 515

Which Perform Quality Assurance tool or technique is used to identify a problem, discover the underlying causes that lead to it, and develop preventative actions?

- A. Inspection
- B. Quality audits
- C. Design of experiments
- D. Root cause analysis

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 516

The following chart contains information about the tasks in a project.

Task	PV	AC	EV
1	10,000	10,000	10,000
2	10,000	8,000	10,000
3	10,000	8,000	8,000
4	9,000	12,000	10,000
5	10,000	12,000	12,000
6	10,000	10,000	12,000
7	12,000	12,000	10,000
8	10,000	8,000	9,000
9	12,000	10,000	11,000

Based on the chart, what is the cost performance index (CPI) for Task 2?

- A. 0.8
- B. 1
- C. 1.25
- D. 1.8

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 517

The following chart contains information about the tasks in a project.

Task	PV	AC	EV
1	10,000	10,000	10,000
2	10,000	8,000	10,000
3	10,000	8,000	8,000
4	9,000	12,000	10,000
5	10,000	12,000	12,000
6	10,000	10,000	12,000
7	12,000	12,000	10,000
8	10,000	8,000	9,000
9	12,000	10,000	11,000

Based on the chart, what is the schedule variance (SV) for Task 8?

- A. -2,000
- B. -1,000
- C. 1,000
- D. 2,000

B

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 518

The following chart contains information about the tasks in a project.

Correct Answer:

Task	PV	AC	EV
1	10,000	10,000	10,000
2	10,000	8,000	10,000
3	10,000	8,000	8,000
4	9,000	12,000	10,000
5	10,000	12,000	12,000
6	10,000	10,000	12,000
7	12,000	12,000	10,000
8	10,000	8,000	9,000
9	12,000	10,000	11,000

Based on the chart, what is the cost variance (CV) for Task 6?

- A. -2,000
- B. 0
- C. 1,000
- D. 2,000

D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 519

The following chart contains information about the tasks in a project.

Correct Answer:

Task	PV	AC	EV
1	10,000	10,000	10,000
2	10,000	8,000	10,000
3	10,000	8,000	8,000
4	9,000	12,000	10,000
5	10,000	12,000	12,000
6	10,000	10,000	12,000
7	12,000	12,000	10,000
8	10,000	8,000	9,000
9	12,000	10,000	11,000

Based on the chart, what is the schedule performance index (SPI) for Task 4?

- A. 0.83
- B. 0.9
- C. 1.11
- D. 1.33

C

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 520

Which type of analysis is used to determine the cause and degree of difference between the baseline and actual performance?

- A. Schedule network analysis
- B. Reserve analysis
- C. Alternative analysis
- D. Variance analysis

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 521

Which items are an output of the Perform Integrated Change Control process?

- A. Work performance reports
- B. Accepted deliverables
- C. Project management plan updates
- D. Organizational process assets

Correct Answer: C

Correct Answer:

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 522

Which term describes an assessment of correctness?

- A. Accuracy
- B. Precision
- C. Grade
- D. Quality

Correct Answer: A

Explanation

Explanation/Reference:

QUESTION 523

The cost baseline and project funding requirements are outputs of which process in Project Cost Management?

- A. Estimate Costs
- B. Control Costs
- C. Plan Cost Management
- D. Determine Budget

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 524

At the start of a typical project life cycle, costs are:

A. low, peak as work is carried out, and drop as the project nears the end.

- B. low, become steady as work is carried out, and increase as the project nears the end.
- C. high, drop as work is carried out, and increase as the project nears the end.
- D. high, become low as work is carried out, and drop as the project nears the end.

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 525

Success is measured by benefits realization for a:

- A. strategic plan
- B. project
- C. portfolio
- D. program

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 526

Organizational process assets, a lessons-learned database, and historical information are all inputs to which process?

- A. Plan Cost Management
- B. Plan Scope Management
- C. Plan Stakeholder Management
- D. Plan Schedule Management

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 527

A project team member agrees to change a project deliverable after a conversation with an external stakeholder. It is later discovered that the change has had an adverse effect on another deliverable. This could have been avoided if the project team had implemented:

- A. Quality assurance.
- B. A stakeholder management plan.
- C. Project team building.
- D. Integrated change control.

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 528

Whose approval may be required for change requests after change control board (CCB) approval?

- A. Functional managers
- B. Business partners
- C. Customers or sponsors
- D. Subject matter experts

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 529

A project requires a component with well-understood specifications. Performance targets are established at the outset, and the final contract price is determined after completion of all work based on the seller's performance. The most appropriate agreement with the supplier is:

- A. Cost Plus Incentive Fee (CPIF).
- B. Fixed Price Incentive Fee (FPIF).

- C. Cost Plus Award Fee (CPAF).
- D. Fixed Price with Economic Price Adjustment (FP-EPA).

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 530

Which enterprise environmental factors may influence Plan Schedule Management?

- A. Cultural views regarding time schedules and professional and ethical behaviors
- B. Historical information and change control procedures
- C. Risk control procedures and the probability and impact matrix
- D. Resource availability and organizational culture and structure

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 531

Which type of dependency used in the Sequence Activities process is sometimes referred to as preferred logic, preferential logic, or soft logic?

- A. Internal
- B. External
- C. Discretionary
- D. Mandatory

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 532

When the business objectives of an organization change, project goals need to be:

- A. realigned.
- B. performed.
- C. improved.
- D. controlled.

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 533

The approaches, tools, and data sources that will be used to perform risk management on a project are determined by the:

- A. Methodology
- B. Risk category
- C. Risk attitude
- D. Assumption analysis

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 534

An input of the Plan Procurement Management process is:

- A. Make-or-buy decisions.
- B. Activity cost estimates.
- C. Seller proposals.
- D. Procurement documents.

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 535

Outputs of the Control Communications process include:

- A. expert judgment and change requests
- B. work performance information and change requests
- C. project management plan updates and work performance information
- D. issue logs and organizational process assets updates

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 536

A measure of cost performance that is required to be achieved with the remaining resources in order to meet a specified management goal and is expressed as the ratio of the cost needed for finishing the outstanding work to the remaining budget is known as the:

- A. budget at completion (BAC)
- B. earned value management (EVM)
- C. to-complete performance index
- D. cost performance index

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 537

A collection of projects managed as a group to achieve strategic objectives is referred to as a:

- A. plan
- B. process
- C. program
- D. portfolio

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 538

Which Process Group's purpose is to track, review, and regulate the progress and performance of the project; identify any areas in which changes to the plan are required; and initiate the corresponding changes?

- A. Monitoring and Controlling
- B. Initiating
- C. Planning
- D. Executing

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 539

Work performance information and cost forecasts are outputs of which Project Cost Management process?

- A. Estimate Costs
- B. Plan Cost Management
- C. Determine Budget

D. Control Costs

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 540

An output of Control Schedule is:

- A. A project schedule network diagram
- B. A schedule management plan
- C. Schedule data
- D. Schedule forecasts

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 541

What is the name of the statistical method that helps identify which factors may influence specific variables of a product or process under development or in production?

- A. Failure modes and effects analysis
- B. Design of experiments
- C. Quality checklist
- D. Risk analysis

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 542

What cost control technique is used to compare actual project performance to planned or expected performance?

- A. Cost aggregation
- B. Trend analysis
- C. Forecasting
- D. Variance analysis

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 543

What is the term assigned to products or services having the same functional use but different technical characteristics?

- A. Scope
- B. Quality
- C. Specification
- D. Grade

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 544

Which schedule network analysis technique modifies the project schedule to account for limited resources?

- A. Human resource planning
- B. Fast tracking
- C. Critical chain method
- D. Rolling wave planning

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 545

Which of the following is an output of the Monitor and Control Project Work process?

- A. Change requests
- B. Performance reports
- C. Organizational process assets
- D. Project management plan

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 546

Which estimating technique uses the actual costs of previous similar projects as a basis for estimating the costs of the current project?

- A. Analogous
- B. Parametric
- C. Bottom-up
- D. Top-down

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 547

What is the difference between the critical path and the critical chain?

- A. Scope changes
- B. Resource limitations
- C. Risk analysis
- D. Quality audits

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 548

Which enterprise environmental factors are considered during Estimate Costs?

- A. Market conditions and published commercial information
- B. Company structure and market conditions
- C. Commercial information and company structure
- D. Existing human resources and market conditions

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 549

An input of the Control Schedule process is the:

- A. resource calendar.
- B. activity list.
- C. risk management plan.
- D. organizational process assets.

Correct Answer: D

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 550

Which Develop Schedule tool and technique produces a theoretical early start date and late start date?

- A. Critical path method
- B. Variance analysis
- C. Schedule compression
- D. Schedule comparison bar charts

Correct Answer: A

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 551

Perform Quality Control is accomplished by:

- A. Identifying quality standards that are relevant to the project and determining how to satisfy them.
- B. Monitoring and recording the results of executing the quality activities to assess performance and recommend necessary changes.
- C. Ensuring that the entire project team has been adequately trained in quality assurance processes.
- D. Applying Monte Carlo, sampling, Pareto analysis, and benchmarking techniques to ensure conformance to quality standards.

Correct Answer: B

QUESTION 552

Which type of estimating can produce higher levels of accuracy, depending upon the sophistication and underlying data built into the model?

- A. Bottom-up

- B. Three-point
- C. Parametric
- D. Analogous

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 553

Cost baseline is an output of which of the following processes?

- A. Control Costs
- B. Determine Budget
- C. Estimate Costs
- D. Estimate Activity Resources

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 554

Change requests are an output from which Project Integration Management process?

- A. Direct and Manage Project Execution
- B. Develop Project Management Plan
- C. Close Project
- D. Develop Project Charter

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 555

Which process involves aggregating the estimated costs of the individual schedule activities or work packages?

- A. Estimate Costs
- B. Estimate Activity Resources
- C. Control Costs
- D. Determine Budget

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 556

The CPI is .92, and the EV is US \$172,500. What is the actual cost of the project?

- A. US\$158,700
- B. US\$172,500
- C. US\$187,500
- D. US\$245,600

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 557

Which type of analysis is used to examine project results through time to determine if performance is improving or deteriorating?

- A. Control chart
- B. Earned value
- C. Variance
- D. Trend

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 558

Which is one of the major outputs of Sequence Activities?

- A. Responsibility assignment matrix (RAM)
- B. Work breakdown structure (WBS) update
- C. Project schedule network diagram
- D. Mandatory dependencies list

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 559

When does Monitor and Control Risks occur?

- A. At project initiation
- B. During work performance analysis
- C. Throughout the life of the project
- D. At project milestones

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 560

Which process occurs within the Monitoring and Controlling Process Group?

- A. Control Costs
- B. Plan Quality
- C. Perform Quantitative Risk Analysis
- D. Determine Budget

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 561

Which of the following processes audits the quality requirements and the results from quality control measures to ensure appropriate quality standards and operational definitions are used?

- A. Perform Quality Control
- B. Quality Metrics
- C. Perform Quality Assurance
- D. Plan Quality

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 562

How is the schedule variance calculated using the earned value technique?

- A. EV less AC
- B. AC less PV
- C. EV less PV
- D. AC less EV

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 563

Which Perform Quality Control tool graphically represents how various elements of a system interrelate?

- A. Control chart
- B. Flowchart
- C. Run chart
- D. Pareto chart

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 564

Which is a communication method used in the Report Performance process?

- A. Expert judgment
- B. Project management methodology
- C. Stakeholder analysis
- D. Status review meetings

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 565

Which technique helps to determine the risks that have the most potential impact on a project?

- A. Cost risk simulation analysis
- B. Expected monetary value analysis
- C. Modeling and simulation
- D. Sensitivity analysis

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 566

Labor, materials, equipment, and supplies are examples of:

- A. Resource attributes.
- B. Resource types.
- C. Resource categories.
- D. Resource breakdown structures (RBS).

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 567

Analogous cost estimating relies on which of the following techniques?

- A. Expert judgment
- B. Project management software
- C. Vendor bid analysis
- D. Reserve analysis

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 568

A tool and technique used during the Perform Qualitative Risk Analysis process is:

- A. risk data quality assessment.
- B. variance and trend analysis.
- C. data gathering and representation techniques.
- D. risk audits.

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 569

In the Estimate Activity Durations process, productivity metrics and published commercial information inputs are part of the:

- A. enterprise environmental factors.
- B. organizational process assets.
- C. project management plan,
- D. project funding requirements.

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 570

The purpose of inspection in Perform Quality Control is to keep errors:

- A. in line with a measured degree of conformity.

- B. out of the hands of the customer.
- C. in a specified range of acceptable results.
- D. out of the process.

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 571

An input to the Perform Quantitative Risk Analysis process is the:

- A. quality management plan.
- B. project management plan.
- C. communications management plan.
- D. schedule management plan.

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 572

In Project Cost Management, which input is exclusive to the Determine Budget process?

- A. Scope baseline
- B. Organizational process assets
- C. Project schedule
- D. Resource calendars

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 573

Section: Monitoring and Controlling**Explanation****Explanation/Reference:**

The key benefit of the Monitoring and Controlling Process Group is the ability to:

- A. establish and manage project communication channels, both external and internal to the project team.
- B. influence the stakeholders that want to circumvent integrated change control so that their changes are implemented.
- C. monitor the ongoing project team against the team performance assessments and the project performance baseline.
- D. observe and measure project performance regularly and consistently to identify variances from the project management plan.

Correct Answer: D

Section: Monitoring and Controlling Explanation**Explanation/Reference:****QUESTION 574**

Which written document helps monitor who is responsible for resolving specific problems and concerns by a target date?

- A. Project Plan
- B. Responsibility Matrix
- C. Issue Log
- D. Scope Document

Correct Answer: C

Section: Monitoring and Controlling Explanation**Explanation/Reference:****QUESTION 575**

Who provides the inputs for the original estimates of activity durations for tasks on the project plan?

- A. Project sponsor
- B. Project manager
- C. Person responsible for project scheduling
- D. Person who is most familiar with the task

D

QUESTION 576

Control charts, flowcharting, histograms, Pareto charts, and scatter diagrams are tools and techniques of which process?

- A. Perform Quality Control
- B. Perform Quality Assurance
- C. Plan Quality
- D. Report Performance

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 577

A given schedule activity is most likely to last four weeks. In a best-case scenario, the schedule activity is estimated to last two weeks. In a worst-case scenario, the schedule activity is estimated to last 12 weeks. Given these three estimates, what is the expected duration of the activity?

- A. Three weeks
- B. Four weeks
- C. Five weeks
- D. Six weeks

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 578

What is the primary benefit of meeting quality requirements?

- A. Quality metrics
- B. Less rework

Correct Answer:

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

- C. Quality control measurements
- D. Benchmarking

Correct Answer: B

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 579

Which of the following outputs from the Control Schedule process aids in the communication of schedule variance (SV), schedule performance index (SPI), or any performance status to stakeholders?

- A. Performance organizations
- B. Schedule baselines
- C. Work performance measurements
- D. Change requests

Correct Answer: C

Section: Monitoring and Controlling
Explanation

Explanation/Reference:

QUESTION 580

Testing falls into which of the following categories of cost of quality?

- A. Internal failure costs
- B. Prevention costs
- C. Appraisal costs
- D. External failure costs

C

QUESTION 581

Which of the following events would result in a baseline update?

- A. A project is behind schedule and the project manager wants the baseline to reflect estimated actual completion.
- B. A customer has approved a change request broadening the project scope and increasing the budget.
- C. One of the risks identified in the risk management plan occurs, resulting in a schedule delay.
- D. One of the key project team resources has left the team and no replacement is available.

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 582

Which of the following schedule network analysis techniques is applied when a critical path method calculation has been completed and resources availability is critical?

- A. Applying calendars
- B. Resource leveling
- C. Resource planning
- D. Resource conflict management

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 583

The project budget is set at \$150,000. The project duration is planned to be one year. At the completion of Week 16 of the project, the following information is collected: Actual cost = \$50,000, Plan cost = \$45,000, Earned value = \$40,000. What is the cost performance index?

- A. 0.8
- B. 0.89
- C. 1.13

Correct Answer:

**Section: Monitoring and Controlling
Explanation**

Explanation/Reference:

D. 1.25

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 584

Which technique is utilized in the Control Schedule process?

- A. Performance measure
- B. Baseline schedule
- C. Schedule network analysis
- D. Variance analysis

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 585

What happens to a stakeholder's project influence over time?

- A. Increases
- B. Decreases
- C. Stays the same
- D. Has no bearing

QUESTION 586

Which quality control technique illustrates the 80/20 principle?

- A. Ishikawa diagram
- B. Control chart

- C. Run chart
- D. Pareto chart

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 587

Administer Procurements is part of which Process Group?

- A. Planning
- B. Executing
- C. Monitoring and Controlling
- D. Closing

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 588

The process to ensure that appropriate quality standards and operational definitions are used is:

Correct Answer:

- A. Plan Quality.
- B. Perform Quality Assurance.
- C. Perform Quality Control.
- D. Total Quality Management.

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 589

Which process is responsible for monitoring the status of the project and product scope and managing changes to the scope baseline?

- A. Variance Analysis
- B. Define Scope
- C. Verify Scope
- D. Control Scope

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 590

The total of the planned value (PV) is also known as:

- A. work breakdown structure (WBS).
- B. schedule target.
- C. performance measurement baseline (PMB).
- D. earned value baseline.

Correct Answer: C

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 591

When a permitting agency takes longer than planned to issue a permit, this can be described as a risk:

- A. event.
- B. response.
- C. perception.
- D. impact.

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 592

Plan-do-check-act is also known as:

- A. prevention over inspection.
- B. statistical sampling.
- C. management responsibility.
- D. continuous improvement.

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 593

Which of the following is a tool or technique used in the Determine Budget process?

- A. Variance analysis
- B. Three-point estimating
- C. Bottom-up estimating
- D. Historical relationships

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 594

Under which type of contract does the seller receive reimbursement for all allowable costs for performing contract work, as well as a fixed-fee payment calculated as a percentage of the initial estimated project costs?

- A. Cost Plus Fixed Fee Contract (CPFF)
- B. Cost Plus Incentive Fee Contract (CPIF)
- C. Firm Fixed Price Contract (FFP)
- D. Fixed Price with Economic Price Adjustment Contract (FP-EPA)

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 595

Funding limit reconciliation is a tool and technique used in which process?

- A. Control Costs
- B. Determine Budget
- C. Estimate Costs
- D. Control Budget

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 596

The three processes of Project Cost Management are:

- A. Estimate Costs, Control Schedule, and Control Costs.
- B. Estimate Costs, Determine Budget, and Estimate Activity Resources.
- C. Determine Budget, Control Schedule, and Estimate Activity Resources.

D. Estimate Costs, Determine Budget, and Control Costs.

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 597

Which baselines make up the performance measurement baseline?

- A. Scope baseline, cost baseline, and schedule baseline
- B. Scope baseline, project management baseline, and quality baseline
- C. Cost baseline, schedule baseline, and risk baseline
- D. Cost baseline, project management baseline, and schedule baseline

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 598

Which index is the calculated projection of cost performance that must be achieved on the remaining work to meet a specified management goal?

- A. Estimate at completion
- B. Cost performance
- C. Schedule performance
- D. To-complete performance

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 599

The contract in which the seller is reimbursed for all allowable costs for performing the contract work and then receives a fee based upon achieving certain performance objectives is called a:

- A. Cost Plus Incentive Fee Contract (CPIF).
- B. Cost Plus Fixed Fee Contract (CPFF).
- C. Fixed Price Incentive Fee Contract (FPIF).
- D. Time and Material Contract (T&M).

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 600

The process improvement plan details the steps for analyzing processes to identify activities which enhance their:

- A. quality.
- B. value.
- C. technical performance.
- D. status.

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 601

When cost variance is negative and schedule variance is positive, the project is:

- A. under budget and behind schedule.
- B. over budget and ahead of schedule.
- C. on schedule.
- D. complete; all planned values have been earned.

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 602

Which of the following is a tool and technique used to monitor risk?

- A. Technical performance measurement
- B. Cost performance baseline
- C. Benchmarking
- D. Cost of quality

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 603

How is quality control performed?

- A. By identifying quality standards that are relevant to the project and determining how to satisfy them
- B. By monitoring specific project results in compliance with relevant quality standards and determining corrective actions as needed
- C. By ensuring that the entire project team has been adequately trained in quality assurance processes
- D. By applying Monte Carlo, sampling, Pareto analysis, and benchmarking techniques to ensure conformance to quality standards

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 604

Which process involves aggregating the estimated costs of the individual schedule activities or work packages?

- A. Cost baseline
- B. Cost forecasting
- C. Cost variance
- D. Cost budgeting

Correct Answer: D

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 605

Ensuring that projects and programs are reviewed to prioritize resource allocation is a focus of which of the following?

- A. Project management
- B. Program management
- C. Portfolio management
- D. Relationship management

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 606

On what is project baseline development established?

- A. Approved product requirements
- B. Estimated project cost and schedule
- C. Actual project cost and schedule
- D. Revised project cost and schedule

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 607

Which knowledge area employs the processes required to ensure timely and appropriate generation, collection, distribution, storage, retrieval, and ultimate disposition of project information?

- A. Project Risk Management
- B. Project Integration Management
- C. Project Communications Management
- D. Project Quality Management

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 608

What quality control tool graphically represents how various elements of a system interrelate?

- A. Control chart
- B. Flowchart
- C. Run chart
- D. Pareto chart

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 609

Using the following data, what is the Schedule Performance Index (SPI)?

EV= \$500 PV= \$750 AC= \$1000 BAC= \$1200

- A. 0.67
- B. 1.5
- C. 0.75
- D. 0.5

Correct Answer: A

**Section: Monitoring and Controlling
Explanation**

Explanation/Reference:

QUESTION 610

What is the minimum a project schedule must include?

- A. Variance analysis
- B. A planned start date and a planned finish date for each schedule activity
- C. A critical path diagram
- D. Critical chain analysis

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 611

When does risk monitoring and control occur?

- A. At project initiation
- B. During work performance analysis
- C. Throughout the life of the project
- D. At project milestones

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 612

What is an objective of the Developing Project Team Process?

- A. Feelings of trust and improved cohesiveness
- B. Ground rules for interaction
- C. Enhanced resource availability
- D. Functional managers become more involved.

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 613

Cost aggregation is typically performed by aggregating work packages in accordance with the:

- A. Program evaluation and review technique (PERT).
- B. Cost of quality (COQ).
- C. Rough order of magnitude (ROM).
- D. Work breakdown structure (WBS).

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 614

Which process occurs within the Monitoring and Controlling Process Group?

- A. Cost Control
- B. Quality Planning
- C. Quantitative Risk Analysis
- D. Cost Budgeting

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 615

Which of the following are outputs of the Monitor and Control Project Work process?

- A. Requested changes, forecasts, recommended corrective actions
- B. Forecasts, resources plan, bottom up estimating
- C. Recommended corrective actions, cost baseline, forecasts
- D. Requested changes, recommended corrective actions, project constraints

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 616

Which schedule development technique modifies the project schedule to account for limited resources?

- A. Human resource planning
- B. Fast tracking
- C. Critical chain method
- D. Rolling wave planning

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 617

Which is a tool used in monitoring and controlling project work?

- A. Work performance information
- B. Project management information system (PMIS)
- C. Activity duration estimates
- D. Scheduled network analysis

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 618

As part of a mid-project evaluation, your project sponsor has asked you to provide a forecast of total project cost. You should calculate the forecast using which of the following methods?

- A. BAC
- B. EAC
- C. ETC
- D. WBS

Correct Answer: B

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 619

Forecasts, requested changes, recommended corrective actions, and organizational process asset updates are all outputs of which process?

- A. Risk response planning
- B. Risk monitoring and control
- C. Performance reporting
- D. Manage stakeholders

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 620

Cost baseline is an output of which of the following processes?

- A. Estimate Activity Resources
- B. Estimate Costs
- C. Determine Budget
- D. Control Costs

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 621

The cost performance baseline is typically displayed in the form of: A. An S-curve.

- B. A normal curve.
- C. A U-curve.
- D. A positive slope line.

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 622

What happens to a stakeholder's project influence over time?

- A. Increases
- B. Decreases
- C. Stays the same.
- D. Has no bearing.

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 623

Which of the following outputs from the Schedule Control process aids in the communication of SV, SPI or any performance status to stakeholders?

- A. Performance organizations
- B. Schedule baselines
- C. Performance measurements
- D. Change requests

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 624

Which technique is commonly used for the Quantitative Risk Analysis activity?

- A. Brainstorming
- B. Strategies for Opportunities
- C. Decision Tree Analysis
- D. Risk Data Quality Assessment

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 625

Which Activity Duration Estimating technique incorporates additional timing for contingency purposes?

- A. Analogous Estimating
- B. Expert Judgment
- C. Optimistic Estimates
- D. Reserve Analysis

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 626

When a control chart is used to monitor performance of a process, which of the following will be set by the project manager and the appropriate stakeholders to reflect the point(s) at which corrective action will be taken to prevent exceeding the specification limits?

<https://vceplus.com/>

<https://vceplus.com/>

- A. Upper and lower control limits
- B. Upper and lower specification limits
- C. Process mean
- D. Data points

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 627

Which type of control tool identifies whether or not a process has a predictable performance?

- A. Cause and effect diagram
- B. Control Charts
- C. Pareto Chart
- D. Histogram

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 628

Which technique is utilized in the Schedule Control process?

- A. Performance Measure
- B. Baseline Schedule
- C. Schedule Comparison
- D. Variance Analysis

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 629

Which of the following is a schedule network analysis technique that takes limited resources into account?

- A. Network reserve analysis
- B. Critical chain method
- C. Lead and lag adjustment
- D. Critical path method

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 630

An associate who calculates fees daily to support the department is doing which of the following?

- A. Phase work
- B. Project work
- C. Lifecycle work
- D. Operations work

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 631

A tool or technique used during the Administer Procurements process is:

- A. Expert judgment.
- B. Bidder conference.
- C. Procurement negotiation.
- D. Performance reporting.

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 632

What is the critical chain method?

- A. A technique to calculate the theoretical early start and finish dates and late start and finish dates
- B. A schedule network analysis technique that modifies the project schedule to account for limited resources
- C. A schedule compression technique that analyzes cost and schedule trade-offs to determine how to obtain the greatest amount of compression for the least incremental cost
- D. A technique to estimate project duration when there is a limited amount of detailed information about the project

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 633

Schedule milestones and a predefined budget are examples of:

- A. Project constraints.
- B. Requirements documentation.
- C. Organizational process assets.
- D. Activity cost estimates.

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 634

Cost variance (CV) is equal to earned value:

- A. Minus actual cost $[EV - AC]$.
- B. Minus planned value $[EV - PV]$.
- C. Divided by actual cost $[EV/AC]$.
- D. Divided by planned value $[EV/PV]$.

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 635

Cost of quality (COQ) refers to total cost of/to:

- A. All efforts related to quality.
- B. Product inspection activities.
- C. Maintain plan quality.
- D. Perform quality control.

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 636

Which of the Project Time Management processes analyzes activity sequencing, durations, resource requirements, and schedule constraints?

- A. Estimate Activity Durations
- B. ControlSchedule
- C. Sequence Activities
- D. Develop Schedule

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 637

Budgets reserved for unplanned changes to project scope and cost are:

- A. Contingency reserves.
- B. Management reserves.
- C. Authorized budgets.
- D. Cost baselines.

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 638

Projects are authorized by which of the following individuals?

- A. Project managers
- B. Stakeholders
- C. Functional managers
- D. Sponsors

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 639

The Administer Procurements process is in which of the following Project Management Process Groups?

- A. Planning
- B. Monitoring and Controlling
- C. Initiating
- D. Executing

Correct Answer: B

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 640

Which of the following are the components of the scope baseline?

- A. Project charter, project scope statement, and work breakdown structure (WBS)
- B. Project charter, project management plan, and plan procurement
- C. Project scope statement, work breakdown structure (WBS), and WBS dictionary
- D. Project management plan, plan procurement, and contract administration

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 641

Which standard examines an enterprise's project management process capabilities?

- A. PMBOK Guide
- B. The Standard for Program Management
- C. Organizational Project Management Maturity Model "OPMJ"
- D. The Standard for Portfolio Management

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 642

Which of the following tools and techniques is used to estimate cost?

- A. Budget forecast
- B. Variance analysis
- C. Activity cost estimate
- D. Three-point estimate

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 643

What are the key components of the communication model?

- A. Encode, message and feedback-message, medium, noise, and decode
- B. Encode, messaging technology, medium, noise, and decode
- C. Sender, message and feedback-message, medium, noise, and translate
- D. Receiver, message and feedback-message, medium, noise, and decode

Correct Answer: A

Section: Monitoring and Controlling

Explanation

Explanation/Reference:

QUESTION 644

One of the fundamental tenets of modern quality management states that quality is:

- A. planned, designed, and built in.
- B. planned, designed, and inspected in.
- C. built in, created, and reviewed.
- D. built in, created, and standardized.

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 645

Analyzing the strengths, weaknesses, opportunities, and threats (SWOT) of a project is known as:

- A. calculating cost of quality
- B. comparing project benefits
- C. performing measurements analysis
- D. identifying risks

Correct Answer: D

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 646

The CPI is .92, and the EV is US\$172,500. What is the actual cost of the project?

- A. US\$158,700
- B. US\$172,500
- C. US\$187,500
- D. US\$245,600

Correct Answer: C

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 647

A project is being audited, and the project manager receives numerous comments and questions from an unfamiliar person in the company. The project manager shares this information with team members, none of whom know this person. The project manager is unsure how to manage this situation.

What should the project manager do first?

- A. Review the responsible, accountable, consult, and inform (RACI) matrix.
- B. Respond to the person's comments and questions.
- C. Check the stakeholder register.
- D. Review the work breakdown structure (WBS).

Correct Answer: A

Section: Monitoring and Controlling Explanation

Explanation/Reference:

QUESTION 648

When a backward pass is calculated from a schedule constraint that is later than the early finish date that has been calculated during a forward pass calculation, this causes which type of total float?

- A. Negative
- B. Zero
- C. Positive
- D. Free

Correct Answer: C **Section: Closing Explanation**

Explanation/Reference:

QUESTION 649

A reward can only be effective if it is:

- A. Given immediately after the project is completed.
- B. Something that is tangible.
- C. Formally given during project performance appraisals.
- D. Satisfying a need valued by the individual.

Correct Answer: D
Section: Closing Explanation

Explanation/Reference:

QUESTION 650

Which tool or technique allows a large number of ideas to be classified into groups for review and analysis?

- A. Nominal group technique
- B. Idea/mind mapping
- C. Affinity diagram
- D. Brainstorming

Correct Answer: C
Section: Closing Explanation

Explanation/Reference:

QUESTION 651

Lessons learned are created and project resources are released in which Process Group?

- A. Planning
- B. Executing
- C. Closing
- D. Initiating

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 652

The process of identifying and documenting relationships among the project activities is known as:

- A. Control Schedule.
- B. Sequence Activities.
- C. Define Activities.
- D. Develop Schedule.

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 653

Conditions that are not under the control of the project team that influence, direct, or constrain a project are called:

- A. Enterprise environmental factors
- B. Work performance reports
- C. Organizational process assets
- D. Context diagrams

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 654

Updates to organizational process assets such as procurement files, deliverable acceptances, and lessons learned documentation are typical outputs of which process?

- A. Close Project or Phase
- B. Conduct Procurements
- C. Control Procurements
- D. Close Procurements

Correct Answer: D

Section: Closing Explanation

Explanation/Reference:

QUESTION 655

Sensitivity analysis is typically displayed as a/an:

- A. Decision tree diagram.
- B. Tornado diagram.
- C. Pareto diagram.
- D. Ishikawa diagram.

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 656

A project manager builds consensus and overcomes obstacles by employing which communication technique?

- A. Listening
- B. Facilitation

- C. Meeting management
- D. Presentation

Correct Answer: B

Section: Closing

Explanation

Explanation/Reference:

QUESTION 657

An input to Close Project or Phase is:

- A. Accepted deliverables
- B. Final products or services
- C. Document updates
- D. Work performance information

Correct Answer: A

Section: Closing

Explanation

Explanation/Reference:

QUESTION 658

An output of the Direct and Manage Project Work process is:

- A. Deliverables.
- B. Activity lists.
- C. A work breakdown structure.
- D. A scope statement.

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 659

External organizations that have a special relationship with the enterprise and provide specialized expertise are called:

- A. Customers.
- B. Business partners.
- C. Sellers.
- D. Functional managers.

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 660

Which Knowledge Areas include processes from the Closing Process Group?

- A. Project Quality Management and Project Time Management
- B. Project Scope Management and Project Risk Management
- C. Project Stakeholder Management and Project Cost Management
- D. Project Integration Management and Project Procurement Management

Correct Answer: D

Section: Closing

Explanation

Explanation/Reference:

QUESTION 661

Which conflict resolution technique searches for solutions that bring some degree of satisfaction to all parties in order to temporarily or partially resolve the conflict?

- A. Force/direct
- B. Withdraw/avoid
- C. Compromise/reconcile
- D. Collaborate/problem solve

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 662

At the completion of a project, a report is prepared that details the outcome of the research conducted on a global trend during the project. Which item did this project create?

- A. Result
- B. Product
- C. Service
- D. Improvement

Correct Answer: A

Section: Closing

Explanation

Explanation/Reference:

QUESTION 663

The links between the processes in the Process Groups are often:

- A. Intuitive
- B. Iterative
- C. MeasuredD. Monitored

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 664

The process of formalizing acceptance of the completed project deliverables is known as:

- A. Validate Scope.
- B. Close Project or Phase.
- C. Control Quality.

D. Verify Scope.

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 665

Information collected on the status of project activities being performed to accomplish the project work is known as what?

- A. Project management information system
- B. Work performance information
- C. Work breakdown structure
- D. Variance analysis

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 666

What is the number of stakeholders, if the project has 28 potential communication channels?

- A. 7
- B. 8
- C. 14
- D. 16

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 667

When is a project finished?

- A. After verbal acceptance of the customer or sponsor
- B. After lessons learned have been documented in contract closure
- C. When the project objectives have been met
- D. After resources have been released

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 668

Which process documents the business needs of a project and the new product, service, or other result that is intended to satisfy those requirements?

- A. Develop Project Management Plan
- B. Develop Project Charter
- C. Direct and Manage Project Execution
- D. Collect Requirements

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 669

What type of reward can hurt team cohesiveness?

- A. Sole-sum
- B. Win-lose
- C. Lose-win
- D. Partial-sum

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 670

What type of planning is used where the work to be accomplished in the near term is planned in detail, while work in the future is planned at a higher level?

- A. Finish-to-start planning
- B. Rolling wave planning
- C. Short term planning
- D. Dependency determination

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 671

If the most likely duration of an activity is five weeks, the best-case duration is two weeks, and the worst-case duration is 14 weeks, how many weeks is the expected duration of the activity?

- A. One
- B. Five
- C. Six
- D. Seven

Correct Answer: C

Section: Closing

Explanation

Explanation/Reference:

QUESTION 672

Conflict should be best addressed in which manner?

- A. Early, in private, using a direct, collaborative approach
- B. Early, in public, using an indirect, collaborative approach
- C. Early, in private, using an indirect, cooperative approach
- D. As late as possible, in public, using a direct, confrontational approach

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 673

The project management processes presented in the PMBOK Guide® should:

- A. always be applied uniformly.
- B. be selected as appropriate by the sponsor.
- C. be selected as appropriate by the project team.
- D. be applied based on ISO guidelines.

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 674

Which type of contract is most commonly used by buying organizations because the price for goods is set at the outset and is not subject to change unless the scope of work changes?

- A. Fixed Price with Economic Price Adjustments Contract (FP-EPA)
- B. Cost-Reimbursable Contract (CR)
- C. Firm-Fixed -Price Contract (FFP)
- D. Fixed-Price-Incentive-Fee Contract (FPIF)

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 675

Which schedule compression technique has phases or activities done in parallel that would normally have been done sequentially?

- A. Crashing

- B. Fast tracking
- C. Leads and lags adjustment
- D. Parallel task development

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 676

In the Develop Project Team process, which of the following is identified as a critical factor for a project's success?

- A. Team meetings
- B. Subcontracting teams
- C. Virtual teams
- D. Teamwork

Correct Answer: D

Section: Closing Explanation Explanation/Reference:

QUESTION 677

Which of the following is an example of the simplest fixed-price contract?

- A. Purchase requisition
- B. Purchase order
- C. Verbal agreement D. Request for quote

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 678

A project has a current cost performance index (CPI) of 1.25. To date, US\$10,000 have been spent on performing the project work. What is the earned value of the work completed to date?

- A. US\$000
- B. US\$9500
- C. US\$10,000
- D. US\$12,500

Correct Answer: D

Section: Closing Explanation

Explanation/Reference:

QUESTION 679

Which of the following characteristics are found in a functional organizational structure?

- A. Little or no project manager authority, little or no resource availability, and the functional manager controls the project budget
- B. Limited project manager authority, limited resource availability, and a part-time project manager's role
- C. Low to moderate project manager authority, low to moderate resource availability, and a full-time project manager's role
- D. High to almost total project manager authority, high to almost total resource availability, and full-time project management administrative staff

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 680

When calculating the cost of quality (COQ) for a product or service, money spent for cost of conformance would include the areas of:

- A. training, testing, and warranty work.
- B. equipment, rework, and scrap.
- C. training, document processes, and inspections.
- D. inspections, rework, and warranty work.

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 681

Which of the following is a tool or technique of the Define Activities process?

- A. Rolling wave planning
- B. Precedence diagramming method (PDM)
- C. Alternatives analysis
- D. Parametric estimating

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 682

Which of the following is a set of interrelated actions and activities performed to achieve a prespecified product, result, or service?

- A. Portfolio
- B. Process
- C. Project
- D. Program

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 683

Which degree of authority does a project manager have on a project in a strong matrix organizational structure?

- A. Limited
- B. Low to moderate
- C. Moderate to high
- D. High to almost total

Correct Answer: C **Section:** Closing Explanation

Explanation/Reference:

QUESTION 684

In which Process Group are lessons learned documented?

- A. Planning
- B. Closing
- C. Executing
- D. Initiating

Correct Answer: B

Explanation/Reference:

QUESTION 685

Which of the following is a conflict resolution technique that emphasizes areas of agreement rather than areas of difference?

- A. Compromising
- B. Collaborating
- C. Smoothing
- D. Problem Solving

Correct Answer: C

Section: Closing

Explanation

Explanation/Reference:

QUESTION 686

When sequencing activities, what does the common acronym FF stand for?

- A. Fixed Fee
- B. Free Float
- C. Fixed Finish
- D. Finish-to-Finish

Correct Answer: D

Section: Closing Explanation

Explanation/Reference:

QUESTION 687

Which is the correct formula for calculating expected activity cost for three-point estimating?

- A. $C_e = (C_0 + 6C_m + C_p)/4$
- B. $C_e = (6C_0 + C_m + C_p)/4$
- C. $C_e = (C_0 + 4C_m + C_p)/6$
- D. $C_e = (C_0 + C_m + 4C_p) / 6$

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 688

Lessons learned documentation is gathered during which of the following Project Management Process Groups?

- A. Planning
- B. Executing
- C. Closing
- D. Initiating

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 689

Which category of contracts are sellers legally obligated to complete, with possible financial damages if the project objectives are not met?

- A. Cost-reimbursable contracts
- B. Time and Material contracts (T&M)

- C. Fixed-price contracts
- D. Cost Plus Fixed Fee Contracts (CPFF)

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 690

Types of internal failure costs include:

- A. inspections.
- B. equipment and training.
- C. lost business.
- D. reworking and scrapping.

Correct Answer: D

Section: Closing Explanation

Explanation/Reference:

QUESTION 691

In a weak matrix, the project managers role is:

- A. part-time
- B. full-time
- C. occasional
- D. unlimited

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 692

During which process would stakeholders provide formal acceptance of the completed project scope?

- A. Perform Quality Control
- B. Verify Scope
- C. Control Scope
- D. Develop Schedule

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 693

At the end of the project, what will be the value of SV?

- A. Positive
- B. Zero
- C. Negative
- D. Greater than one

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 694

Which activity may occur at project or phase closure?

- A. Acceptance of deliverables
- B. Change requests
- C. Project management plan updates
- D. Benchmarking

Correct Answer: A

Section: Closing Explanation Explanation/Reference:

QUESTION 695

The completion of the project scope is measured against the:

- A. requirements documentation.
- B. project scope statement.
- C. project management plan.
- D. work performance measurements.

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 696

The process for performing variance analysis may vary, depending on:

- A. scenario building, technology forecasting, and forecast by analogy.
- B. working relationships among various stakeholders and team members.
- C. application area, the standard used, and the industry.
- D. work to be completed next.

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 697

The cost benefit analysis tool is used for creating:

- A. Pareto charts.
- B. quality metrics.
- C. change requests.
- D. Ishikawa diagrams.

Correct Answer: B Section: Closing Explanation

Explanation/Reference:

QUESTION 698

Exhibit A is an example of which of the following types of Sequence Activities?

- A. Activity-on-arrow diagramming
- B. Precedence diagramming
- C. Project schedule network diagramming
- D. Mathematical analysis diagramming

Correct Answer: B Section: Closing Explanation

Explanation/Reference:

QUESTION 699

Which of the following is an estimating technique that uses the values of parameters from previous similar projects for estimating the same parameter or measure for a current project?

- A. Reserve analysis
- B. Three-point estimating
- C. Parametric estimating
- D. Analogous estimating

Correct Answer: D

Section: Closing Explanation

Explanation/Reference:

QUESTION 700

Which of the following is a statistical concept that calculates the average outcome when the future includes scenarios that may or may not happen?

- A. Sensitivity analysis
- B. Three-point estimate
- C. Modeling and simulation
- D. Expected monetary value analysis

Correct Answer: D

Section: Closing Explanation

Explanation/Reference:

QUESTION 701

Which of the following is an output of Close Procurements?

- A. Accepted deliverables
- B. Organizational process assets updates
- C. Managing stakeholder expectations
- D. Performance reports

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 702

Which of the following is a complete set of indexed contract documentation, including the closed contract?

- A. Procurement package
- B. Negotiated settlements
- C. Procurement file
- D. Procurement management plan

Correct Answer: C

Section: Closing Explanation

Explanation/Reference:

QUESTION 703

Verification of project deliverables occurs during which process?

- A. Develop preliminary project scope statement
- B. Close Project or Phase
- C. Develop project charter
- D. Create WBS

Correct Answer: B

Section: Closing Explanation Explanation/Reference:

QUESTION 704

What do composite organizations involve?

- A. Functional and project managers
- B. Functional managers only
- C. Project managers only
- D. Technical managers and project managers

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 705

What is a technique used in the performance reporting process?

- A. Expert judgment
- B. Project management methodology
- C. Stakeholder analysis
- D. Status review meetings

Correct Answer: D

Section: Closing Explanation

Explanation/Reference:

QUESTION 706

When are deliverables accepted or not accepted?

- A. When the project is initiated
- B. As an output of the scope verification process
- C. When the project is closing
- D. In the contract closure process

Correct Answer: B Section:

Closing Explanation

Explanation/Reference:

QUESTION 707

Which of the following tools and techniques are utilized in the Close Project or Phase process?

- A. Project management information system
- B. Product analysis
- C. Expert judgment
- D. Inspection

Correct Answer: C Section:

Closing Explanation

Explanation/Reference:

QUESTION 708

Procurement audits, negotiated settlements, and a records management system are tools and techniques used in which Procurement Management process?

- A. Close Procurements
- B. Administer Procurements
- C. Plan Procurements
- D. Conduct Procurements

Correct Answer: A

Section: Closing Explanation

Explanation/Reference:

QUESTION 709

An output of the Close Project (or Close Phase) process is:

- A. accepted deliverables
- B. organizational process asset updates
- C. work performance information
- D. project management plan updates

Correct Answer: B

Section: Closing Explanation

Explanation/Reference:

QUESTION 710

During which process would you obtain stakeholders' formal acceptance of the completed project scope?

- A. Quality control
- B. Scope verification
- C. Scope control
- D. Close project

Correct Answer: B

Section: Closing
Explanation

Explanation/Reference:

QUESTION 711

An activity has an early start date of the 10th and a late start date of the 19th. The activity has a duration of four days. There are no non workdays. From the information given, what can be concluded about the activity?

- A. Total float for the activity is nine days.
- B. The early finish date of the activity is the end of the day on the 14th.
- C. The late finish date is the 25th.
- D. The activity can be completed in two days if the resources devoted to it are doubled.

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Total float or slack is computed by subtracting the early start date from the late start date, or $19 - 10 = 9$. To compute the early finish date given a duration of 4, we would start counting the activity on the morning of the 10th; therefore, the activity would be completed at the end of day 13, not 14 (10, 11, 12, 13). If we started the activity on its late start date on the morning of the 19th, we would finish at the end of day 22, not 25. Insufficient information is provided to determine whether this activity can be completed in 2 days if the resources are doubled.

QUESTION 712

In project development, schedule information such as who will perform the work, where the work will be performed, activity type, and WBS classification are examples of _____

- A. Activity attributes
- B. Constraints
- C. Data in the WBS repository
- D. Refinements

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Identifying activity attributes is helpful for further selection and sorting of planned activities. They are used for schedule development and for report formatting purposes.

QUESTION 713

Which of the following is a key input to define activities?

- A. Project management plan
- B. Project scope management plan
- C. Schedule management plan
- D. Project management software

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

While there are a number of inputs to define activities, the schedule management plan is a key input. It shows the level of detail necessary to manage the work.

QUESTION 714

The purpose of using what-if analysis in schedule control is to_____

- A. Review scenarios to bring the schedule in line with the plan
- B. Document requested changes
- C. Provide additional details as to when the schedule baseline should be updated
- D. Update the activity attributes

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

A corrective action is anything that is done to bring expected future schedule performance in line with the schedule baseline. Regarding the project schedule, it usually means taking action to speed up the project. One way to determine why the schedule performance is not in line with the plan is what-if analysis, which may

address schedule activities and other scenarios other than the activity that is actually causing the variance. It evaluates scenarios in order to predict their effect on the project's outcomes, either positive or negative.

QUESTION 715

Several types of float are found in project networks. Float that is used by a particular activity and does NOT affect the float in later activities is called_____

- A. Extra float
- B. Free float
- C. Total float
- D. Expected float

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Free float is defined as the amount of time an activity can be delayed without delaying the early start of any immediately succeeding activities.

QUESTION 716

All the following statements regarding critical chain method are true EXCEPT_____

- A. It modifies the schedule to account for limited resources
- B. The first step is to use conservative estimates for activity durations
- C. Duration buffers are added on the critical path
- D. It focuses on managing buffer activity durations

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

When using critical chain techniques, the initial project schedule is developed using duration estimates with required dependencies and defined constraints as inputs.

QUESTION 717

You are managing a new technology project designed to improve the removal of hazardous waste from your city. You are in the planning phase of this project and have prepared your network diagram. Your next step is to _____

- A. Describe any unusual sequencing in the network
- B. State the number resources required to complete each activity
- C. Establish a project calendar and link it to individual resource calendar
- D. Determine which schedule compression technique is the most appropriate, because your customer requests that the project be completed as soon as possible

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

A summary narrative can accompany the schedule network diagram and describe the approach used to sequence the activities in the network. This narrative also should describe any unusual sequences in the network.

QUESTION 718

The risk register may need to be updated as an output of which following process:

- A. Define activities
- B. Sequence activities
- C. Estimate activity resources
- D. Control schedule

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The risk register may require updates in both the sequence activities and develop schedule processes. In the sequence activity process, the activity lists and activity attributes may need updates as well.

QUESTION 719

You are managing a project that will use a virtual team with team members on three different continents. Your company is looking to use the virtual team to provide a lower cost product by using resources in countries that have a favorable exchange rate to that of your country. To assist in this process as you estimate resource requirements, it is helpful to consider _____

- A. Bottom-up estimating
- B. Published estimating data
- C. Analogous estimating
- D. Reserve analysis

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

In estimating activity resources, published estimating data is a tool and technique that is used as many companies routinely publish updated production rates and unit costs of resources. This includes labor trades, material, and equipment for different countries and geographic locations in these countries.

QUESTION 720

Activity A has a pessimistic (P) estimate of 36 days, a most likely (ML) estimate of 21 days, and an optimistic (O) estimate of 6 days. What is the probability that activity A will be completed in 16 to 26 days?

- A. 55.70 percent
- B. 68.26 percent
- C. 95.46 percent
- D. 99.73 percent

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

First, compute the standard deviation:

$$\sigma = \frac{P - O}{6} \text{ or } \frac{36 - 6}{6} = 5 \text{ days}$$

Next, compute PERT expected time:

$$\frac{P + 4(ML) + O}{6} \text{ or } \frac{36 + 4(21) + 6}{6} = 21 \text{ days}$$

Finally, determine range of outcomes using 1:

21-5 = 16 days, and 21+5 = 26 days

Simply defined, 1 is the amount on either side of the mean of a normal distribution that will contain approximately 68.26 percent of the population. Meredith and Mantel 2012, 348-350

QUESTION 721

You are managing a project to redesign a retail store layout to improve customer throughput and efficiency. Much project work must be done on site and will require the active participation of store employees who are lifelong members of a powerful union with a reputation for labor unrest. One important component of your schedule must be _____

- A. A resource capabilities matrix
- B. Buffers and reserves
- C. A resource calendar
- D. A resource histogram

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Project and resource calendars identify periods when work is allowed. Project calendars affect all resources. Resource calendars affect a specific resource or a resource category, such as a labor contract that requires certain workers to work on certain days of the week.

QUESTION 722

To account for uncertainty in a schedule, reserve analysis may be used. All the following are examples of contingency reserves EXCEPT _____

- A. Fixed number of work periods
- B. Percent of the estimated activity duration
- C. Buffers

D. Productivity metrics

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Duration estimates may include contingency reserves, and contingency should be identified clearly in schedule documentation. They are built into the overall project schedule to account for uncertainty. They also may be developed using quantitative analysis methods. When more information is known about the project, the contingency reserve may be used, reduced, or eliminated.

QUESTION 723

The reason that the schedule performance index (SPI) is shown as a ratio is to_____

- A. Enable a detailed analysis of the schedule regardless of the value of the schedule variance
- B. Distinguish between critical path and noncritical path work packages
- C. Provide the ability to show performance for a specified time period for trend analysis
- D. Measure the actual time to complete the project

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Because schedule performance index (SPI) and cost performance index (CPI) are expressed as ratios, they can be used to show performance for a specific time period or trends over a long-time horizon.

QUESTION 724

You are using earned value progress reporting for your current project in an effort to teach your software developers the benefits of earned value. You plan to display project results on the cafeteria bulletin board so that the team knows how the project is progressing.

PV = \$2,200

EV = \$2,000

AC = \$2,500

BAC = \$10,000

According to earned value analysis, the SV and status of the project described above is _____

- A. -\$300; the project is ahead of schedule
- B. +\$8,000; the project is on schedule
- C. +\$200; the project is ahead of schedule
- D. -\$200; the project is behind schedule

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

SV is calculated as $EV - PV$ (in this case, $\$2,000 - \$2,200$). A negative variance means that the work completed is less than what was planned for at that point in the project.

QUESTION 725

You are using earned value progress reporting for your current project in an effort to teach your software developers the benefits of earned value. You plan to display project results on the cafeteria bulletin board so that the team knows how the project is progressing.

$PV = \$2,200$

$EV = \$2,000$

$AC = \$2,500$

$BAC = \$10,000$

What is the CPI for this project, and what does it tell us about cost performance thus far?

- A. 0.20; actual costs are exactly as planned
- B. 0.80; actual costs have exceeded planned costs
- C. 0.80; actual costs are less than planned costs
- D. 1.25; actual costs have exceeded planned costs

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

CPI is calculated as EV/AC (in this case, $\$2,000/\$2,500$). EV measures the budgeted dollar value of the work that has actually been accomplished, whereas AC measures the actual cost of getting that work done. If the two numbers are the same, work on the project is being accomplished for exactly the budgeted amount of money (and the ratio will be equal to 1.0). If actual costs exceed budgeted costs (as in this example), AC will be larger than EV, and the ratio will be less than 1.0. CPI is also an index of efficiency. In this example, an index of 0.80 (or 80 percent) means that for every dollar spent on the project only 80 cents worth of work is actually accomplished.

QUESTION 726

You are using earned value progress reporting for your current project in an effort to teach your software developers the benefits of earned value. You plan to display project results on the cafeteria bulletin board so that the team knows how the project is progressing.

PV = \$2,200
EV = \$2,000
AC = \$2,500
BAC = \$10,000

The CV for this project is _____

- A. 300
- B. -\$300
- C. 500
- D. -\$500

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

CV is calculated as $EV - AC$ (in this case, $\$2,000 - \$2,500$). A negative CV means that accomplishing work on the project is costing more than was budgeted.

QUESTION 727

You are using earned value progress reporting for your current project in an effort to teach your software developers the benefits of earned value. You plan to display project results on the cafeteria bulletin board so that the team knows how the project is progressing.

PV = \$2,200
EV = \$2,000
AC = \$2,500
BAC = \$10,000

What is the EAC for this project, and what does it represent?

- A. \$12,500; the revised estimate for total project cost (based on performance thus far)
- B. \$10,000; the revised estimate for total project cost (based on performance thus far)
- C. \$12,500; the original project budget
- D. \$10,000; the original project budget

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

EAC is calculated as BAC/CPI (in this case, $\$10,000/0.80$). It is now known that the project will cost more than the original estimate of \$10,000. The project has been getting only 80 cents worth of work done for every dollar spent (CPI), and this information has been used to forecast total project costs. This approach assumes that performance for the remainder of the project will also be based on a CPI of 0.80.

QUESTION 728

You have now prepared your cost management plan so now you are preparing your project's cost estimate. You decided to use analogous estimating. Which of the following is NOT characteristic of analogous estimating?

- A. Supports top-down estimating
- B. Is a form of expert judgment
- C. Has an accuracy rate of $\pm 10\%$ of actual costs

<https://vceplus.com/>

- D. Involves using the cost of a previous, similar project as the basis for estimating current project cost

Correct Answer: C

<https://vceplus.com/>

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

A frequently used method of estimate costs, the analogous technique relies on experience and knowledge gained to predict future events. This technique provides planners with some idea of the magnitude of project costs but generally not within $\pm 10\%$.

QUESTION 729

All the following are outputs of the estimate cost process EXCEPT _____

- A. Activity cost estimates
- B. Basis of estimates
- C. Documented constraints
- D. Cost baseline

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Cost baseline is an output from the determine budget process.

QUESTION 730

You must consider direct costs, indirect costs, overhead costs, and general and administrative costs during cost estimating. Which of the following is NOT an example of a direct cost?

- A. Salary of the project manager
- B. Subcontractor expenses
- C. Materials used by the project
- D. Electricity

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Direct costs are incurred for the exclusive benefit of a project (for example, salary of the project manager, materials used by the project, and subcontractor expenses). Indirect costs, also called overhead costs, are allocated to a project by its performing organization as a cost of doing business. These costs cannot be traced to a specific project and are accumulated and allocated equitably over multiple projects (for example, security guards, fringe benefits, and electricity).

QUESTION 731

If the cost variance is the same as the schedule variance and both numbers are greater than zero, then_____

- A. The cost variance is due to the schedule variance
- B. The variance is favorable to the project
- C. The schedule variance can be easily corrected
- D. Labor rates have escalated since the project began

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

A positive schedule variance indicates that the project is ahead of schedule. A positive cost variance indicates that the project has incurred less cost than estimated for the work accomplished; therefore, the project is under budget.

QUESTION 732

You are responsible for preparing a cost estimate for a large World Bank project. You decide to prepare a bottom-up estimate because your estimate needs to be as accurate as possible. Your first step is to_____

- A. Locate a computerized tool to assist in the process
- B. Use the cost estimate from a previous project to help you prepare this estimate
- C. Identify and estimate the cost for each work package or activity
- D. Consult with subject matter experts and use their suggestions as the basis for your estimate

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Bottom-up estimating is derived by first estimating the cost of the project's elemental tasks at the lower levels of the WBS or for an activity and then aggregating those estimates at successively higher levels of the WBS for subsequent reporting and tracking purposes.

QUESTION 733

Management has grown weary of the many surprises, mostly negative, that occur on your projects. In an effort to provide stakeholders with an effective performance metric, you will use the to-complete performance index (TCPI). Its purpose is to_____

- A. Determine the schedule and cost performance needed to complete the remaining work within management's financial goal for the project
- B. Determine the cost performance needed to complete the remaining work within management's financial goal for the project
- C. Predict final project costs
- D. Predict final project schedule and costs

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Determine the cost performance needed to complete the remaining work within management's financial goal for the project The TCPI takes the value of work remaining and divides it by the value of funds remaining to obtain the cost performance factor needed to complete all remaining work according to a financial goal set by management.

QUESTION 734

If operations on a work package were estimated to cost \$1,500 and finish today but, instead, have cost \$1,350 and are only two-thirds complete, the cost variance is_____

- A. \$150
- B. -\$150
- C. -\$350
- D. -\$500

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

CV is calculated by $EV - AC$, or $\$1,500(2/3) - \$1,350 = -\$350$.

QUESTION 735

When you review cost performance data on your project, different responses will be required depending on the degree of variance or control thresholds from the baseline. For example, a variance of 10 percent might not require immediate action, whereas a variance of 100 percent will require investigation. A description of how you plan to manage cost variances should be included in the_____

- A. Cost management plan
- B. Change management plan
- C. Performance measurement plan
- D. Variance management plan

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The management and control of costs focuses on variance thresholds. Certain variances are acceptable, and others, usually those falling outside a particular range, are unacceptable. They are typically expressed as percentage deviations from the baseline plan. The actions taken by the project manager for variances are described in the cost management plan.

QUESTION 736

As of the fourth month on the Acme project, cumulative planned expenditures were \$100,000.

Actual expenditures totaled \$120,000. How is the Acme project doing?

- A. It is ahead of schedule.
- B. It is in trouble because of a cost overrun.
- C. It will finish within the original budget.
- D. The information is insufficient to make an assessment.

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The information provided tells us that, as of the fourth month, more money has been spent than was planned. However, we need to know how much work has been completed to determine how the project is performing. In earned value terms, we are missing the EV.

QUESTION 737

On your project, you need to assign costs to the time period in which they are incurred. To do this, you should_____

- A. Identify the project components so that costs can be allocated
- B. Use the project schedule as an input to determine budget
- C. Prepare a detailed and accurate cost estimate
- D. Prepare a cost performance plan

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Accurate project performance measurement depends on accurate cost and schedule information. The project schedule includes planned start and finish dates for all activities tied to work packages and control accounts. This information is used to aggregate costs to the calendar period for which the costs are planned to be incurred.

QUESTION 738

You have a number of costs to track and manage because your project is technically very complex. They include direct costs and indirect (overhead) costs. You have found that managing overhead costs is particularly difficult because they_____

- A. Are handled on a project-by-project basis
- B. Represent only direct labor costs
- C. Represent only equipment and materials needed for the project
- D. Are usually beyond the project manager's control

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Overhead includes costs such as rent, insurance, or heating, that pertain to the project as a whole and cannot be attributed to a particular work item. The amount of overhead to be added to the project is frequently decided by the performing organization and is beyond the control of the project manager.

QUESTION 739

If you want to calculate the ETC based on your expectations that similar variances to those noted to date will not occur, you should use which of the following formulas?

- A. $ETC = BAC - EV$
- B. $ETC = (BAC - EV)/CPI$
- C. $ETC = AC + EAC$
- D. $ETC = AC + BAC - EV$

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

This formula assumes that the estimate to complete is based on the same cost efficiency level.

QUESTION 740

You receive a frantic phone call from your vice president who says she is going to meet with a prospective client in 15 minutes to discuss a large and complex project. She asks you how much the project will cost. You quickly think of some similar past projects, factor in a few unknowns, and give her a number. What type of estimate did you just provide?

- A. Definitive
- B. Budget
- C. Order-of-magnitude
- D. Detailed

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

An order-of-magnitude estimate, which is referred to also as a ballpark estimate, has an accuracy range of -25% to 75% and is made without detailed data.

QUESTION 741

Your approved cost baseline has changed because of a major scope change on your project.

Your next step should be to_____

- A. Estimate the magnitude of the scope change
- B. Issue a change request
- C. Document lessons learned
- D. Execute the approved scope change

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Before a revised cost baseline leading to a budget update can be prepared, it is necessary to issue a change request, which may include preventive or corrective action. These change requests then are reviewed and processed through the Perform Integrated Change Control process.

QUESTION 742

Which of the following is a tool for analyzing a design, determining its functions, and assessing how to provide those functions' cost effectively?

- A. Pareto diagram
- B. Value analysis
- C. Configuration management
- D. Value engineering

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Value engineering considers possible cost trade-offs as a design evolves. The technique entails identifying the functions that are needed and analyzing the cost effectiveness of the alternatives available for providing them. It helps optimize project life cycle costs, save time, increase profits, improve quality, increase market share, solve problems, and contribute toward more effective resource use.

QUESTION 743

The cumulative CPI has been shown to be relatively stable after what percentage of project completion?

- A. 5% to 10%
- B. 15% to 20%

- C. 25% to 35%
- D. 50% to 75%

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The CPI has been proven to be an accurate and reliable forecasting tool. Researchers have found that the cumulative CPI does not change by more than 10% once a project is approximately 20% complete. The CPI provides a quick statistical forecast of final project costs.

QUESTION 744

The undistributed budget is part of the_____

- A. Management reserve
- B. Performance measurement baseline
- C. Level-of-effort cost accounts
- D. General and administrative accounts

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The undistributed budget is applied to project work that has not yet been linked to WBS elements at or below the lowest level of reporting. It is, therefore, part of the performance measurement baseline and is expected to be used in the performance of project work.

QUESTION 745

It is expensive to lease office space in cities around the world. Office space can cost approximately USD \$80 per square foot in Tampa, Florida. And it can cost approximately \$50,000 per square meter in Tokyo. These "averages" can help a person to determine how much it will cost to lease office space in these cities based on the amount of space leased. These estimates are examples of_____

- A. Variance analysis
- B. Parametric estimating
- C. Bottom-up estimating
- D. Reserve analysis

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Parametric estimating involves using statistical relationships between historical data and other variables to calculate or estimate for activity parameters, such as cost, budget, or duration. The example is representative of a simple parametric model.

QUESTION 746

Your project manager has requested that you provide him with a forecast of project costs for the next 12 months. He needs this information to determine if the budget should be increased or decreased on this major construction project. In addition to the usual information sources, which of the following should you also consider?

- A. Cost estimates from similar projects
- B. WBS
- C. Project schedule
- D. Costs that have been authorized and incurred

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

These costs are part of work performance data about project progress. In addition data include information about project progress such as which activities have started, their progress, and which deliverables have finished Updating the budget requires knowledge about the actual costs spent to date, and any budget changes are approved according to the Perform Integrated Change Control process.

QUESTION 747

There are a number of different earned value management rules of performance measurement that can be established as part of the cost management plan. Which one of the following is NOT an example of such a rule?

- A. Code of accounts allocation provision
- B. Formulas to determine the ETC
- C. Earned value credit criteria
- D. Definition of the WBS level

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Rules of earned value performance measurement are part of the cost management plan and may (1) define the points in the WBS where measurement of control accounts will be performed; (2) establish the EV measurement techniques such as weighted milestones, fixed-formula, percent complete, etc., to be used; and (3) specific tracking methods and EV equations for calculating the EAC forecasts to provide a validity check on the bottom-up EAC.

QUESTION 748

Which of the following calculations CANNOT be used to determine EAC?

- A. EV to date plus the remaining project budget
- B. Accepts actual costs and predicts future ETC work will be done at the budgeted rate
- C. Assumes what the program has experienced can be expected to continue
- D. ETC will be performed at an efficiency rate considering both the CPI and SPI

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

EAC is a forecast of the most likely total value based on project performance and risk quantification. To calculate EAC, the AC of a project must be known and used in the calculation. Any calculation that relies solely on the EV will not yield an accurate measure of cost performance.

QUESTION 749

Typically, the statement "no one likes to estimate, because they know their estimate will be proven incorrect" is true. However, you have been given the challenge of estimating the costs for your nuclear reactor project. A basic assumption that you need to make early in this is _____

- A. How direct and indirect costs will be handled
- B. Whether or not experts will be available to assist you in this process
- C. If there will be a multiyear project budget
- D. Whether the project has required delivery dates

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

The scope statement, as part of the scope baseline, is a key input in the estimate costs process and should be reviewed. It provides the project description, acceptance criteria, key deliverables, boundaries, assumptions, and constraints about the project. It also notes one basic assumption that must be made as costs are estimated is whether the estimates will be limited only to direct project costs or whether they also will include indirect project costs.

QUESTION 750

By reviewing cumulative cost curves, the project manager can monitor_____

- A. EV
- B. PV
- C. CVs
- D. CPI

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Cumulative cost curves, or S-curves, enable the project manager to monitor cost variances at a glance. The difference in height between the planned-expenditure curve and the actual-expenditure curve represents the monetary value of variances at any given time.

QUESTION 751

Control accounts_____

- A. Are charge accounts for personnel time management
- B. Summarize project costs at level 2 of the WBS
- C. Identify and track management reserves
- D. Represent the basic level at which project performance is measured and reported

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Control accounts represent a management control point where scope, budget (resource plans), actual costs, and schedule are integrated and compared to earned value for performance measurement.

QUESTION 752

Performance review meetings are held to assess schedule activity and work packages over-running or under-running the budget and to determine any estimated funds needed to complete work in progress. Typically, if EV is being used, all but which of the following information is determined?

- A. Variance analysis
- B. Trend analysis
- C. Time reporting systems
- D. Earned value performance

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Variance analysis focuses on cost and schedule to help explain the cause, issue, and corrective action. Trend analysis examines project performance over time to determine performance status. Earned value performance compares the performance measurement baseline to actual schedule and cost performance.

QUESTION 753

Overall cost estimates must be allocated to individual activities to establish the cost performance baseline. In an ideal situation, a project manager would prefer to prepare estimates_____

- A. Before the budget is complete
- B. After the budget is approved by management
- C. Using a parametric estimating technique and model specific for that project type
- D. Using a bottom-up estimating technique

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Often project cost estimates are prepared after budgetary approval is provided. However, activity cost estimates should be prepared before the budget is complete.

QUESTION 754

According to learning curve theory, when many items are produced repetitively_____

- A. Unit costs decrease geometrically as production rates increase linearly
- B. Unit costs decrease as production rates increase
- C. Unit costs decrease in a regular pattern as more units are produced
- D. Costs of training increase as the level of automation increases

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Learning curve theory indicates that human performance usually improves when a task is repeated. Specifically, each time output doubles, worker hours per unit decrease by a fixed percentage. This percentage is called the learning rate. Meredith and Mantel 2012, 301-303

QUESTION 755

The method of calculating the EAC by assuming the ETC work will be performed at the same cumulative CPI incurred by the project to date is used most often when_____

- A. Current variances are viewed as atypical ones
- B. Original estimating assumptions are no longer reliable because conditions have changed
- C. Current variances are viewed as typical of future variances
- D. Original estimating assumptions are considered to be fundamentally flawed

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Past performance is indicative of future performance; therefore, $EAC = BAC/CPI$.

QUESTION 756

Increased attention to return on investment (ROI) now requires you to complete a financial analysis of the payback period on your project. Such an analysis identifies the_____

- A. Ratio of discounted revenues over discounted costs

- B. Future value of money invested today
- C. Amount of time before net cash flow becomes positive
- D. Point in time where costs exceed profit

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Payback period analysis determines the time required for a project to recover the investment in it and become profitable. A weakness of this approach is a lack of emphasis on the magnitude of the profitability.

QUESTION 757

A revised cost baseline may be required in cost control when_____

- A. CVs are severe, and a realistic measure of performance is needed
- B. Updated cost estimates are prepared and distributed to stakeholders
- C. Corrective action must be taken to bring expected future performance in line with the project plan EAC shows that additional funds are needed to complete the project even if a scope change is not needed

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

After the CVs exceed certain ranges, the original project budget may be questioned and changed as a result of new information.

QUESTION 758

As project manager, you identified a number of acceptable tolerances as part of your earned value management system. During execution, some "unacceptable" variances occurred. After each "unacceptable" variance occurred, you did which one of the following first?

- A. Updated the budget
- B. Prepared a revised cost estimate
- C. Adjusted the project plan
- D. Documented lessons learned

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Lessons learned but not documented are "lessons lost." The lessons learned knowledge database will help current project members, as well as people on future projects, make better decisions. Accordingly, the reasons for the variance, the rationale supporting the corrective action, and other related information must be documented. They require updates as part of updates to organizational process assets as an output of control costs in terms of corrective actions taken and why they were selected.

QUESTION 759

Assume that the project cost estimates have been prepared for each activity and the basis of these estimates has been determined. Now, as the project manager for your nutrition awareness program in your hospital, you are preparing your budget. Because you have estimates for more than 1,200 separate activities, you have decided to first_____

- A. Aggregate these estimates by work packages
- B. Aggregate these estimates by control accounts to facilitate the use of earned value management
- C. Use the results of previous projects to predict total costs
- D. Set your cost performance baseline

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The WBS provides the relationship among all the project deliverables and their components and should be reviewed before the budget is developed. As the budget is determined, the cost estimates for the activities should be aggregated by the work packages in the WBS. Then, later, they are aggregated for the control accounts and finally for the entire project.

QUESTION 760

The cumulative cost curve for planned and actual expenditures_____

- A. Helps to monitor project performance at a glance
- B. Is used for calculating the CPI
- C. Is also known as a histogram
- D. Forecasts total project expenditures

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Cost curves for planned and actual expenditures are created by adding each month's costs to the previous reporting period's expenditures. By doing so, one can quickly see how the project is performing.

QUESTION 761

The reason that the cost performance index (CPI) is shown as a ratio is to_____

- A. Enable a detailed analysis of the schedule regardless of the value of the schedule variance
- B. Distinguish between critical path and noncritical path work packages
- C. Provide the ability to show performance for a specified time period for trend analysis
- D. Measure the actual time to complete the project

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Because schedule performance index (SPI) and cost performance index (CPI) are expressed as ratios, they can be used to show performance for a specific time period or trends over a long-time horizon. Additionally, there is no need to disclose confidential financial data to convey the project's status to one's customers; they should not have a need to know such information, unless there is a contractual requirement to do so.

QUESTION 762

Assume that your actual costs are \$800; your planned value is \$1,200; and your earned value is \$1,000. Based on these data, what can be determined regarding your schedule variance?

- A. At +\$200, the situation is favorable as physical progress is being accomplished ahead of your plan.
- B. At -\$200, the physical progress is being accomplished at a slower rate than is planned, indicating an unfavorable situation.
- C. At +\$400, the situation is favorable as physical progress is being accomplished at a lower cost than was forecasted.
- D. At -\$200, you have a behind-schedule condition, and your critical path has slipped

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Schedule variance is calculated: $EV - PV$ or $\$1,000 - \$1,200 = -\$200$. Because the SV is negative, physical progress is being accomplished at a slower rate than planned.

QUESTION 763

The CPI on your project is 0.84. This means that you should_____

- A. Place emphasis on improving the timeliness of the physical progress
- B. Reassess the life-cycle costs of your product, including the length of the life-cycle phase
- C. Recognize that your original estimates were fundamentally flawed, and your project is in an atypical situation
- D. Place emphasis on improving the productivity by which work was being performed

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

$CPI = EV/AC$ and measures the efficiency of the physical progress accomplished compared to the baseline. A CPI of 0.84 means that for every dollar spent, you're only receiving 84 cents of progress. Therefore, you should focus on improving the productivity by which work is being performed.

QUESTION 764

Quality is very important to your company. Each project has a quality statement that is consistent with the organization's vision and mission. Both internal and external quality assurance are provided on all projects to_____

- A. Ensure confidence that the project will satisfy relevant quality standards
- B. Monitor specific project results to note whether they comply with relevant quality standards
- C. Identify ways to eliminate causes of unsatisfactory results
- D. Use inspection to keep errors out of the process

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Quality assurance increases project effectiveness and efficiency and provides added benefits to project stakeholders. It includes all the planned and systematic quality activities to ensure that the project uses all the processes to meet requirements. Quality assurance should be performed throughout the project.

QUESTION 765

Benchmarking is a technique used in_____

- A. Inspections
- B. Root cause analysis
- C. Plan quality management
- D. Perform quality control

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Benchmarking involves comparing actual or planned practices to those practices of comparable projects to identify best practices, to note ideas for improvement, and to provide a way to measure performance.

QUESTION 766

In quality management, the practice "rework" is_____

- A. Acceptable under certain circumstances
- B. An adjustment made that is based on quality control measurements
- C. Action taken to bring a defective or nonconforming component into compliance
- D. Not a concern if errors are detected early

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Rework is a frequent cause of project overruns. The project team must make every reasonable effort to control and minimize rework so that defective or nonconforming components are brought into compliance with requirements or specifications.

QUESTION 767

The quality function deployment process is used to_____

- A. Provide better product definition and product development
- B. Help products to succeed in the marketplace
- C. Improve the functional characteristics of a product
- D. Support production planning and the just-in-time approach

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Quality function deployment helps a design team to define, design, manufacture, and deliver a product or service to meet or exceed customer needs. Its main features are to capture the customer's requirements, ensure cross-functional teamwork, and link the main phases of product development - product planning, part deployment, process planning, and production planning.

QUESTION 768

As it applies to quality, the law of diminishing returns says that_____

- A. 100% quality is unattainable
- B. 100% inspection is not cost effective
- C. Beyond a certain point, additional investment in quality has a negative ROI
- D. Providing quality products will stop, or at least diminish, the number of returned items

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

If a company has paid \$100,000 to gain 98% quality and it would cost an additional \$25,000 to gain the other 2%, this is known as the law of diminishing returns.

QUESTION 769

You are leading a research project that will require between 10 and 20 aerospace engineers. Some senior-level aerospace engineers are available. They are more productive than junior-level engineers, who cost less and who are available as well. You want to determine the optimal combination of senior- and junior-level personnel. In this situation, the appropriate technique to use is to_____

- A. Conduct a design of experiments
- B. Use the Ishikawa diagram to pinpoint the problem
- C. Prepare a control chart
- D. Analyze the process using a Pareto diagram

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

This technique is used to identify which variables have the most influence. It is a statistical method to identify the factors that may influence specific variables of a product or process under development or in production. For example, roller blade designers might want to determine which combination of number of wheels and titanium ball bearings would produce the most desirable "ride" characteristics at a reasonable cost. This technique, however, can be applied to project management issues such as cost and schedule trade-offs. An appropriately designed "experiment" often will help project managers to find an optimal solution from a relatively limited number of options, and often it help to determine the number and type of tests to use and their impact on quality.

QUESTION 770

The purpose of the Taguchi method is to_____

- A. Manage the flow of material for better visibility and control
- B. Use statistical techniques to compute a "loss function" to determine the cost of producing products that fail to achieve a target value
- C. Design, group, and manage production operations as self-contained flexible cells capable of start-to-finish processing of a family of items
- D. Regulate coordination and communication among process stages

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The Taguchi method is used to estimate the loss associated with controlling or failing to control process variability. It is based on the principle that by carefully selecting design parameters to produce robust designs, an organization can produce products that are more forgiving and tolerant. The tool helps determine the value or break-even point of improving a process to reduce variability.

QUESTION 771

Quality assurance promotes quality improvement. A "breakthrough" is the accomplishment of any improvement that takes the organization to unprecedented levels of performance by attacking_____

- A. Special causes of variation
- B. Common causes of variation
- C. Inspection over prevention
- D. Specific tolerances

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Quality improvement includes action taken to increase project effectiveness and efficiency in order to provide added benefits to stakeholders. A breakthrough attacks chronic losses, or in Deming's terminology, common causes of variation.

QUESTION 772

Which of the following statements best describes attribute sampling versus variables sampling?

- A. Attribute sampling is concerned with prevention, whereas variables sampling is concerned with inspection.
- B. Attribute sampling is concerned with conformance, whereas variables sampling is concerned with the degree of conformity.
- C. Attribute sampling is concerned with special causes, whereas variables sampling is concerned with any causes.
- D. Both are the same concept.

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Attribute sampling determines whether a result does or does not conform. Variables sampling rates a result on a continuous scale to measure the degree of conformity.

QUESTION 773

Your project scheduler has just started working with your project and has produced defective reports for the past two accounting cycles. If this continues, these defective reports could provide the potential for customer dissatisfaction and lost productivity that is due to rework. You discovered that the project scheduler needs additional training on using the scheduling tool that is used on your project. The cost of training falls under which one of the following categories?

- A. Overhead costs
- B. Failure costs

- C. Prevention costs
- D. Indirect costs

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Prevention costs include any expenditure directed toward ensuring that quality is achieved the first time.

QUESTION 774

When a process is within acceptable limits, it_____

- A. Should not be adjusted
- B. May not be changed to provide improvements
- C. Shows differences caused by expected events or normal causes
- D. Should not be inspected or reworked for any reason

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Processes should be changed only through established change procedures. If the process is outside acceptable limits, it should be adjusted.

QUESTION 775

The project team should have a working knowledge of statistical process control to help evaluate control quality outputs. Of all the topics involved, which of the following is the most important for the team to understand?

- A. Sampling and probability
- B. Attribute sampling and variables sampling
- C. Tolerances and control limits
- D. Special causes and random causes

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Sampling and probability form the basis of statistical process control, which helps the team monitor project results for compliance with relevant quality standards so that methods can be identified to eliminate causes of unsatisfactory results.

QUESTION 776

Rank ordering of defects should be used to guide corrective action. This is the underlying principle behind_____

- A. Trend analysis
- B. Inspections
- C. Control charts
- D. Pareto diagrams

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Pareto diagrams are histograms, ordered by frequency of occurrence, that show how many results were generated by type or category of identified cause. The project team should take action to fix the problems that are causing the greatest number of defects first. Pareto diagrams are based on Pareto's Law, which holds that a relatively small number of causes will typically produce a large majority of defects, also called the "solzo rule."

QUESTION 777

Project quality management was once thought to include only inspection or quality control. In recent years, the concept of project quality management has broadened. Which statement is NOT representative of the new definition of quality management?

- A. Quality is designed into the product or service, not inspected into it.
- B. Quality is the concern of the quality assurance staff.
- C. Customers require a documented and, in some cases, registered quality assurance system.
- D. National and international standards and guidelines for quality assurance systems are available.

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Quality concerns all levels of management and staff. Its success requires participation from all members of the project team with management providing the needed resources to succeed.

QUESTION 778

Assume you wish to provide a process to be more creative in problem solving as on your project you have a somewhat complex scenario that possesses intertwined logical relationships for up to 50 items. The best approach is to_____

- A. Design an experiment
- B. Use an interrelationship diagram
- C. Conduct a Monte Carlo analysis
- D. Use a process decision program chart

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

In perform quality assurance, the interrelationship diagram can be used as a quality management and control tool. It may be developed from data generated by other quality tools such as the affinity diagram, the tree diagram, or the cause-and-effect diagram. It is an adoption of relationship diagrams.

QUESTION 779

Your quality assurance department recently performed a quality audit of your project and identified a number of findings and recommendations. One recommendation seems critical and should be implemented because it affects successful delivery of the product to your customer.

Your next step should be to_____

- A. Call a meeting of your project team to see who is responsible for the problem
- B. Reassign the team member who had responsibility for oversight of the problem
- C. Perform product rework immediately
- D. Issue a change request to implement the needed corrective action

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The information obtained from a quality audit can be used to improve quality systems and performance. In most cases, implementing quality improvements requires preparation of change requests.

QUESTION 780

Six sigma refers to the aim of setting tolerance limits at six standard deviations from the mean, whereas the normally expected deviation of a process is_____

- A. One standard deviation
- B. Two standard deviations
- C. Three standard deviations
- D. Undeterminable because of the unique nature of every process

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

When the results of a sample of items measured falls within three standard deviations and that sample is representative of the entire population, you can assume that more than 99% of all items fall within that range. This generally accepted range of results has been used by quality control professionals through the years. Six sigma is a program started by Motorola that, from a statistical standpoint, indicates a quality +standard of only 3.4 defects per million.

QUESTION 781

You recognize the importance of quality control on your project. However, you also know that quality control has costs associated with it and that the project has a limited budget. One way to reduce the cost of quality control is to_____

- A. Work to ensure that the overall quality program is ISO compliant
- B. Use statistical sampling
- C. Conduct inspections throughout the process
- D. Use trend analysis

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Statistical sampling uses part of a population to draw conclusions about the total population. It is a well-proven technique that can significantly reduce the cost of quality control.+

QUESTION 782

Deming's Fourteen Points provide a way for an organization to create and sustain a culture of continuous improvement. As such it should be directed by_____

- A. The project manager
- B. Top management
- C. Employees participating in quality circles
- D. Stakeholders

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Deming is known as a quality pioneer. His approach to quality is not only statistically based but focuses on what management's responsibilities should be with respect to quality. His Fourteen Points for management are goals of quality for transforming business.

QUESTION 783

Quality inspections also may be called_____

- A. Control tests
- B. Walkthroughs
- C. Statistical sampling
- D. Checklists

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Inspections comprise an examination of a work product to determine if it conforms to standards. Additional names for inspections are audits, reviews, or peer reviews (in some application areas, these terms may have narrow and specific meanings).

QUESTION 784

Your management has prescribed that a quality audit be conducted at the end of every phase in a project. This audit is part of the organization's _____

- A. Quality assurance process
- B. Quality control process
- C. Quality improvement program
- D. Process adjustment program

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Quality assurance is a managerial function that establishes processes or procedures in an organization or project to assist in determining whether quality standards and operational definitions are being met. It is the application of planned, systematic quality activities to ensure that the project will use all processes needed to meet requirements and is performed throughout the life of the project. Quality audits are a tool and technique to use.

QUESTION 785

You are managing a major international project, and your contract requires you to prepare both a project plan and a quality management plan. Your core team is preparing a project quality management plan. Your first step in developing this plan is to _____

- A. Determine specific metrics to use in the quality management process
- B. Identify the quality standards for the project
- C. Develop a quality policy for the project
- D. Identify specific quality management roles and responsibilities for the project

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The quality policy includes the overall intentions and direction of the organization with regard to quality, as formally expressed by top management. If the performing organization lacks a formal quality policy or if the project involves multiple performing organizations, as in a joint venture, the project management team must develop a quality policy for the project. The quality management plan then describes how the quality policies will be implemented.

QUESTION 786

Recently your company introduced a new set of "metal woods" to its established line of golfing equipment. However, in the past weeks many of the clubs have been returned because of quality problems. You decide to conduct a failure mode and criticality analysis to_____

- A. Analyze the product development cycle after product release to determine strengths and weaknesses
- B. Evaluate failure modes and causes associated with the design and manufacture of this product
- C. Evaluate failure modes and causes associated with the design and manufacture of a new product to replace the clubs
- D. Help management set priorities in its existing manufacturing processes to avoid failures

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

This technique is a method of analyzing design reliability. A list of potential failure modes is developed for each element, and then each mode is given a numeric rating for frequency of occurrence, criticality, and probability of detection. These data are used to assign a risk priority number for prioritizing problems and guiding the design effort.

QUESTION 787

The "rule of seven" as applied to statistical process control charts means that_____

- A. Seven rejects typically occur per thousand inspections
- B. Seven consecutive points are above or below the mean
- C. At least seven inspectors should be in place for every thousand employees
- D. A process is not out of control even though seven measurements fall outside the lower and upper control limits

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Consecutive points on a control chart that are above or below the mean or if a point exceeds a control limit indicate an abnormal trend in the process and must be investigated.

QUESTION 788

Long-term contracting is an important aspect of project quality management because it_____

- A. Provides incentives to vendors to make quality commitments

- B. Improves quality through the use of benefit-cost ratio
- C. Usually results in lower costs and increased profitability
- D. Provides for periodic, yet mandatory quality audits

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Vendors that have long-term relationships with buyers are generally more inclined to invest in process and quality improvement, because they have a higher probability of recovering their costs. The stability provided through longer-term contracts permits better planning and encourages better communication and partnering between the buyer and the seller. Long-term contracting with fewer vendors also reduces buyer-related costs by simplifying accounting, collections, and other administrative tasks.

QUESTION 789

Even though your project is vastly different from a manufacturing operation, you believe the principles of kaizen will work well. The kaizen approach to continuous improvement emphasizes_____

- A. The greater importance of customer satisfaction over cost
- B. Radical changes in operating practices
- C. Incremental improvement
- D. The use of quality circles to improve morale

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Imai, a Japanese engineer, coined the word kaizen to describe an approach to quality that means making small improvements every time a process is repeated.

QUESTION 790

Results of quality control measurements are used_____

- A. As an input to plan quality management
- B. To prepare an operational definition
- C. To prepare a control chart

D. As an input to perform quality assurance

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Quality control activities result in measurements that are used as inputs to the QA process. Such quality control measurements are used to evaluate and analyze the quality of the processes of the project against the organization's standards or specific requirements. They also compare processes used to create the measurements and validate actual measurements to determine their level of correctness.

QUESTION 791

The control chart is a tool used primarily to help_____

- A. Monitor process variation over time
- B. Measure the degree of conformance
- C. Determine whether results conform
- D. Determine whether results conform to requirements

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Used to monitor process variation and to detect and correct changes in process performance, the control chart helps people understand and control their processes and work. It enables the project manager, along with appropriate stakeholders, to identify points where corrective action can be taken to prevent unnatural performance.

QUESTION 792

The area where the project manager can have the greatest impact on the quality of his or her project is in_____

- A. Quality planning
- B. Quality assurance
- C. Quality control
- D. Quality improvement

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Quality assurance is the management section of quality management. It is the collective term for the formal activities and managerial processes that attempt to ensure that products and services meet the required quality level. The project manager should establish administrative processes and procedures necessary to ensure and often prove that the scope statement conforms to the customer's actual requirements, to determine which processes will be used to ensure that stakeholders have confidence that the quality activities will be properly performed, and to ensure that all legal and regulatory requirements will be met.

QUESTION 793

You are a project manager for residential construction. As a project manager, you must be especially concerned with building codes-particularly in the plan quality management process. You must ensure that building codes are reflected in your project plans because_____

- A. Standards and regulations are an input to plan quality management
- B. Quality audits serve to ensure there is compliance with regulations
- C. They are a cost associated with quality initiatives
- D. Compliance with standards is the primary objective of perform quality control

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

During the plan quality management process, the project management team must consider any application area-specific standards, regulations, rules, and guidelines that may affect the project as part of the enterprise environmental factors. Building codes are an example of regulations.

QUESTION 794

The team members on your project have been complaining that they do not have any sense of identity as a team because they are located in different areas of the building. To remedy this situation, you developed a project logo and had it printed on T-shirts to promote the project, but this action has not worked. Your next step is to_____

- A. Initiate a newsletter
- B. Create an air of mystery about the project
- C. Establish a "team meeting room"
- D. Issue guidelines on how team members should interact with other stakeholders

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Collocating team members, even on a temporary basis, enhances communications, thereby contributing to improved project performance. In addition, the "team meeting room" (often called a `war room') provides a sense of identity to the project team and raises the visibility of the project within the organization. Creating a newsletter is simply applying another organizational process asset, which typically has proven ineffective.

QUESTION 795

The project team directory is an output from which of the following processes?

- A. Develop project team
- B. Acquire project team
- C. Develop human resource management plan
- D. Manage project team

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The project team directory is part of project staff assignments, an output from the acquire project team process. Other outputs are resource calendars and updates to the project management plan.

QUESTION 796

You realize that leadership without management or management without leadership probably will produce poor project results. Which one of the following key responsibilities best represents project leadership?

- A. Developing a vision and strategy, and motivating people to achieve them
- B. Getting things done through other people
- C. Using charismatic power to motivate others even if they do not like the work
- D. Using all types of power, as appropriate, as motivational tools

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Leadership involves developing a vision of the future and strategies to achieve that vision, positioning people to carry out the vision, and helping people energize themselves to overcome any barriers to change.

QUESTION 797

Given that you are neighbors, you and the CEO of your company have established a friendly personal relationship. Recently your company appointed you project manager for a new project that is crucial to achieving next year's financial targets. Which type of power available to project managers might you be able to rely upon?

- A. Referent
- B. Reward
- C. Formal
- D. Expert

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Referent power is based on a less powerful person's identification with a more powerful person. This type of power is useful in terms of persuasion and helps the project manager exert influence over individuals from whom he or she needs support.

QUESTION 798

A.

You have been a project manager for seven years. You now are managing the construction of a new facility that must comply with the government's newly issued environmental standards. You want to ensure that your team members are able to select methods to complete various activities on the project without needing to involve you in each situation. As you prepare your human resource management plan, you should document this information in which of the following_____

- Roles and responsibilities section
- B. Resource assignment matrix
- C. Resource breakdown structure
- D. Staffing management plan

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Authority refers to the right to apply project resources, make decisions, and sign approvals. Examples include selecting methods to complete activities, quality acceptance, and responding to variances in the project. The individual authority of each team member should match their individual responsibilities. This is documented in the roles and responsibilities section in the human resource management plan.

QUESTION 799

It is important on all projects to determine when and how human resources will be met. Assume that you are managing a project to assess methods for streamlining the regulatory approval process for new medical devices in your government agency. Because the agency has undergone downsizing during the past three years, subject matter experts are in short supply. You must determine whether the needed subject matter experts can be acquired from inside the agency or whether you must use contractors. This information should be documented in the_____

- A. Make-or-buy decisions in the procurement management plan
- B. Contracts management plan
- C. Staffing management plan
- D. Resource management plan

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

A.

Explanation:

The staffing management plan is part of the human resource management plan. One section of it involves staff acquisition. Among other things, this section includes whether the human resources will come from within the organization or from external, contracted sources. These data then help to plan the acquisition of project team members.

QUESTION 800

In both the weak and strong matrix organizational structures, the primary condition leading to conflict is_____

- Communication barriers
- B. Conflicting interests
- C. Need for consensus
- D. Ambiguous jurisdictions

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Ambiguous jurisdictions exist when two or more parties have related responsibilities, but their work boundaries and role definitions are unclear. This situation is found frequently in weak and strong matrix organizations because of the "two-boss" concept.

QUESTION 801

As project manager, you are primarily responsible for implementing the project management plan by authorizing the execution of project activities. Because you do not work in a projectized organization, you do not have direct access to human resource administrative activities. Therefore you need to_____

- A. Outsource these functions
- B. Prepare a project team charter that is signed off by a member of the human resources department to delineate responsibilities
- C. Ensure that your team is sufficiently aware of administrative requirements to ensure compliance
- D. Ask the head of human resources to approve your project human resource plan personally

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

A.

Explanation:

A projectized work environment is unusual because project managers rarely have every function under their control. But compliance with administrative requirements, government regulations, union contract provisions, and other constraints is a consideration in human resource management.

QUESTION 802

Constant bickering, absenteeism, and substandard performance have characterized the behavior of certain members of your team. You have planned an off-site retreat for the team to engage in a variety of activities. Your primary objective for investing time and money in this event is to improve_____

A. Team performance

- B. Morale C. Quality
- D. Individual performance

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Team development leads to improved team performance, which ultimately results in improved project performance. Improvements in team performance can come from many sources and can affect many areas of project performance. For example, improved individual skill levels such as enhanced technical competence may enable team members to perform their assigned activities more effectively. Team development efforts have greater benefit when conducted early but should take place throughout the project life cycle.

QUESTION 803

Two team members on your project often disagree. You need a conflict resolution method that provides a long-term resolution. You decide to use which one of the following approaches?

- A. Confronting
- B. Problem solving
- C. Collaborating
- D. Smoothing

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Collaborating or problem solving is an effective technique for managing conflict when a project is too important to be compromised. It involves incorporating multiple ideas and viewpoints from people with different perspectives and offers a good opportunity to learn from others. It provides a long-term resolution.

QUESTION 804

Which of the following is an enterprise environmental factor that may influence the development of the human resource management plan?

- A. The organizational structure of the performing organization
- B. Poor communication among team members
- C. Ambiguous staffing requirements

D. Team morale

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Enterprise environmental factors can influence the develop human resource management plan process. The organizational structure of the performing organization determines whether the project manager's role is a strong one (as in a strong matrix) or a weak one (as in a weak matrix). Other examples of enterprise environmental factors are the organization's culture, geographic dispersion of team members, existing human resources, personnel administration functions, and marketplace conditions.

QUESTION 805

As a project manager, you believe in using a "personal touch" to further team development. One approach that has proven effective toward this goal is _____

- A. Creating a team name
- B. Providing flexible work time
- C. Issuing a project charter
- D. Celebrating special occasions

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Project managers can show interest in their team members by celebrating occasions such as birthdays, anniversaries with the organization, and special achievements. Other approaches include being supportive, being clear, learning some information about each team member, and being accessible. Through observation and conversation, the project management team monitors indicators such as progress toward project deliverables, accomplishments that are a source of pride for team members, and interpersonal issues.

QUESTION 806

Your project has been under way for some time, but indicators show that it is in trouble. You have observed all the following symptoms of poor teamwork in your project team EXCEPT _____

- A. Frustration

- B. Excessive meetings
- C. Lack of trust or confidence in the project manager
- D. Unproductive meetings

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The problem is not too many meetings, but unproductive ones. The purpose of project meetings is to focus the skills and resources of the project team on project performance. Meetings that are considered "gripe sessions" or a time for the project manager to "lay down the law" are demoralizing to the team.

QUESTION 807

You are the project manager for a two-year project that is now beginning its second year. The mix of team members has changed, and there is confusion as to roles and responsibilities. In addition, several of the completed work packages have not received the required sign-offs, and three work packages are five weeks behind schedule. To gain control of this project, you need to _____

- A. Rebase line your original human resource plan with current resource requirements
- B. Change to a projectized organizational structure for maximum control over resource assignments
- C. Work with your team to prepare a responsibility assignment matrix
- D. Create a new division of labor by assigning technical leads to the most critical activities

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The responsibility assignment matrix defines project roles and responsibilities in terms of work packages and activities. It can be used to show who is a participant, who is accountable, who handles review, who provides input, and who must sign off on specific work packages or project phases.

QUESTION 808

You are part of a team that is working to develop a new medical implant device. Your project manager is an expert in medical implantation devices, yet he continually seeks opinions from the team about a wide variety of project and product issues. Team members often run project meetings while he sits silently at the head of the table. Which one of the following best characterizes his leadership style?

- A. Laissez-faire

- B. Team directed
- C. Collaborative
- D. Shared leadership

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Shared leadership is more than participatory management or collaboration; it involves letting the project team take over as much of the leadership role as it will accept.

QUESTION 809

The major difference between the project coordinator and project expeditor forms

- A. Strong commitment to the project usually does not exist in the project expeditor form of organization
- B. The project coordinator cannot personally make or enforce decisions
- C. The project expeditor acts only as an intermediary between management and the project team
- D. The project coordinator reports to a higher-level manager in the organization

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The relative position of the project coordinator in the organization is thought to lead to an increased level of authority and responsibility.

QUESTION 810

Which one of the following represents a constraint on the acquire project team process?

- A. Pre assignment of staff to the project
- B. Recruitment practices of the organizations involved
- C. Use of outsourcing
- D. Team member training requirements

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Staff assignments in organizations are governed by the policies, procedures, or guidelines of individual components. These policies will constrain the project manager's actions in acquiring a project team. The more familiar the project manager is with such policies, the easier it will be for him/her to assemble a team. Such recruitment practices are examples of personnel administration policies; an enterprise environmental factor, which is an input to acquire project team.

QUESTION 811

According to Herzberg's Motivator-Hygiene Theory, when achievement, recognition, responsibility, and advancement, or promotion, are not present, employees will _____

- A. Become alienated with the organization and leave
- B. Lack motivation but will not be dissatisfied with their work
- C. Lack motivation and become dissatisfied with their work
- D. Become dissatisfied only if they do not receive salary increases

Correct Answer: C

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Herzberg advanced the theory that hygiene factors, such as the poor attitude of a supervisor, lead to dissatisfaction but not usually to decreased motivation. When motivators, such as responsibility and recognition, are lacking, they lead to job dissatisfaction, but when such motivators are present, they tend to motivate a person in the performance of his or her work.

QUESTION 812

Objectives for conducting performance appraisals during the course of a project can include all the following EXCEPT _____

- A. Initial establishment of roles and responsibilities
- B. Discovery of unknown and unresolved issues
- C. Development of individual training plans
- D. Establishment of goals for future time periods

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Project performance appraisals are a tool and technique for the manage project team process and are used, among other objectives, to reclarify roles and responsibilities. It is critical that team members receive positive feedback in what might otherwise be a hectic environment.

QUESTION 813

Your organization is adopting a project-based approach to business, which has been difficult. Although project teams have been created, they are little more than a collection of functional and technical experts who focus on their specialties. You are managing the company's most important project. As you begin this project, you must place a high priority on_____

- A. Creating an effective team
- B. Identifying the resources needed to finish the project on time
- C. The best way to communicate status to the CEO
- D. Establishing firm project requirements

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

An effective team is critical to project success, but such a team is not born spontaneously. In early project phases, it is vitally important for the project manager to place a high priority on initiating and implementing the team-building process.

QUESTION 814

In organizing a project, a project manager must deal with conflict. Which statement is TRUE regarding conflict in projects?

- A. A matrix form of organization can produce a lack of clear role definitions and lead to ambiguous jurisdictions between and among functional leaders and project managers
- B. Sources of conflict include project priorities, PERT/CPM schedules, contract administrative procedures, and type of contract
- C. Conflict is to be avoided whenever possible
- D. Strong matrix project managers have few human resource conflicts, because they can dictate their needs to functional managers

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Matrix management is useful but complex, involving difficult communication because of the use of borrowed and often part-time resources who are spread throughout the organization.

QUESTION 815

The chances for successful completion of a multidisciplinary project are increased if project team members are _____

- A. Problem oriented
- B. Politically sensitive to top management's needs
- C. Focused on individual project activities
- D. Focused on customer demands

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Problem-oriented people tend to learn and use whatever problem-solving techniques appear helpful. Although the project manager must be politically sensitive, team members need not have developed this skill to the extent required of the project manager; and rather than focusing on individual activities, team members should take a systems approach focusing on the entire project.

QUESTION 816

The terms strong matrix, balanced matrix, and weak matrix when applied to the matrix structure in project organization refer to the _____

- A. Ability of the organization to achieve its goals
- B. Physical proximity of project team members to one another and to the project manager
- C. Degree of the project manager's authority
- D. Degree to which team members bond together

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

In a strong matrix organization, the balance of power shifts toward the project manager. In a weak matrix organization, the balance of power shifts toward the functional or line manager.

QUESTION 817

The key way for a project manager to promote optimum team performance in project teams whose members are not collocated is to _____

- A. Build trust
- B. Establish a reward and recognition system
- C. Obtain the support of the functional managers in the other locations
- D. Exercise his or her right to control all aspects of the project

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Team members who are physically separate from one another tend not to know each other well. They have few opportunities to develop trust in the traditional way, and they tend to communicate poorly with one another. Trust then must become the foundation upon which all team-building activities are built.

QUESTION 818

Hierarchical-type charts are a tool and technique for use in human resource planning. Which one of the following is helpful in tracking project costs and can be aligned with the organization's accounting system?

- A. RACI
- B. RAM
- C. RBS
- D. OBS

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The resource breakdown structure (RBS) is a variation of the organizational breakdown structure (OBS) and is used to show which work elements are assigned to individuals and other resource categories. As an example, it can show all crane operators and cranes even though they may be scattered throughout the OBS and WBS, which can help to track project costs.

QUESTION 819

When choosing the most appropriate form of project organization, the first step is to_____

- A. Create the WBS and let it determine the project organizational structure
- B. Produce a project management plan and determine the functional areas responsible for each task
- C. Refer to the project charter developed by top management
- D. Develop a project schedule, including a top-down flowchart, and identify the functional areas to perform each task **Correct Answer: B**

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

All effort on a project starts from the project management plan, which details the work that must be accomplished. It is a key input as the human resource management plan is developed.

QUESTION 820

Conflicts in which following three areas represent the majority of all project conflicts?

- A. Personalities, cost objectives, and schedules
- B. Cost objectives, administrative procedures, and scarce resources
- C. Scarce resources, scheduling priorities, and personal work styles
- D. Personal work styles, project priorities, and cost objectives

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Although all areas listed contain potential conflicts, the majority of all conflict in a project environment is caused by scarce resources, scheduling priorities, and personal work styles.

QUESTION 821

Which of the following qualifications is the most important for a project manager?

- A. Supervisory experience
- B. Negotiation skill
- C. Education in a technical field
- D. Ability to work well with others

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Project management requires getting things done through people who generally do not report directly to the project manager. The ability to influence project team members, as well as other key stakeholders, is crucial for success.

QUESTION 822

Determining the method and the timing of releasing team members should be included in the_____

- A. Staff acquisition plan
- B. Human resource plan
- C. Staffing management plan
- D. Project training plan

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The staffing management plan is a document that describes when and how human resources will become part of the project team and when they will return to their organizational units. It addresses how staff members will be acquired, how long they will remain on the project, how and when they will be released, training needs, and other important aspects of forming and disbanding the team.

QUESTION 823

As project manager, you plan to conduct a "kickoff" meeting at which you will discuss all the following EXCEPT_____

- A. Establishing working relationships and standard formats for global communication

- B. Reviewing project plans
- C. Establishing individual and group responsibilities and accountabilities
- D. Discussing specific legal issues regarding the contract

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Conducted after contract award or approval of the project, the kickoff meeting provides an opportunity for project participants to get to know each other and review information about the project. It is not a forum to discuss detailed project issues.

QUESTION 824

One purpose of the communications management plan is to provide information about the_____

- A. Methods that will be used to convey information
- B. Methods that will be used for releasing team members from the project when they are no longer needed
- C. Project organization and stakeholder responsibility relationships
- D. Experience and skill levels of each team member

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

These methods or technologies can include memos, e-mails, and/or press conferences.

They are one of several items to include in this plan.

QUESTION 825

Project managers for international projects should recognize key issues in cross-cultural settings and place special emphasis on_____

- A. Establishing a performance reporting system
- B. Using good communication planning
- C. Establishing and following a production schedule for information distribution to avoid responding to requests for information between scheduled communications
- D. Using translation services for formal, written project reports

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

An effective way to manage cultural diversity on projects is for the project manager to get to know the team members and to use good communication planning. It is necessary to consider time zones and language barriers as well as cultural differences and to include a glossary of common terminology in the communications management plan.

QUESTION 826

You are managing a project with team members located at customer sites on three different continents. As you plan communications with your stakeholders, you should review_____

- A. Stakeholder management plan
- B. Stakeholder register
- C. Communications model
- D. Communications channels

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The stakeholder register is an input to the plan communications management process. It contains the identified stakeholders including their name, position, location, and role; their main requirements, expectations, and potential influence; and whether or not they are supporters, neutral, or resisters of the project.

QUESTION 827

Having worked previously on projects as a team member, you are pleased to now be the project manager to develop a new process to ensure that software projects in your IT Department are considered a success and are not late or over budget. However, many of your team members are new to the organization. As you work to establish a high-performing team, you realize the importance of_____

- A. Mentoring
- B. Coaching
- C. Moving quickly through the forming and storming stages
- D. Safeguarding information

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Many communications skills are common to both general management and project management. Coaching is one example. It is especially useful to develop the team to higher levels of competency and performance and helping people recognize their potential through empowerment and development. It is used to aid team members to develop or enhance their skills required to achieve project success.

QUESTION 828

As a project manager, you try to use empathic listening skills to help understand another person's frame of reference. In following this approach, you should_____

- A. Mimic the content of the message
- B. Probe, then evaluate the content
- C. Evaluate the content, then advise
- D. Rephrase the content and reflect the feeling

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Empathic listening requires seeing the world the way the other person sees it, with the goal of understanding that person's views and feelings. Unlike sympathetic listening, empathic listening contains no element of value judgment. It is essential to listen actively and effectively and to question and probe ideas to help ensure better understanding.

QUESTION 829

Statements of organizational policies and philosophies, position descriptions, and constraints are examples of_____

- A. Formal communication
- B. Lateral communication
- C. External communication
- D. Horizontal communication

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Formal communication provides direction and control for project team members and other employees. They also contain reports, minutes, and briefings and are examples of organizational process assets used in manage communications and in control communications.

QUESTION 830

You have decided to organize a study group of other project managers in your organization to help prepare for the PMP exam. What type of communication activity are you employing in your efforts to organize this group?

- A. Horizontal
- B. Vertical
- C. Official
- D. External

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Communication activities have many potential dimensions to consider in exchanging information between the sender and the receiver. Horizontal communication occurs between or among peers, that is, across, rather than up and down, the organization.

QUESTION 831

Your company CEO just sent you an e-mail asking you to make a presentation on your project, which has been in progress for 18 months, to over 50 identified internal and external stakeholders. You have been conducting such presentations and holding meetings regularly on this important project. You should begin by_____

- A. Defining the audience
- B. Determining the objective
- C. Deciding on the general form of the presentation
- D. Circulating issues to be discussed

Correct Answer: D

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Meetings are held regularly on projects to update and communicate project information and to respond to requests from stakeholders for the information. Most meetings consist of stakeholders coming together to resolve problems or make decisions. Typical meetings begin with a defined list of issues to be discussed, which are distributed in advance with minutes and other key information relative to the meeting.

QUESTION 832

You are responsible for a project in your organization that has multiple internal customers. Because many people in your organization are interested in this project, you realize the importance of _____

- A. Conducting a stakeholder analysis to assess information needs
- B. Performing communications planning early
- C. Determining the communications requirements of the customers
- D. Having an expert on communications management and customer relationship management on your team

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

On most projects, communications planning should be performed very early such as when the project management plan is prepared. This approach then allows appropriate resources, such as time and budget, to be allocated to communications activities.

QUESTION 833

Project managers spend a great deal of time communicating with the team, the stakeholders, the client, and the sponsor. One can easily see the challenges involved, especially if one team member must communicate a technical concept to another team member in a different country. The first step in this process is to _____

- A. Encode the message
- B. Decode the message
- C. Determine the feedback loops
- D. Determine the medium

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

As the first step in the basic communication model, it is essential to translate thoughts or ideas into a language that is understood by others. Then, the message is sent using various technologies, and the receiver decodes it or translates it back into meaningful thoughts or ideas.

QUESTION 834

On your project, scope changes, constraints, assumptions, integration and interface requirements, and overlapping roles and responsibilities pose communications challenges. The presence of communication barriers is most likely to lead to_____

- A. Reduced productivity
- B. Increased hostility
- C. Low morale
- D. Increased conflict

Correct Answer: D

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Barriers to communication lead to a poor flow of information. Accordingly, messages are misinterpreted by recipients, thereby creating different perceptions, understanding, and frames of reference. Left unchecked, poor communication increases conflict among project stakeholders, which causes the other problems listed to arise. Then, the project manager must work actively to resolve conflicts so disruptive impacts are prevented.

QUESTION 835

The most common communication problem that occurs during negotiation is that_____

- A. Each side may misinterpret what the other side has said
- B. Each side may give up on the other side
- C. One side may try to confuse the other side
- D. One side may be too busy thinking about what to say next to hear what is being said

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Effective communication is the key to successful negotiation. Misunderstanding is the most common communication problem. A project manager should listen actively, acknowledge what is being said, and speak for a purpose. It is essential to listen attentively and communicate articulately.

QUESTION 836

You finally have been appointed project manager for a major company project. One of your first activities as project manager will be to create the communications management plan. As you match the stakeholder with the appropriate communication methods for that stakeholder, you could use any one of the following methods EXCEPT _____

- A. Interactive communications
- B. Passive communications
- C. Pull communications
- D. Push communications

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

You can use several different methods to share information. Interactive communications are multidirectional in nature, such as conferences and meetings. Pull communications are those methods where the recipient finds the information at their leisure and gets the information that they want at their discretion. Push communications is targeted information sent to a select group but does not certify that the recipient actually has received the information, such as e-mail. Passive communications is more of a style of delivering the content or receiving the content.

QUESTION 837

As an output of plan communications, it may be necessary to update the project documents, which include the _____

- A. Stakeholder register
- B. Corporate policies, procedures, and processes
- C. Knowledge management system
- D. Stakeholder management plan

Correct Answer: A

Section: Mix Questions

Explanation/Reference:

Explanation:

In the plan communications management process the two documents that may be updated are the project schedule and the stakeholder register.

QUESTION 838

Sample attributes of a communications management plan include which one of the following?

- A. Roles
- B. Responsibilities
- C. Ethics
- D. Authority

Correct Answer: B

Section: Mix Questions Explanation

Explanation/Reference:

Explanation:

The communications management plan should identify the person responsible for communicating the information and the person responsible for authorizing release of any confidential information.

QUESTION 839

The process of conferring with others to come to terms or reach an agreement is called _____.

- A. Win-win
- B. Negotiation
- C. Getting to "yes"
- D. Confrontation

Correct Answer: B

Section: Mix Questions Explanation

Explanation/Reference:

Explanation:

Negotiation if done well increases the probability of project success and involves conferring with others of shared or opposed interests with a view toward compromise. Negotiating is required to achieve mutually acceptable agreements between parties.

QUESTION 840

The key benefit of the control communications process is to _____.

- A. Sharing best practices with other project teams in the organization with lessons learned
- B. Ensuring the information needs of stakeholders are met
- C. Ensuring an optimal information flow among communication participants
- D. Providing stakeholders with information about resolved issues, approved status, and project status

Correct Answer: B

Section: Mix Questions Explanation

Explanation/Reference:

Explanation:

While control communications as a process monitors and controls communications throughout the project to ensure the communication needs of project stakeholders are met, the key benefit is to ensure an optimal information flow among all communication participants at any moment in time.

QUESTION 841

The issue log is useful in control communications because it_____

- A. Provides what has happened and is a platform for subsequent communications
- B. Includes the project's risk register
- C. Organizes and summarizes information gathered
- D. Serves as an information management system for communications management

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The issue log is an input to control communications and is used to document and monitor issue resolution. It can facilitate communications and ensure a common understanding of issues. In this process its information provides a repository of what already has happened in the project and serves as a platform for subsequent communications to be delivered. PMI®, PMBOK® Guide, 2013, 305

QUESTION 842

As head of the PMO, you will receive performance reports for all major projects. You decided to set a guideline for project managers as performance reporting should_____

- A. Collect work performance information on the status of deliverables
- B. Provide earned value data for project forecasting
- C. Provide information at an appropriate level for each audience

D. Focus on cost and schedule variances rather than scope, resources, quality, and risks

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Performance reporting is a tool and technique in manage communications. Performance reports range from simple status reports to more elaborate reports. The emphasis is to ensure performance reporting provides the needed information for each audience level.

QUESTION 843

A simple performance report provides information on_____

- A. Percent complete
- B. Customer satisfaction
- C. Unacceptable variances
- D. Scope creep

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

A simple status report may show performance information such as percent complete or status information for each area (scope, schedule, cost, and quality).

QUESTION 844

Communication is important when setting and managing expectations with the stakeholders.

Which one of the following statements is NOT true regarding the importance of communications within a project?

- A. Communications is one of the single biggest contributors to project success or failure.
- B. Project resources should be spent primarily on communicating information that leads to project success.
- C. Effective communications includes awareness of communication styles, cultural issues, relationships, personalities, and the context of the situation
- D. Listening is part of communicating and is a way to gain insight into problem areas, managing conflicts, and making decisions.

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Communications is considered one of the single most powerful indicators of project success or failure. Effective communications includes an awareness of all types of filters that may be impeding or straining communications. Listening is vital to good communications. Resources also should be spent on determining where a lack of communications can lead to failure.

QUESTION 845

In person-to-person communication, messages are sent on verbal levels and nonverbal levels simultaneously. As a general rule, what percentage of the message actually is sent through nonverbal cues?

- A. 5 percent to 15 percent
- B. 20 percent to 30 percent
- C. 40 percent to 50 percent
- D. Greater than 50 percent

Correct Answer: D

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Nonverbal cues can be divided into four categories: physical, aesthetic, signs, and symbols. Many studies have demonstrated that most messages are conveyed through such nonverbal cues as facial expression, touch, and body motion, rather than through the words spoken.

QUESTION 846

As an output from control communications, it may be necessary to update the_____

- A. Project schedule
- B. Forecasts
- C. Corporate policies, procedures, and processes
- D. Knowledge management system

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Communications control often entails the need to update project documents, including forecasts, performance reports, and the issue log.

QUESTION 847

In project communications, the first step in a written communication is to _____

- A. Analyze the facts and assumptions that have a bearing on the purpose of the message
- B. Gather thoughts or ideas
- C. Develop a logical sequence of the topics to be addressed
- D. Establish the basic purpose of the message

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

For any type of communication, the first step in the basic communication model is to encode, which means the sender translates thoughts or ideas into language.

QUESTION 848

A communications management plan includes which one of the following sample contents?

- A. Issues
- B. Escalation processes, including time frames and the management chains
- C. Dimensions
- D. Project assumptions and constraints

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Numerous items, including escalation processes, are part of the communications management plan. Business issues may arise that cannot be resolved at a lower staff level. During such a time, an escalation process is required to show time frames and the names of people in the management chain who will work to resolve these issues.

QUESTION 849

Your organization has decided to use project management for all of its endeavors. It has established a Center of Excellence for Project Management to support the movement into management by projects and has appointed you as its director. Since you work in a matrix environment, which of the following types of communications is the most essential for success?

- A. Upward
- B. Horizontal
- C. Downward
- D. Diagonal

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Horizontal communication is between the project manager and his or her peers and will be where most of the communications will occur. Accordingly, it is essential for success in a highly competitive environment and requires diplomacy, experience, and mutual respect.

QUESTION 850

You have heard recently that the client calls your progress reports the "Code of Hammurabi" because they seem to be written in hieroglyphics and are completely indecipherable to all but an antiquities scholar. This situation could have been avoided by_____

- A. Informing the client at the start of the project about the types of reports they will receive
- B. Using risk management techniques to identify client issues
- C. Hiring an expert report writer to prepare standard reports
- D. Engaging in communications planning

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The communications management plan is prepared during plan communications management.

The plan should include a description of the information to be distributed such as format, content, level of detail, as well as conventions and definitions to be used.

QUESTION 851

Assume on your project you have identified 250 stakeholders located in three continents and of these 250, you have determined that 200 of them will be actively involved and interested in your project. Therefore, as you determine an appropriate communication method, your best approach is_____

- A. Elaborate status reports
- B. Simple status reports
- C. Knowledge repositories
- D. E-mails

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Knowledge repositories along with Intranet sites, e-learning, and lessons learned data bases are examples of methods of pull communications. They are used for large volumes of information or for large audiences and require recipients to access communication content at their own discretion.

QUESTION 852

You want to ensure that the information you collect showing project progress and status is meaningful to stakeholders. You want to combine the type and format of the stakeholder's information needs with an analysis of the value of the information. You will document this information in the_____

- A. Communications register
- B. Stakeholder register
- C. Stakeholder management plan
- D. Communications management plan

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The project team must conduct an analysis of stakeholder communications requirements to ensure that stakeholders are receiving the information required to participate in the project. For example, stakeholders typically require performance reports for information purposes. Such information requirements should be included in the communications management plan.

QUESTION 853

Work performance information is an output of which process?

- A. Manage risks
- B. Manage communications
- C. Control communications
- D. Report performance

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Work performance information, an output of control communications, organizes and summarizes performance data such as status and progress information on the project at the level required by stakeholders. This information next is communicated to the appropriate stakeholders.

QUESTION 854

Assume you want to optimize the work performance reports you will use to manage communications. You should do so by_____

- A. Determining the most appropriate choice of communications media
- B. Setting different communications techniques for different stakeholder groups
- C. Ensuring the information is consistent with regulations and standards
- D. Ensuring comprehensiveness, accuracy, and availability

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Work performance reports are an input to manage communications. They are a collection of project performance and status information used to facilitate discussion and create communications. They should be comprehensive, accurate, and available in a timely way.

QUESTION 855

Information received from stakeholders concerning project operations can be distributed and used to modify or improve future performance of the project. This modification or improvement is done as an update to organizational process assets during which following process?

<https://vceplus.com/>

- A. Plan communications management
- B. Distribute information
- C. Manage communications
- D. Report performance

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Feedback from stakeholders is an example of an organizational process asset to update as a result of the manage communications process.

QUESTION 856

General management skills relevant to the manage communications process include_____

- A. Operational planning
- B. Organizational behavior
- C. Setting and managing expectations
- D. Influencing the organization

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

<https://vceplus.com/>

Communications skills are part of general management skills, and setting and managing expectations are an example in manage communications. This helps create, collect, distribute, store, retrieve, and ultimately dispose of project information according to the communications management plan.

QUESTION 857

Changes in the report formats and lessons learned documents process should trigger changes to the_____

- A. Project management plan and performance reporting system
- B. Integrated change control system and the communications management plan
- C. Monitor and control project process and the project management plan
- D. Organizational process assets updates

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Any changes in report formats or lessons learned documentation are organizational process asset updates as an output of control communications. The documentation may become part of the historical data base for both the project and the organization.

QUESTION 858

One way to determine how to best update and communicate project performance and respond to stakeholder information requests is to_____

- A. Review the effectiveness of the communications management plan
- B. Set up a portal
- C. Hold meetings
- D. Distribute performance reports

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Meetings are a tool and technique in control communications. They can be face to face or online and in different locations and may include not only the project team but also suppliers, vendors, and other stakeholders.

QUESTION 859

The purpose of work performance data in control communications is to present results of comparative analysis to the_____

- A. Performance measurement baseline
- B. Communications management plan
- C. Stakeholder management plan
- D. Deliverable status

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Work performance data are an input in control communications. These data organize and summarize information gathered and present the results of comparative analysis to the performance measurement baseline.

QUESTION 860

Because communications planning often is linked tightly with enterprise environmental factors, which one of the following statements is true?

- A. The project's organizational structure has a major effect on the project's communications requirements.
- B. Standardized guidelines, work instructions, and performance measurement criteria are key items to consider.
- C. Procedures for approving and issuing work authorizations should be taken into consideration.
- D. Criteria and guidelines to tailor standard processes to the specific needs of the project should be stated explicitly.

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Enterprise environmental factors undoubtedly will influence the project's success and must be considered because communication must be adapted to the project environment.

QUESTION 861

You are working on a project with 15 stakeholders. The number of communication channels on this project is_____

- A. 15
- B. 105
- C. 210
- D. 225

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The formula for determining the number of communication channels is $n(n - 1)/2$, where n = the number of stakeholders: $15(15 - 1)/2 = (15)(14)/2 = 105$. It is important to note that project managers must plan the project's communications requirements carefully, limiting who will communicate with whom given the potential for confusion when multiple communications channels can exist.

QUESTION 862

Which of the following formulas calculates the number of communication channels in a project?

a. $\frac{n(n - 1)}{2}$

b. $\frac{n^2 - 1}{2}$

c. $\frac{n^2 - 1}{n}$

d. $\frac{2^n - 2}{1^n}$

A. Option a

B. Option b

C. Option c

D. Option d

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Where n = the number of stakeholders.

QUESTION 863

As the project manager, you have the option of proposing one of three systems to a client: a full-feature system that not only satisfies the minimum requirements but also offers numerous special functions (the "Mercedes"); a system that meets the client's minimum requirements (the "Yugo"); and a system that satisfies the minimum requirements plus has a few extra features (the "Toyota"). The on-time records and associated profits and losses are depicted on the below decision tree. What is the expected monetary value of the "Toyota" system?

- A. \$9,900
- B. \$44,000

- C. \$45,000
- D. \$48,000

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

$$\begin{aligned}\text{EMV VToyota} &= (\$50,000 \times 90\%) + (\$10,000 \times 0\%) \\ &= \$45,000 + (-\$1,000) = \\ & \$44,000\end{aligned}$$

QUESTION 864

A risk response strategy that can be used for both threats and opportunities is _____

- A. Share
- B. Avoid
- C. Accept
- D. Transfer

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Risk exists on every project, and it is unrealistic to think it can be eliminated completely. There are certain risks that simply must be accepted because we cannot control whether or not they will occur (for example, an earthquake). Acceptance is a strategy for dealing with risk that can be used for both threats and opportunities.

QUESTION 865

The risk urgency assessment is a tool and technique used for _____

- A. Plan risk responses
- B. Identify risks
- C. Perform qualitative risk analysis
- D. Perform quantitative risk analysis

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Risks that may happen in the near-term need urgent attention. The purpose of the risk urgency assessment is to identify those risks that have a high likelihood of happening sooner rather than later. It is combined with the risk ranking to give a final risk severity ranking.

QUESTION 866

Projects are particularly susceptible to risk because_____

- A. Murphy's law states that "if something can go wrong, it will"
- B. There is uncertainty in all projects
- C. Project management tools are generally unavailable at the project team level
- D. There are never enough resources to do the job

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Every project has uncertainty associated with it because a project by its definition is a temporary endeavor undertaken to create a unique product, service, or result. Risks may be known or unknown.

QUESTION 867

As project manager, you have assembled the team to prepare a comprehensive list of project risks. Which one of the following documents would be the most helpful in this process?

- A. OBS
- B. WBS
- C. RBS
- D. CBS

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The risk breakdown structure (RBS) helps to provide framework for ensuring a comprehensive process of systematically identified risks. It is a hierarchically organized depiction of the identified risks by risk categories.

QUESTION 868

You are working on identifying possible risks to your project to develop a nutritional supplement. You want to develop a comprehensive list of risks that can be addressed later through qualitative and quantitative risk analysis. An information gathering technique used to identify risks is_____

- A. Documentation reviews
- B. Probability and impact analysis
- C. Checklist analysis
- D. Brainstorming

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Brainstorming is a frequently used information-gathering technique for identifying risk, because it enables the project team to develop a list of potential risks relatively quickly. Project team members, or invited experts, participate in the session. Risks are easily categorized for follow-on analysis.

QUESTION 869

The Delphi technique is a particularly useful method for identifying risks to_____

- A. Present a sequence of decision choices graphically to decision makers
- B. Define the probability of occurrence of specific variables
- C. Reduce bias in the analysis and keep any one person from having undue influence on the outcome
- D. Help take into account the attitude of the decision maker toward risk

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The Delphi technique provides a means for arriving at a consensus using a panel of experts to determine a solution to a specific problem. Project risk experts are identified but participate anonymously. Each panelist answers a questionnaire. Then the responses, along with opinions and justifications, are evaluated, and statistical feedback is given to each panel member. The process continues until group responses converge toward a solution.

QUESTION 870

A workaround is _____

- A. An unplanned response to a negative risk event
- B. A plan of action to follow when something unexpected occurs
- C. A specific response to certain types of risk as described in the risk management plan
- D. A proactive, planned method of responding to risks

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Used in control risks, a workaround is a response to a threat that has occurred for which a prior response had not been planned or was not effective.

QUESTION 871

Most statistical simulations of budgets, schedules, and resource allocations use which one of the following approaches?

- A. PERT
- B. Decision-tree analysis
- C. Present value analysis
- D. Monte Carlo analysis

Correct Answer: D

Section: Mix Questions

Explanation

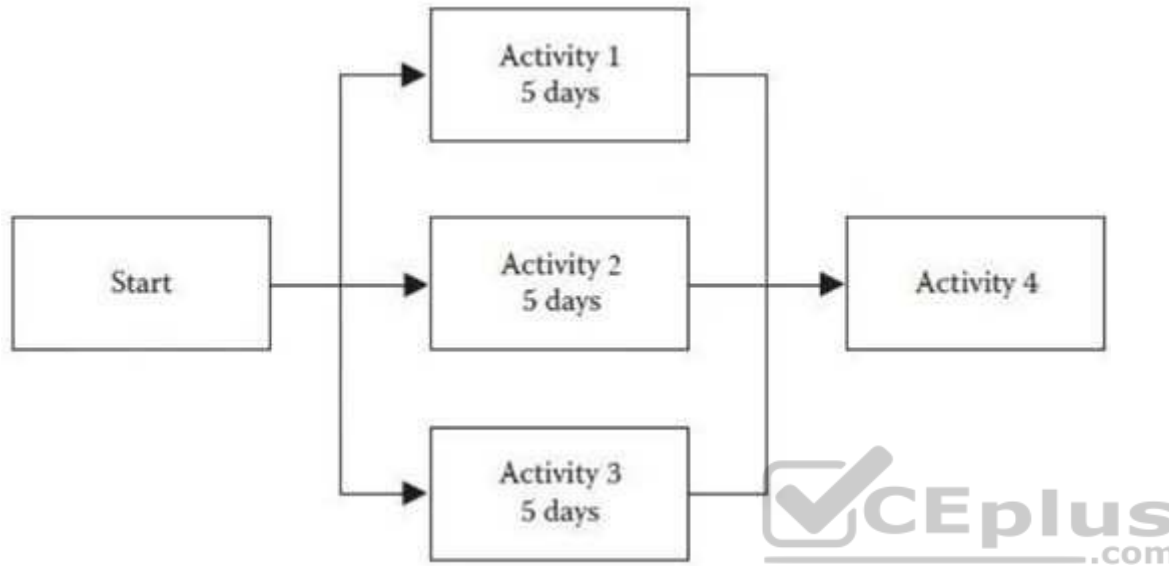

Explanation/Reference:

Explanation:

Simulations are typically performed using Monte Carlo in which a project model is computed many times with the input values chosen at random for each iteration from the probability distribution of these variables. Monte Carlo analysis supports various statistical distributions (normal, triangular, beta, uniform, etc.) used in estimating budgets, schedules, and resource allocations.

QUESTION 872

In the below path convergence example, if the odds of completing activities 1, 2, and 3 on time are 50 percent, 50 percent, and 50 percent, what are the chances of starting activity 4 on day 6?

- A. 10 percent
- B. 13 percent
- C. 40 percent
- D. 50 percent

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Probability (starting activity 4 on day 6) = $(0.5)^3$
= 0.125 or 13%

QUESTION 873

A project health check identified a risk that your project would not be completed on time. As a result, you are quantifying the project's risk exposure and determining what cost and schedule contingency reserves might be needed. You performed a schedule risk analysis using Monte Carlo analysis. The basis for your schedule risk analysis is the_____

- A. WBS
- B. Gantt chart
- C. Schedule network diagram and duration estimates
- D. Probability/impact risk rating matrix

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

When determining the likelihood of meeting the project's schedule end date through Monte Carlo, the schedule network diagram and duration estimate are used as inputs to the simulation program. Cost risk, on the other hand, uses cost estimates from the WBS.

QUESTION 874

You are developing radio frequency (RF) technology that will improve overnight package delivery. You ask each stakeholder to estimate the most optimistic package delivery time using the RF technology, the most pessimistic time, and the most likely time. This shows that for your next step you plan to_____

- A. Use a beta or triangular probability distribution
- B. Conduct a sensitivity analysis
- C. Structure a decision analysis as a decision tree
- D. Determine the strategy for risk response

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Interviews often are used to help quantify the probability and consequences of risks on project objectives. The type of information collected during the interview depends on the type of probability distribution that is used. A beta or triangular distribution is used widely when information is gathered on the optimistic (low), pessimistic (high), and most likely scenarios.

QUESTION 875

Each one of the following statements about risk avoidance is true EXCEPT that it_____

- A. Focuses on changing the project management plan to eliminate entirely the threat
- B. Isolates the project's objectives from the risk's impact
- C. Accepts the consequences of the risk event should it occur
- D. Changes the project objective that is in jeopardy

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Accepting the consequences of the risk event is categorized as risk acceptance. With this risk response approach, the project team takes no action to reduce the probability of the risk's occurring.

QUESTION 876

If the probability of event 1 is 80 percent and of event 2 is 70 percent and they are independent events, how likely is it that both events will occur?

- A. 6 percent
- B. 15 percent
- C. 24 percent
- D. 56 percent

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The likelihood is determined by multiplying the probability of event 1 by the probability of event 2.

QUESTION 877

The project scope statement should be used in the identify risk process because it_____

- A. Identifies project assumptions
- B. Identifies all the work that must be done and, therefore, includes all the risks on the project

- C. Helps to organize all the work that must be done on the project
- D. Contains information on risks from prior projects

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Project assumptions, which should be enumerated in the project scope statement, are areas of uncertainty, and as such are potential causes of project risk. The scope statement and the WBS are part of the scope baseline, an input to identify risks.

QUESTION 878

Your project team has identified all the risks on the project and has categorized them as high, medium, and low. The "low" risks are placed on which one of the following for monitoring?

- A. Threat list
- B. Low risk list
- C. Watch list
- D. Low impact list

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Even low-priority risks must be monitored. A watch list is used to ensure such risks are tracked for continued monitoring.

QUESTION 879

A general contingency is used for _____

- A. Risks that are identified at the outset of the project
- B. Risks that are not identified at the outset of the project but are known before they occur
- C. Risks that cannot be known before they occur because they are external risks
- D. Any risks that cannot be known before they occur

Correct Answer: D

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

There is a category of risks that is sometimes called unknown-unknowns, meaning that the risk is not knowable and, therefore, the probability of the risk is also not knowable. Your lead technical advisor becoming seriously ill, your offices being ransacked by persons engaged in industrial espionage, or one of your subcontractors winning the lottery and running off to the Cayman Islands are all examples of risks that are not known before they occur. However, such risks must be expected and a general contingency can be set aside to address the impact they leave in their wake.

QUESTION 880

The simplest form of quantitative risk analysis and modeling techniques is _____

- A. Probability analysis
- B. Sensitivity analysis
- C. Delphi technique
- D. Utility theory

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Sensitivity analysis, as a quantitative risk analysis and modeling technique, helps to determine the risks that have the most potential impact on the project. It examines the extent to which the uncertainty of each project element affects the objective being examined when all other uncertain elements are held at their baseline values.

QUESTION 881

If a business venture has a 60-percent chance to earn \$2 million and a 20-percent chance to lose \$1.5 million, what is the expected monetary value of the venture?

- A. -\$50,000
- B. \$300,000
- C. \$500,000
- D. \$900,000

Correct Answer: D

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

$$\text{EMV} = (\$2\text{M} \times 60\%) + (-\$1.5\text{M} \times 20\%) = (\$1.2\text{M}) + (-\$300,000) = \$900,000$$

QUESTION 882

You are managing the construction of a highly sophisticated data center in Port Moresby, Papua, New Guinea. Although this location offers significant economic advantages, the threat of typhoons has caused you to create a backup plan to operate in Manila in case the center is flooded. This plan is an example of what type of risk response?

- A. Passive avoidance
- B. Mitigation
- C. Active acceptance
- D. Deflection

Correct Answer: C

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Active acceptance means not only accepting the consequences of a risk, but also establishing a plan for dealing with the risk, should it occur. Organizations typically establish a contingency plan funded by a contingency reserve (of time, money, or resources) to handle known, or even sometimes potential unknown, threats or opportunities.

PMI®, PMBOK® Guide, 2013, 345

QUESTION 883

A recent earned value analysis shows that your project is 20 percent complete, the CPI is 0.67, and the SPI is 0.87. In this situation, you should_____

- A. Perform additional resource planning, add resources, and use overtime as needed to accomplish the same amount of budgeted work
- B. Rebaseline the schedule, then use Monte Carlo analysis
- C. Conduct a risk response audit to help control risk
- D. Forecast potential deviation of the project at completion from cost and schedule targets

Correct Answer: D

Section: Mix Questions**Explanation****Explanation/Reference:**

Explanation:

Earned value is used for monitoring overall project performance against a baseline plan. It is a part of variance analysis, a tool and technique in control risks.

QUESTION 884

The purpose of a numeric scale in risk management is to_____

- A. Avoid high-impact risks
- B. Assign a relative value to the impact on project objectives if the risk in question occurs
- C. Rank order risks in terms of very low, low, moderate, high, and very high
- D. Test project assumptions

Correct Answer: B

Section: Mix Questions**Explanation****Explanation/Reference:**

Explanation:

You can develop relative or numeric, well-defined scales using agreed-upon definitions by the stakeholders. When using a numeric scale, each level of impact has a specific number assigned to it.

QUESTION 885

Risk score measures the_____

- A. Variability of the estimate
- B. Product of the probability and impact of the risk
- C. Range of schedule and cost outcomes
- D. Reduced monetary value of the risk event

Correct Answer: B

Section: Mix Questions**Explanation****Explanation/Reference:**

Explanation:

The risk score provides a convenient way to compare risks because comparing impacts or probabilities alone is meaningless. It helps guide risk responses.

QUESTION 886

Which of the following is an example of recommended corrective action in risk management?

- A. Conducting a risk audit
- B. Engaging in additional risk response planning
- C. Performing the contingency plan
- D. Conducting a risk review

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Corrective action in risk management is the process of making changes to bring expected performance in line with the risk management plan. Such action consists of performing either the planned risk response, such as implementing contingency plans, or a workaround.

QUESTION 887

The primary advantage of using decision-tree analysis in project risk management is that it _____

- A. Considers the attitude of the decision maker toward risk
- B. Forces consideration of the probability of each outcome
- C. Helps to identify and postulate risk scenarios for the project
- D. Shows how risks can occur in combination

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

As a graphical way to bring together information, decision-tree analysis quantifies the likelihood of failure and places a value on each decision. Usually applied to cost and time considerations, this form of risk analysis may be linked to a sensitivity analysis.

QUESTION 888

Your project is using complex, unproven technology. Your team conducted a brainstorming session to identify risks. Poor allocation of project resources was the number one risk. This risk was placed on the risk register, which included at this point a _____

- A. Watch list
- B. Potential risk response
- C. Known unknown
- D. List of other risks requiring additional analysis

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The risk register is prepared first in the identify risks process. It contains a list of identified risks in as much detail as possible and a list of potential responses when they are identifiable at this time.

QUESTION 889

When managing current projects, it is important to use lessons learned from previous projects to improve the organization's project management process. Therefore, in project closing procedures, it is important to review the_____

- A. Secondary risks that occurred
- B. Checklists for identify risks
- C. WBS dictionary
- D. Fallback plan

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Checklists are a tool and a technique of the identify risks process and include risks encountered on similar, previous projects identified through the lessons learned process and from other sources. The project team should review the checklist as part of the identify risks process as well as during closeout. The team should add to the list as necessary, based on its experience, to help others in the future.

QUESTION 890

Risk mitigation involves_____

- A. Using performance and payment bonds

- B. Eliminating a specific threat by eliminating the cause
- C. Avoiding the schedule risk inherent in the project
- D. Reducing the probability and/or impact of an adverse risk event to an acceptable threshold

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

It is often more effective to take early action to reduce probability and/or impact of a risk occurring on a project than attempting to repair the damage after the risk has occurred.

QUESTION 891

On a typical project, when are risks highest and impacts (amount at stake) lowest?

- A. During the concept phase
- B. At or near completion of the project
- C. During the implementation phase
- D. When the project manager is replaced

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Risks are highest at the beginning of a project because the project faces an uncertain future, and impacts are lowest at this time because investments in human and material resources are minimal.

QUESTION 892

Two key inputs to the perform quantitative risk analysis process are the_____

- A. WBS and milestone list
- B. Scope management plan and process improvement plan
- C. Schedule management plan and cost management plan
- D. Procurement management plan and quality baseline

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The cost and schedule of a project are two areas significantly affected by risk occurrences. Information on these two areas, because of their quantitative nature, provides excellent input to the perform quantification risk process to help determine overall impact and to provide guidelines as managing risk reserves.

QUESTION 893

The highest risk impact generally occurs during which one of the following project life-cycle phases?

- A. Concept and planning
- B. Planning and implementation
- C. Implementation and closeout
- D. Concept and closeout

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Opportunity and risk generally remain high during the concept and planning phases. However, the amount at stake remains low because of the relatively low level of investment up to that point. During project implementation and closeout, however, risk falls to lower levels as remaining unknowns are translated into knowns. At the same time, the amount at stake rises steadily as the necessary resources are invested to complete the project.

QUESTION 894

Which one of the following statements best characterizes an activity cost or duration estimate developed with a limited amount of information?

- A. It should be part of the planning for the needed management reserve.
- B. It is an input to identify risks.
- C. It is an output from identify risks.
- D. It must be factored into the list of prioritized project risks.

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Much of the output from planning in other knowledge areas, such as activity cost and duration estimates, may entail risk and is reviewed during the identify risks process. This process requires an understanding of the schedule, cost, and quality management plans found in the project management plan. Estimates that are aggressive or developed with a limited amount of information are even more likely to entail risk and, therefore, must also be an input to the identify risks process.

QUESTION 895

Motivation is dynamic and complex. The statement, "Motivation is an intrinsic phenomenon. Extrinsic satisfaction only leads to movements, not motivation" is attributed to which of the leading theories of motivation?

- A. Maslow's Hierarchy of Needs Theory
- B. Herzberg's Motivator-Hygiene Theory
- C. Morse and Lorsch's Contingency Theory
- D. McGregor's Theory X/Theory Y

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Frederick Herzberg's Motivator-Hygiene Theory asserts that some job factors lead to satisfaction, whereas others can only prevent dissatisfaction. There are two types of factors associated to the motivation process: hygiene factors, which relate to the work environment, and motivators, which relate to the work itself. Hygiene factors, if provided appropriately, can prevent dissatisfaction, while motivating factors can increase job satisfaction and are more permanent.

QUESTION 896

Each time you meet with your project sponsor, she emphasizes the need for cost control. To address her concerns, you should provide_____

- A. Work performance information
- B. Cost baseline updates
- C. Resource productivity analyses
- D. Trend analysis statistics

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The project's work performance information should document and communicate the CV, SV, CPI, SPI, TCPI, and VAC for the WBS components in particular for specific work packages and control accounts.

QUESTION 897

One output of the control costs process is cost forecasts, which is when _____

- A. Modifications are made to the cost information used to manage the project and are communicated to stakeholders
- B. Trend analyses are performed and communicated to stakeholders
- C. A budget update is required and communicated to all stakeholders
- D. A calculated EAC value or a bottom-up EAC value is documented and communicated to stakeholders

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Cost forecasts are another output of control costs, and the EAC is used to show the expected total costs of completing all work expressed as the sum of the actual cost to date and the estimate to complete.

QUESTION 898

You work for an electrical utility company and will be managing a project to build a new substation that will serve a new industrial park. This project was authorized because of a _____

- A. Business need
- B. Market demand
- C. Technological advance
- D. Customer request

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Projects can be authorized as a result of a market demand, organizational need, customer request, technological advance, legal requirement, ecological impact, or a social need. The new industrial park is an example of a project authorized because of a customer request.

QUESTION 899

A final project report is a recommended best practice. Although this report can be organized in a variety of ways, how should each item that is covered in the report be addressed?

- A. A recommendation for changing current practice should be made and defended.
- B. The focus should be solely on items that did not work well on the project.
- C. Individuals who did not contribute successfully as team members should be noted.
- D. An earned value discussion is warranted.

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

It is important to capture lessons learned, which then can be used on subsequent projects. The more detailed the lessons the better. However, when it comes to personnel lessons learned, the information should be handled in a confidential manner.

QUESTION 900

At the time the risk register is first prepared, it should contain all the following entries EXCEPT _____

- A. Root causes of risk
- B. Structure for describing risks
- C. List of risks requiring near-term responses
- D. List of potential responses

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The primary outputs from identify risks are initial entries into the risk register. It ultimately contains outcomes of other risk management processes as they are conducted. As an output of identify risks, the risk register should contain a list of identified risks, a list of potential responses, root causes that gave rise to the identified risks, and a structure for describing risks.

QUESTION 901

Which of the following theorists stated that people generally are motivated according to the strength of their desire either to achieve high levels of performance or to exceed in competitive situations?

- A. David McGregor
- B. David McClelland
- C. Victor Vroom D. B. F. Skinner

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

According to David McClelland, there are three relevant motives or needs in work situations: the need for achievement, power, and affiliation or association. This theory supports the view that there is a high correlation between achievement, affiliation, and power motives and the overall motivation and performance achieved in a project.

QUESTION 902

Your project is considered very risky. You plan to perform numerous what-if scenarios on your schedule using simulation software that will define each schedule activity and calculate a range of possible durations for each activity. The simulation then will use the collected data from each activity to calculate a distribution curve (or range) for the possible outcomes of the total project.

Your planned approach is an example of which following technique?

- A. PERT
- B. Monte Carlo analysis
- C. Linear programming
- D. Concurrent engineering

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Simulation is a tool and technique for the develop schedule process by which multiple project durations with different sets of activity assumptions are calculated. Monte Carlo analysis is the most commonly used simulation technique.

QUESTION 903

Project execution must be compared, and deviations must be measured for management control according to the_____

- A. Scope baseline
- B. Performance measurement baseline
- C. Schedule baseline
- D. Control system

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The PMB is an approved, integrated scope-schedule-cost plan for the project work against which project execution is compared in order to measure and manage performance. It includes contingency reserve but not management reserve. It typically integrates scope, schedule, and cost parameters of the project, but it may also include technical and quality parameters.

QUESTION 904

A number of items may be part of the schedule data for the project. The amount of additional detail will vary, but the data should include all the following items EXCEPT_____

- A. Schedule activities
- B. Activity attributes
- C. Identified assumptions
- D. Resource breakdown structure

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Schedule data for the project schedule includes a number of items as it collects the information used to describe and control the schedule. It includes schedule milestones, schedule activities, activity attributes, and assumptions and constraints. It may include resource histograms, alternate schedules, contingency reserves cash-flow projections, and order and delivery schedules.

QUESTION 905

If a team member, when facing schedule delays and cost overruns, develops several alternatives for completing the project successfully on schedule and within budget and asks questions such as, "Can we do it?," "If we do it what are the consequences?," and "Is it really worth the effort involved?," he or she is primarily motivated by the_____

- A. Contingency Theory
- B. Expectancy Theory
- C. Reinforcement Theory
- D. Equity Theory

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Developed by Victor Vroom, Expectancy Theory asserts that people think seriously about how much effort they should put into a task before doing it. Motivation is linked to an expectation of a favorable outcome. It is based on the concept that people choose behaviors that they believe will lead to desired rewards and outcomes.

QUESTION 906

Which tool or technique is NOT used for schedule control?

- A. Performance reviews
- B. Project management software
- C. Work performance information
- D. Leads and lags

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Work performance data is an input to control schedule.

QUESTION 907

All the following are examples of project document updates from the manage project team process EXCEPT_____

- A. Issue log
- B. Roles description
- C. Project staff assignments
- D. Personnel skills

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Personnel skill updates are an example of an enterprise environmental factor that may require updates as a result of the manage project team process along with inputs to the organizational performance appraisals.

QUESTION 908

Recording and reporting information regarding when appropriate configuration information should be provided and regarding the status of proposed and approved changes effectively is done through_____

- A. Configuration status accounting
- B. Configuration verification and audit
- C. Project management methodology
- D. A project management information system (PMIS)

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Configuration status accounting captures, stores, and accesses the needed configuration information to manage products and product information effectively.

QUESTION 909

Decomposition is a technique used to break larger, complex items into smaller and more manageable items. Which following statement best describes the role decomposition plays in creating the WBS?

- A. Final output of creating the WBS is described in terms of phases of a project life cycle.
- B. Final output of creating the WBS is described in terms of schedule activities.
- C. Final output of creating the WBS is described in terms of verifiable products, services, or results.

D. Final output of creating the WBS is described in terms of the scope of the project.

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

By using decomposition, the upper-level WBS components are subdivided for the work for each of the deliverables or subcomponents into its most fundamental elements, where the WBS components then represent verifiable products, service, or results.

QUESTION 910

The schedule management plan is a key document. It is_____

- A. An output of the develop schedule process
- B. A tool and technique used in the develop schedule process
- C. The first time management process
- D. A separate planning effort completed in conjunction with the time management processes

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The schedule management plan is the output of plan schedule management, the first of the seven time management processes. It is a subsidiary plan to the project management plan.

QUESTION 911

Activity attributes are used to extend the description of the activity and to identify its multiple components. In the early stages of the project, an example of an activity attribute is_____

- A. Activity codes
- B. Activity description
- C. Predecessor and successor activities
- D. Activity name

Correct Answer: D

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

The components for each activity evolve over time. In the initial stages of the project, they include the activity ID, WBS ID, and the activity name. Later, additional information is added as other time management processes are performed.

QUESTION 912

You are working on a new project in your city to construct an environmentally friendly landfill. The existing site is so undesirable that many residents have moved to other neighboring cities because of their proximity to it. However, even though the project has the support of the public, you need to have a number of hearings of the city's government before you are authorized to begin work. As you are in the planning phase of the project, you are waiting for these hearings to be scheduled and held before you can begin site preparation. These hearings are an example of_____

- A. A milestone
- B. An external dependency
- C. An item to be scheduled as a fragnet
- D. A mandatory dependency

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Some dependencies are external ones, and they involve a relationship between project activities and non project activities. In sequencing activities, the project management team must determine which dependencies are external as they are usually outside of the team's control.

QUESTION 913

You are working on a project and want to know how many activities in the previous month were completed with significant variances. You should use a(n)

- A. Control chart
- B. Inspection
- C. Scatter diagram
- D. Trend analysis

Correct Answer: D

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Trend analysis is used in many control processes in project management. The trend analysis examines the performance of the project over time to determine whether performance is improving or deteriorating. Graphical analysis techniques are valuable in trend analysis to understand performance to date and to compare it to future performance goals in the form of completion dates.

QUESTION 914

Your project has a budget of \$1.5 million for the first year, \$3 million for the second year, \$2.2 million for the third year, and \$800,000 for the fourth year. Most of the project budget will be spent during_____

- A. Starting the project
- B. Organizing and preparing
- C. Carrying out the work
- D. Closing the project

Correct Answer: C

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

The implementation phase (carrying out the work) is when all interfaces affecting the project must be coordinated and when the product or service of the project is created. In most projects, this phase is also where a large portion of the project budget is spent.

QUESTION 915

If you decide to follow an open subordination approach to resolving conflict, you are using which style of conflict resolution?

- A. Avoiding
- B. Accommodating
- C. Compromising
- D. Collaborating

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Open subordination is much like an accommodating or smoothing style of conflict management in which negotiators are more concerned about positive relationships than about substantive outcomes. It can dampen hostility, increase support and cooperation, and foster more interdependent relationships. This is an effective style for project managers to use with support staff. It concedes one's position to the needs of others to maintain harmony and relationships.

QUESTION 916

Typically, the seller receives formal written notice that the contract has been completed by the_____

- A. Project manager
- B. Authorized procurement administrator
- C. Member of the project management team responsible for daily contract administration
- D. Purchasing department head

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The buyer, through its authorized procurement administrator, is responsible for providing the seller with formal written notice of contract completion. The procurement administrator does so when the seller has met all contractual requirements as articulated in the contract. PMI®,

QUESTION 917

Working in the control procurements process since your project is using five contractors, you need to update a number of organizational process assets. An example is_____

- A. Procurement management plan
- B. Procurement documentation
- C. Correspondence
- D. Warranties

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Contract terms and conditions often require written documentation of certain aspects of buyer/seller communications. Examples include any warnings of unsatisfactory performance and requests for changes in the contract or clarification. Other organizational process assets to update include payment schedules and requests and seller performance evaluation documentation.

QUESTION 918

You are beginning a new project staffed with a virtual team located across five different countries. To help limit conflict and misunderstandings concerning the justification, objectives, and high-level requirements of the project among your team members and their functional managers, you ask the project sponsor to prepare a_____

- A. Memo to team members informing them that they work for you now
- B. Project charter
- C. Memo to functional managers informing them that you have authority to direct their employees
- D. Human resource management plan

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Although the project charter cannot stop conflicts from arising, it can provide a framework to help resolve them, because it describes the project manager's authority to apply organizational resources to project activities. The project charter also documents the business needs, justification, objectives, and high-level requirements of the project.

QUESTION 919

To anticipate and help develop approaches to deal with potential quality problems on your project, you want to use a variety of root-cause analysis techniques including all the following approaches EXCEPT_____

- A. Fishbone diagrams
- B. Ishikawa diagrams
- C. System or process flowcharts
- D. Checklists

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Checklists are used to verify that the work of the project and its deliverables fulfill a set of requirements.

QUESTION 920

All of the following are examples of ways to generate options for mutual gain during negotiations EXCEPT_____

- A. Separating inventing from deciding
- B. Options broadening
- C. Zero-sum game analysis
- D. Multiplying options by shuttling between the specific and the general

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Achieving mutual gain during negotiations means that each party benefits by the decisions made. A zero-sum game is where one side wins at the expense of the other.

QUESTION 921

Recently, your company introduced a new processing system for its products. You were the project manager for this system and now have been asked to lead a team to implement needed changes to increase efficiency and productivity. To help you analyze the process outputs, you and your team have decided to use which following technique?

- A. System flowcharts
- B. Design of experiments
- C. Pareto analysis
- D. Control charts

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Control charts help to determine whether or not a process is stable or has predictable performance. This function of control charts is achieved through the graphical display of results over time to determine whether differences in the results are created by random variations or are unusual events. In a manufacturing environment, such charts are used to track repetitive actions such as manufactured lots. In a project management environment, they can be used to monitor processes such as cost and schedule variances, number requirements, and errors in project documents.

QUESTION 922

Effective leadership is one key to successful project management. There are several theories of leadership. One model is Hershey and Blanchard's situational leadership model that describes directive behavior and supportive behavior. Of the following, which one is NOT a key word for supportive behavior?

- A. Listen
- B. Structure
- C. Praise
- D. Facilitate

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Supportive behavior is relationship oriented and is the extent to which the leader engages in two-way communication, listens, provides support and encouragement, facilitates interaction, and involves the followers in decision making. Structure connotes a certain level of rigidity and inflexibility and is not a term associated with supportive behavior.

QUESTION 923

Based on quality control measurements on your manufacturing project, management realizes that immediate corrective action is required to the material requirements planning (MRP) system to minimize rework. To implement the necessary changes you should follow_____

- A. The organization's quality policy
- B. The quality management plan
- C. Established operational definitions and procedures
- D. A defined integrated change control process

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

If the recommended corrective or preventive actions or a defect repair require a change to any of the project management plans, a change request should be prepared in conformance with the perform integrated change control process.

QUESTION 924

You are the project manager on a project to improve traffic flow in the company's parking garage. You decide to use flowcharting to_____

- A. Help anticipate how problems occur
- B. Show dependencies between tasks
- C. Show the results of a process
- D. Forecast future outcomes

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Flowcharts depict the interrelationship of a system's components and show the relationships among process steps. They are often referred to as process maps as they display the sequence of steps and the branching possibilities for a process that transforms one or more inputs into one or more outputs. Flowcharts show activities, decision points, branching loops, parallel paths, and the order of processing. As such, they aid the team in anticipating where quality problems might occur, which helps in developing approaches for dealing with these potential problems.

QUESTION 925

Successful project management involves both project leadership as well as project management skills. Several different leadership styles are appropriate in different phases of the project life cycle. Assume that you are working on a project, and it is in the execution phase. The leadership style that is most appropriate should consist of a blend of all but which one of the following?

- A. Change master
- B. Decision maker
- C. Team and synergy
- D. Trustworthiness

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

During the execution stage, the major attributes and emphasis is on realignment. The leadership style/blend that is most appropriate is one who is a decision maker, balances work and fun, is trustworthy, and promotes the team concept and synergy.

QUESTION 926

Schedule control is one important way to avoid delays. While planning and executing schedule recovery, one tool available to you for control schedules is_____

- A. Changing the schedule management plan
- B. Immediately rebase lining
- C. Adjusting leads and lags
- D. Changing all project and resource calendars

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Corrective action is anything that brings expected future schedule performance in line with the project plan. Adjusting leads and lags is one of many tools available to identify the cause of variation.

QUESTION 927

You have been the project manager for your nuclear submarine project for four years. While you did not assume this position until the project management plan had been prepared and approved, you find you spend a significant amount of time collecting data and communicating. You also spend time reviewing the impact of project changes and implementing ones that have been approved. Often you have had to modify a non-conforming product, which means you are spending time on_____

- A. Corrective actions
- B. Updating the project's requirements
- C. Updating the traceability matrix
- D. Defect repair

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Defect repair is an intentional activity to modify a nonconforming product or project component.

QUESTION 928

You were assigned recently as the project manager of a program management office project to implement a new enterprise-wide scheduling system for use throughout your company. You identify the need for a project charter to provide you with appropriate authority for applying resources, completing the project work, and formally initiating the project. Who should issue the project charter?

- A. The project manager you
- B. The customer
- C. The person who formally authorizes the project
- D. A member of the training and development department as they will own the training on the new system

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The charter is issued by the project initiator or sponsor who formally authorizes the existence of a project and provides the project manager with the authority to apply organizational resources to project activities.

QUESTION 929

In which of the following methods of resolving conflict will the conflict typically reappear again in another form?

- A. Smoothing
- B. Compromising
- C. Collaborating
- D. Confronting

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Smoothing emphasizes areas of agreement while avoiding points of disagreement. It tends to keep peace only in the short term.

QUESTION 930

Statistical sampling is a method to perform quality control to determine the conformance to requirements for some component or product of a project. Its greatest advantage is that it_____

- A. Does not require a large expenditure of resources
- B. Is accurate enough with a sampling of less than 1%
- C. Does not require 100% inspection of the components to achieve a satisfactory inference of the population
- D. Needs to be conducted only when a problem is discovered with the end product or when the customer has some rejects

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The application of the statistical concept of probability has proven, over many years in many applications, that an entire population of products need not be inspected, if the sample selected conforms to a normal distribution of possible outcomes (the "bell" curve). Sample frequency and sizes should be determined as the quality management plan is prepared in order that the cost of quality includes the number of tests and expected scrap.

QUESTION 931

Your project sponsor wants to know whether process variables are within acceptable limits. To answer this question, you should_____

- A. Conduct a process analysis
- B. Conduct a root cause analysis
- C. Use a control chart
- D. Use a run chart

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

A control chart is one of the seven basic tools of quality control that determines whether or not a process is stable or has predictable performance. It also illustrates how a process behaves over time. When a process is within acceptable limits, it need not be adjusted; when it is outside acceptable limits, an analysis should be conducted to determine the reasons why.

QUESTION 932

All the following statements are true about the grassroots estimate, EXCEPT _____

- A. Its accuracy rate is from -5% to +10%
- B. It is also called an engineering estimate
- C. It is used primarily for Level 1 of the WBS
- D. It may take months to prepare

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Estimates are categorized according to accuracy and the time to prepare them. Grassroots or engineering-type estimates are definite estimates and are prepared when detailed information about the project is available. These estimates would use the work-package level of the WBS.

QUESTION 933

You are planning a project and want to account for how the project will be managed in the future. While building your cost performance data, you want to provide guidance for when the project is later executed, because you know that different responses are required depending upon the degree of variance from the baseline. For example, a variance of 10 percent might not require immediate action, whereas a variance of 20 percent will require more immediate action and investigation. You decide to include the details of how to manage the cost variances as part of which following plan?

- A. Cost management plan
- B. Change management plan
- C. Performance measurement plan
- D. Variance management plan

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The management and control of costs focuses on variances. Certain variances are acceptable, and others, usually those falling outside a particular range, are unacceptable. The actions taken by the project manager for all variances are described in the cost management plan.

QUESTION 934

Assume that you are managing a project team. Your team is one in which its members confront issues rather than people, establish procedures collectively, and is team oriented. As the project manager, which of the following represents your team's stage of development and the approach you should use during this time?

- A. Storming; high directive and supportive approach
- B. Norming; high directive and low supportive approach
- C. Norming; high supportive and low directive approach
- D. Performing; low directive and supportive approach

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

There are four stages of team development: forming, storming, norming, and performing. Different leadership styles in terms of the amount of required supportive and directive behavior are appropriate when a team is in a certain development stage. At the norming stage, the third stage in team development, leaders provide high support and low direction. Verma 1996, 227

QUESTION 935

You are finalizing all the contracts and ensuring that they are closed. The close procurements process involves all the following administrative actions EXCEPT _____

- A. The procurement administrator is reassigned
- B. Finalizing open claims
- C. Updating the project records to show the final contract results
- D. Archiving the contracts and contract records for future use

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The close procurements process looks at the administration of the contract and not the people responsible or involved with the contract.

QUESTION 936

You are working on a project and want to identify the cause of problems in a process by the shape and width of the distribution of the process variables. You should use a _____

- A. Histogram
- B. Pareto chart
- C. Scatter diagram
- D. Trend analysis

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

In a histogram, or a special form of bar chart, each column represents an attribute or characteristic of a problem or situation. The height of each column represents the relative frequency of the characteristic. It describes the central tendency, dispersion, or shape of a statistical distribution.

QUESTION 937

You are working on a construction project in a city different from your headquarters' location. You and your team have not worked in this city, City B, previously, and you lack knowledge of the local building codes. You had a team member review the codes, and he said they were in far greater detail than those in your city, City A. When you asked him how much time he would need to spend to gain a complete understanding of these codes, he estimated that at least five weeks would be needed. You then decided it would be more cost effective to hire a local person from City B who specializes in this area. As a result, as you prepare your schedule and estimate your resource requirements for this project, you should coordinate this work closely with which of the following processes:

- A. Estimate costs
- B. Define activities
- C. Determine budgets
- D. Develop schedule

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The estimate activity resources process involves estimating the type and quantities of material, people, equipment, or supplies needed to perform each activity. This means close coordination with the estimate costs process is needed.

QUESTION 938

Assume that you were the first person in your company to be PMP® certified and also that you earned a doctorate in project management. People throughout the organization admired your achievements. Based on your success in managing projects, your company now has adopted a management-by-projects philosophy.

You have been appointed head of your company's project management office to lead the organization as it transitions to this new way of working. So far, people seem to willingly comply with your demands and requests. In this situation, you are using which type of power?

- A. Legitimate
- B. Expert
- C. Contacts
- D. Referent

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Legitimate power is formal authority based on a person's position within the organization. It comes with the right to give orders or make requests.

QUESTION 939

The nature of project work is such that it inevitably causes stress. Project managers thus need to learn how to cope with and manage stress and understand what stress is and why it is created. Project managers need to note that it can be a positive experience depending on how people perceive stress and should work to mentor team members accordingly. As you strive to become more aware of stress, which one of the following is NOT considered a stress-creating factor that is related to the project environment?

- A. Role ambiguity
- B. Corporate politics
- C. Career development
- D. Selection of team members

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The main sources of stress are grouped into four categories of stress-creating factors: those related to roles and relationships, those related to the job environment, personal factors, and factors related to the project environment or climate. Role ambiguity is an example of factors related to roles and responsibilities. It occurs when an individual is not clear about his or her job responsibilities.

QUESTION 940

Assume you are working as the project manager on the first project in your company to use the critical chain approach to scheduling. You are a PMP ® and also are certified in critical chain. You are getting ready for a performance review with your Governance Board, and you can expect they will ask questions about_____

- A. The magnitude of variance against the schedule baseline
- B. Schedule risk
- C. Performance to date since the past review meeting
- D. The buffer needed and buffer remaining

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Critical chain is an approach in scheduling in which the project team can place buffers on any project schedule path to account for limited resources and project uncertainties. During a performance review, comparing the amount of buffer remaining to the amount of buffer needed to protect the delivery date can help to determine schedule status.

QUESTION 941

You are in the early stages of a project to manufacture disposable medical devices. You need a number of engineers including ones with specialties in mechanical, environmental, and systems engineering. In the early stages of this project, your resource pool includes a large number of both junior and senior engineers in the various specialty areas. However, as the project progresses_____

- A. Fewer systems engineers will be needed
- B. The resource pool can be limited to those people who are knowledgeable about the project
- C. To complete the project on time, you will continue to require access to a large number of engineers in their specialty areas
- D. You will only need junior level engineers as the senior level people can be used early in the project to mentor and train them

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Resource calendars are an input to the estimate activity resource process and to the estimate activity durations process. They are used to estimate resource use. Early in a project, the resource pool might include people at different levels of expertise in large numbers, but as the project progresses, the resource pool then can be limited to those people who are knowledgeable about the project because of their work on it.

QUESTION 942

A number of approaches can be helpful when estimating resource requirements for activities on a project. Assume you are managing a project and you have already prepared your WBS. When you decomposed your WBS, it has 45 work packages. You then prepared an activity list. Now, you are preparing your schedule and determining your resource requirements. You found there were about 30 activities that you could not estimate with a reasonable degree of confidence, so you and your team decided to use which one of the following approaches to help with these activity resource estimates:

- A. Resource breakdown structure
- B. Published estimating data
- C. Alternatives analysis
- D. Bottom-up estimating

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

When an activity cannot be estimated with a reasonable degree of confidence, the work then needs to be decomposed into more detail. The estimates then are aggregated into a total quantity for each of the activity's resources through a bottom-up approach. These activities may or may not have dependencies between them. However, when dependencies exist, this pattern of use of resources then is documented in the estimated requirements for each activity.

QUESTION 943

To practice effective schedule control, your project team must be alert to any issues that may cause problems in the future. To best accomplish effective schedule control, the team should_____

- A. Review work performance information
- B. Allow no changes to the schedule
- C. Update the schedule management plan on a continuous basis
- D. Hold status reviews

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The calculated SV and SPI time performance indicators for WBS components, in particular the work packages and control accounts, are documented and communicated to stakeholders as an output of the control schedule process.

QUESTION 944

Functional managers play a vital role in ensuring project success. Since most projects operate in a matrix environment, there is shared authority between project managers and functional managers.

Functional managers tend to focus on _____

- A. Who will do the task
- B. Why the project manager needs resources
- C. How much time and money is available for the task
- D. Why will the task be done

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

In a matrix environment, project resources (that is, people) come from the functional departments. Therefore, it is the functional manager's job to identify who will work on specific project tasks.

QUESTION 945

You are a member of a project selection committee that uses the net present value technique. Using this approach, the project is acceptable if the _____

<https://vceplus.com/>

- A. Sum of the net present value of all estimated cash flow during the life of the project equals the profit

<https://vceplus.com/>

- B. Net present value of the inflow is greater than the specified amount or percentage threshold
- C. Gross present value of all future expected cash flow divided by the initial cash investment is greater than one
- D. Net present value of the inflow is less than the specified amount or percentage threshold

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The discounted cash-flow approach--or the present value method--determines the net present value of all cash flow by discounting it by the required rate of return. The impact of inflation can be considered. Early in the life of a project, net cash flow is likely to be negative because the major outflow is the initial investment in the project. If the project is successful, cash flow will become positive.

QUESTION 946

A watch list of low priority risks is documented in the_____

- A. Work performance information
- B. Risk register
- C. Fallback plans
- D. Risk response plan

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The monitor and control risks process includes keeping track of those risks on the watch list. Low-priority risks are inputs to the monitor and control risks process and are documented in the risk register. Other inputs that are part of the risk register include identified risks and risk owners, agreed-upon risk responses, control actions to assess the effectiveness of response plans, specific implementation actions, symptoms and warning signs of risk, residual and secondary risks, and the time and cost contingency reserves.

QUESTION 947

You are the project manager for a major logistics installation project and must obtain specific services from local sources external to your project. Your subcontracts administrator has told you to prepare a product or service description, which is referenced in a_____

- A. Project statement of work

- B. Contract scope statement
- C. Request for proposal
- D. Contract

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The project statement of work describes in a narrative form the products, services, or results that the project will deliver. It references the product scope description as well as the business need and strategic plan.

QUESTION 948

It often is advantageous to appoint a termination manager in the closing phase of the project and release the project manager so that he or she is available to work on another project. If this is the case, the termination manager should focus attention on all but which one of the following?

- A. Ensuring that documentation is complete
- B. Ascertaining any product support requirements
- C. Receiving formal acceptance of the project from the client
- D. Preparing personnel performance evaluations

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The project manager, or whoever supervised the work of each individual team member, should prepare the personnel evaluations because they have an intimate understanding of the work performed by the team members. The termination manager focuses instead on the administrative requirements of termination and the environment within which the project will be operating if it is continued in any way.

QUESTION 949

You are working on a project to upgrade the existing fiber-optic cables in your province. You have determined that a resource can install 25 meters of cable per hour, so the duration required to install 1,000 meters would be 40 hours. This means you are using_____

- A. Productivity efficiency factors
- B. Parametric estimating

- C. Analogous estimating
- D. PERT

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Parametric estimating uses statistical relationships between historical data and other variables to calculate an estimate for activity parameters such as cost, budget, and duration. The activity durations then are determined quantitatively by multiplying the quantity of work to be performed by the labor hours per unit of work. This technique can produce higher levels of accuracy depending on the reliability of the data in the model.

QUESTION 950

During the stages of team development, your team is in which stage when there is problem solving and interdependence along with achievement and synergy?

- A. Storming
- B. Forming
- C. Norming
- D. Performing

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The performing stage of team development is noted by a theme of productivity. Management skills involve consensus building, problem solving, decision making, and rewarding, with leadership shown through management by walking around, stewardship delegation, mentoring, being a futurist, and being a cheerleader/champion.

QUESTION 951

When you are about to terminate a contract, the one place to look for specific procedures for contract closure is in the_____

- A. Statement of work in the contract
- B. Terms and conditions in the contract
- C. Product description
- D. Organizational process assets

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The terms and conditions can prescribe specific procedures for the various ways that a contract could be terminated.

QUESTION 952

Today, the primary cause of why projects are not completed on time and within cost and are terminated early is due to_____

- A. Contractual issues
- B. Complexity of the project
- C. An increase in the allocated time
- D. Behavioral-oriented reasons

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Behavioral reasons, rather than quantitative reasons, account for more project terminations because it is much more difficult to manage people than things. Issues such as poor morale, poor human relations, poor labor productivity, and no commitment from those involved in the project combine to thwart project success in many industries.

QUESTION 953

Life-cycle phase definitions are different in different industries. For example, all of the following are terms that could be used in the closing phase of a project EXCEPT_____

- A. Testing and commissioning
- B. Conversion
- C. Implementation
- D. Final audit

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Regardless of the many terms used across many industries, implementation would be considered a term used in the executing phase in which the work is carried out and done. Kerzner 2009, 69

QUESTION 954

Your company is embarking on a project to launch a new product delivery service. You are the project manager for this project and have just finished the concept phase. The various outputs/deliverable(s) for this phase include_____

- A. Project management plan
- B. Scope of work and requirements
- C. Project charter and stakeholder register
- D. Roles and responsibilities of the project manager

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The project charter signifies official sanction by top management and starts the planning, or development, phase. This document formally recognizes the existence of the project and provides the project manager with the authority to apply organizational resources to project activities. The stakeholder register is an output of identify stakeholders and also an output during the initiating processes.

QUESTION 955

Behavior roles of team members influence the team's process, behavior, and effectiveness. An example of a task-oriented role to perform is that of a(n)

- A. Harmonizer
- B. Initiator
- C. Devil's advocate
- D. Group observer

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

To initiate something means to get it started. In the project environment, that typically means a task.

QUESTION 956

You are managing a project in which your team members all work in the same geographic location and have worked together previously on many projects. Everyone is aware of the various strengths and weaknesses of the individual team members and their key areas of expertise. As a result _____

- A. A kickoff meeting is recommended
- B. Team-building activities will not be needed on your project
- C. You should expect minimal conflicts and changes to occur
- D. Rewards and recognition will be handled smoothly throughout the project

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Even if team members already know one another, a kickoff meeting should still be held because the meeting always includes more than meeting team members. Specific expectations for the project can be discussed as well as other important administrative details. It also gives people an opportunity to express their commitment to the project's objectives.

QUESTION 957

Team building should be ongoing throughout the project life cycle. However, it is hard to maintain momentum and morale, especially on large, complex projects that span several years. One guideline to follow to promote team building is to _____

- A. Consider every meeting a team meeting, not the project manager's meeting
- B. Conduct team building at specific times during the project through off-site meetings
- C. Engage the services of a full-time facilitator before any team-building initiatives are conducted
- D. Develop the project schedule using the services of a project control officer and then issue it immediately to the team

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Team building should be made as important a part of every project activity as possible. Given that there are many meetings on projects, each team member should be made to feel that it is his or her meeting and not just the project manager's meeting. This will foster greater contribution by each team member.

QUESTION 958

You have been assigned as the project manager for a major project in your company where the customer and key supplier are located in another country. You have been working on your project for six months. Recently, you traveled to this country, and at the conclusion of a critical design review meeting, which was highly successful, you realized you were successful in building a high-performing team. You had your own team members, who work in a weak matrix structure, on a conference call during this meeting. Although it was difficult to reach agreement on some key issues, you therefore relied on your interpersonal skills in_____

- A. Facilitation
- B. Negotiating
- C. Influencing
- D. Decision making

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

All are useful skills for project managers. In this situation influencing was necessary as the project manager has little or no direct control over team members as they work in a weak matrix. The ability of the project manager to influence stakeholders in a timely basis is critical to project success.

QUESTION 959

You are leading a team to review and improve the project selection and prioritization method. You know that the two most important questions to answer are "can we do the project?" (feasibility study) and "should we do the project?" (cost-benefit analysis). The team is considering many different management concerns, including financial return, market share, and public perception.

The most important criterion for building a project selection model is_____

- A. Risks
- B. Realism
- C. Ease of use
- D. Benefits realization

Correct Answer: B

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

A project selection model should reflect the objectives of the company and its managers; consider the realities of the organization's limitations on facilities, capital, and personnel; and include factors for risk--the technical risks of performance, cost, and time as well as the market risk of customer rejection.

QUESTION 960

Because risk management is relatively new on projects in your company, you decide to examine and document the effectiveness of risk responses in dealing with identified risks and their root causes. You therefore_____

- A. Conduct a risk audit
- B. Hold a risk status meeting
- C. Ensure that risk is an agenda item at regularly scheduled staff meetings
- D. Reassess identified risks on a periodic basis

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

The risk audit is a tool and technique in the control risks process with two purposes: to assess the effectiveness of risk responses and to evaluate the effectiveness of the risk management process.

QUESTION 961

Thinking back to lessons that your company learned from experiences with its legacy information systems during the Y2K dilemma, you finally convinced management to consider systems maintenance from the beginning of the project. However, maintenance should_____

- A. Always be included as an activity to be performed during the closeout phase
- B. Have a separate phase in the life cycle for information systems project because 60% to 70% of computer systems' life-cycle costs generally are devoted to maintenance
- C. Not be viewed as part of the project life cycle
- D. Be viewed as a separate project

Correct Answer: C

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Projects are efforts that occur within a finite period of time with clearly defined beginnings and ends. Maintenance is ongoing and of an indefinite duration. A maintenance activity, such as revision of an organization's purchasing guidelines, may be viewed as a project but is a separate and distinct undertaking from the initial project that generated it. At this point, the project has been completed, and its deliverables are transferred to operations for implementation.

QUESTION 962

On your systems development project, you noted during a review that the system had less functionality than planned at the critical design review. This note suggests that during the control risks process you used which following tools and techniques?

- A. Risk reassessment
- B. Variance analysis
- C. Technical performance measurement
- D. Reserve analysis

Correct Answer: C

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Technical performance measurement compares technical accomplishments to date to the project plan's schedule of technical achievement. Deviation, such as less functionality than planned at a key milestone, can help to forecast the degree of success in achieving the project scope.

QUESTION 963

The workaround that you used to deal with a risk that occurred should be documented and included in which following processes?

- A. Report performance and monitor and control risks
- B. Validate scope and perform quality assurance
- C. Direct and manage project work and perform integrated change control
- D. Monitor and control project work and control risks

Correct Answer: D

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

A workaround is a form of corrective action, as it is a response to a threat that has occurred for which a prior response had not been planned or was not effective.

QUESTION 964

Contested changes are requested changes when the buyer and seller cannot agree on compensation for the change. They are also known as all but which one of the following?

- A. Disputes
- B. Demands
- C. Appeals
- D. Claims

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Claims administration is a tool and technique in the control procurements process. When the buyer and seller cannot agree, this is also called claims, disputes, or appeals and should be documented, processed, monitored, and managed throughout the contract life cycle.

QUESTION 965

A structured review of the seller's progress to deliver project scope and quality within cost and schedule is known as a(n)_____

- A. Procurement performance review
- B. Procurement audit
- C. Inspection
- D. Status review meeting

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

These reviews are a tool and technique of the control procurements process, which can include a review of seller-prepared documentation and buyer inspections.

They seek to identify performance successes or failures, progress with respect to the contract statement of work and contract noncompliance.

QUESTION 966

Within your company's portfolio, your project is ranked in the top five in terms of importance of the 60 projects under way; however, the number of resources available to you is still limited. You have decided to pilot test the use of critical chain on your project. You have calculated your critical path. You want to ensure that your target finish date does not slip in the critical chain method. To do so you should_____

- A. Add a project buffer
- B. Put in three feeding buffers
- C. Determine the drum resource
- D. Manage the total float of the network paths

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

After the critical path is identified using the critical chain method, resource availability is entered and a resource-constrained schedule results. This schedule may have an altered critical path that is known as the critical chain. The critical chain method adds duration buffers that are non-work schedule activities to manage uncertainty. To protect the target finish date from slippage on the critical chain, a project buffer is placed at the end of the critical chain.

QUESTION 967

The greatest degree of uncertainty is encountered during which phase of the project life cycle?

- A. Concept
- B. Planning
- C. Implementation
- D. Closeout

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The greatest degree of uncertainty about the future is encountered during the concept phase or at the start of the project. The direction of the project is determined in this phase, and the decisions made have the greatest influence on scope, quality, time, and cost of the project.

QUESTION 968

A team-building approach that facilitates concurrent engineering is_____

- A. Matrix management
- B. Fast-tracking
- C. Tight matrix
- D. Task force

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

A "tight" matrix refers to team members working in close proximity to one another. Studies have demonstrated that such a team approach facilitates concurrent engineering by having designers working next to manufacturing engineers, for example, to help ensure that the project is designed in such a manner that it is also cost-effective to manufacture.

QUESTION 969

A number of different decision-making styles can be used in a team environment. When quality and acceptance are both important, which of the following styles should be used?

- A. Command
- B. Consultation
- C. Consensus
- D. Coin flip

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Project managers tend to use four basic decision styles: command, consultation, consensus, and coin flip or random. If acceptance and quality are both important, the consultation style is preferred. It allows for some involvement of team members but allows project managers to maintain control over the final decision. In this style, team members are free to express their opinions, but the project manager makes the final decision.

QUESTION 970

Historical information is used _____

- A. To compare current performance with prospective lessons learned
- B. To prepare the stakeholder management plan
- C. To evaluate the skills and competencies of prospective team members
- D. As an input to develop project charter

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Historical information is an organizational process asset in the develop project charter process. Other organizational process assets are organizational standard processes, policies, and process definitions; templates from other project charters; and the lessons learned data base.

QUESTION 971

Work completed, key performance indicators, technical performance measures, start and finish dates of schedule activities, number of change requests, number of defects, actual costs, and actual decisions are examples of work performance data are an output of _____

- A. Project plan development
- B. Risk control
- C. Monitor and control project work
- D. Direct and manage project work

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Work performance data containing these examples are an output of direct and manage project work. They are raw observations and measurements identified as activities are being performed to complete the work of the project. These data often are viewed at the lowest level of detail from which information is derived by other processes. The data then are gathered as the work is done and passed to the controlling processes of the various processes for further analyses.

QUESTION 972

Two team members on your current construction project are engaged in a major argument concerning the selection of project management software. They refuse to listen to each other. The most appropriate conflict resolution approach for you to use in this situation is _____

- A. Accommodating
- B. Compromising
- C. Collaborating
- D. Forcing

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Forcing, using power or dominance, implies the use of position power to resolve conflict. It involves imposing one viewpoint at the expense of another. Project managers may use it when time is of the essence, when an issue is vital to the project's well-being, or when they think they are right based on available information. Although this approach is appropriate when quick decisions are required or when unpopular issues are an essential part of the project, it puts project managers at risk.

QUESTION 973

As you use the critical chain method in lieu of the critical path method in developing your schedule, assume you have determined the buffer schedule activities. Your planned activities are scheduled to their latest possible planned start and end dates. Therefore, you are focusing on_____

- A. Managing the free float of each network path
- B. Managing the total float of the network paths
- C. Managing remaining buffer durations against the remaining durations of task chains
- D. Managing the total buffer durations against the durations of the task chains

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The purpose of the critical chain method is to modify the project schedule to account for limited resources. The schedule is built using duration estimates with required dependencies and defined constraints as inputs. Then, the critical path is calculated and resource availability is entered, which means there is a resource-limited schedule with an altered critical path. Buffers protect the critical chain from slippage, and the size of each buffer accounts for the uncertainty in the duration of the chain of dependent tasks that lead up to the buffer. This method then focuses on managing the remaining buffer durations against the remaining duration of task chains.

QUESTION 974

A key member of your project has deep technical skills and many years of experience in the company. Although she is not a manager, people respect her and do what she suggests. Of the following types of power, which one does she have?

- A. Legitimate
- B. Reward C. Referent
- D. Expert

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Expert power is earned/personal power when project personnel admire an individual's skills and want to follow him or her as a role model. In such situations, people willingly comply with the demands of such a person.

QUESTION 975

You have been placed in charge of a group of people that is selecting one of three possible projects. As you gather in the conference room, many team members already have decided which project selection technique to use. Some prefer IRR, and others argue for BCR. In deciding which method to use, your first step should be to_____

- A. Compare and contrast selection techniques and identify the advantages and disadvantage of each
- B. Identify the technique used most often in the company and determine if it is appropriate for this project
- C. Select the method for which most team members have knowledge
- D. Determine the philosophy and wishes of management

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Any selection technique must be evaluated based on the degree to which it will meet the organization's objective for the project. Management generally establishes the organization's objective; therefore, management's wishes must be identified first. Then the most appropriate model to support management's wishes should be selected.

QUESTION 976

Before considering a project closed, what document should be reviewed to ensure that project scope has been satisfied?

- A. Project scope statement
- B. Project management plan
- C. Project closeout checklists
- D. Scope management plan

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Project scope is measured against the project management plan. The project scope statement and scope baseline are subsets of the project management plan. However, the whole plan and all the baselines (cost and schedule) need to be met in addition to part of the scope. The project management plan is the agreement between the project manager and sponsor and defines what constitutes project completion.

QUESTION 977

A cost management plan should establish and document the various earned value rules of performance measurement. Along with defining the WBS to the level that the earned value analysis will be performed and establishing how earned value will be credited to the project (0-100, 0-50-100, and so on), which following rule is also recognized regarding performance measurement?

- A. Determine the formula for calculating the estimate to complete (ETC) for the project
- B. Determine the code of accounts allocation provision for the WBS
- C. Determine the formula for calculating the estimate at completion (EAC) for the project
- D. Determine the variance thresholds to be used in the project

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Three recognized earned value rules of performance measurement are to (1) determine the EAC calculation to be used on the project as tracking methodologies are specified and to provide a validity check on the bottom-up EAC, (2) establish the earned value measurement techniques (for example, weighted milestones, fixed formula or percent complete), and (3) define the WBS level at which the measurements of control accounts will be performed. Four methods can be used to calculate the EAC.

QUESTION 978

All the following elements are organizational process asset updates, resulting from closing a project or phase EXCEPT _____

- A. Project files
- B. Project or phase closure documents
- C. Historical information
- D. Final product, service, or result transition

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

All the elements are outputs of the close project or phase processes, but the final product, service, or result transition is not part of the organizational process assets. It is an output on its own and involves the product that the project was created to produce.

QUESTION 979

You have a conflict on your team but have enough time to resolve it, and you want to maintain future relationships. Thankfully, there is mutual trust, respect, and confidence among the parties involved. You decide to use confronting to resolve this conflict. In using this approach, your first step should be to _____

- A. Separate people from the problem
- B. Acknowledge that conflict exists
- C. Establish ground rules
- D. Explore alternatives

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

In order to address conflict, people must recognize and acknowledge that conflict exists. Next, it is important to establish common ground or shared goals and then to separate people from the problem.

QUESTION 980

One way to evaluate the project schedule performance is to _____

- A. Use the project management information system (PMIS)

- B. Determine the percent complete of in-progress schedule activities
- C. Establish a schedule change control system
- D. Determine the total float variance

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Performance reviews are a tool and technique used in control schedule and includes trend analysis, critical path method, critical chain method, and earned value management. In terms of the critical path method, the emphasis is on comparing progress along the critical path to determine schedule status. Variance on the critical path will have a direct impact on the project's end date; evaluating progress of activities or near critical paths can identify schedule risk. After the variance is known, the project team can take corrective action to bring performance in line with the plan.

QUESTION 981

Validate scope works hand-in-hand with control quality and generally follows control quality. A tool and technique used in validate scope that is not used in control quality is_____

- A. Group decision-making techniques
- B. Inspection
- C. Statistical sampling
- D. Variance analysis

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Both processes use inspection. Validate scope also uses group-decision making techniques to reach a conclusion when the validation is performed by the project team and other stakeholders. Methods to reach a group decision include: unanimity, majority, plurality, and dictatorship.

QUESTION 982

Research has shown that during the execution phase of the project, the majority of conflicts involve_____

- A. Personalities

- B. Project priorities
- C. Cost
- D. Schedule

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

In a study of sources of conflict by project life-cycle phase, seven different causes of conflict were identified. In the execution phase, the highest-ranking sources of conflict were schedules, technical issues, and personnel, in this order, followed by priorities, administrative procedures, cost, and personalities.

QUESTION 983

You are a goal-oriented project manager who is more interested in work accomplishment than relationship building. This indicates that you tend to resolve conflicts primarily through the use of_____

- A. Smoothing
- B. Compromising
- C. Collaborating
- D. Forcing

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Forcing and majority rule are represented by a strong desire to satisfy oneself rather than to satisfy others. It involves imposing one viewpoint at the expense of another and is characterized by a win-lose outcome in which one party overwhelms the other. Adams et al. 1997, 181-189

QUESTION 984

You are working on a long-term project that has a number of benefits to its customers and users. Therefore, as the project manager, one of your first steps was to identify the stakeholders that were critical to project success. Because this project will need long-term support by your organization once it is completed, key stakeholders are_____

- A. Operations managers
- B. Functional managers

- C. Sellers
- D. Business partners

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Operations managers are stakeholders on many projects. They deal with producing and managing the products and services of the organization. On many projects, they are responsible after the project is complete and has been formally handed off to them for incorporating the project into normal operations and providing longterm support for the product.

QUESTION 985

Effective communication occurs in groups as well as between individuals and is made up of several key components, such as the purpose of the message, the audience that you are delivering the message to, and the content of the message itself. One important area to consider when working with manage communications_____

- A. The choice of media
- B. How often to distribute the information
- C. The communications plan
- D. The project performance report structure

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The choice of media, or the way you deliver the information is as important as what you say. It is important to determine when to communicate in writing versus orally, when to prepare an informal memo or when to use a formal report, and when to communicate face to face or by email, as examples.

QUESTION 986

A conflict resolution approach that is NOT considered to be very effective when more than a few players are involved and their viewpoints are mutually exclusive is_____

- A. Forcing
- B. Avoiding

- C. Compromising
- D. Collaborating

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Collaborating involves bringing people with opposing views together to reach a solution. When there are too many people involved, it is more difficult to reach a solution, given the multiplicity of perspectives. When the parties involved have mutually exclusive views, forcing or compromise must be used.

QUESTION 987

The key output of identify stakeholders that documents identification information, assessment information, and classification is the_____

- A. Stakeholder management plan
- B. Communications plan
- C. Stakeholder register
- D. Communications log

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The stakeholder register is the main output of identify stakeholders and contains all the details known at the time related to the stakeholders.

QUESTION 988

Improvement to the processes and the product is a goal of project quality management. Assume that after completing a quality audit, you have discovered some gaps/shortcomings in the way that the project team is completing one deliverable. As an output to perform quality assurance, you would create which following item that feeds directly into the perform integrated change control processes?

- A. Quality management plan updates
- B. Risk register
- C. Change requests
- D. Project document updates

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Quality improvements to processes and procedures as well as the project and product will result in a change request that will be reviewed and evaluated to allow full consideration of the recommended improvements using the perform integrated change control process.

QUESTION 989

The estimate costs process uses all the following tools and techniques EXCEPT _____

- A. Three-point estimating
- B. Cost of quality assumptions
- C. Reserve analysis (contingency reserves)
- D. Basis of estimates

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Basis of estimates is an output from the estimate costs process.

QUESTION 990

A contract typically is used when a project is being performed for an external customer. An agreement is used as an input to _____

- A. Develop project charter
- B. Develop project team
- C. Plan procurement management
- D. Conduct procurements

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

In the develop project charter process, an agreement is an input to define initial intentions for the project. They may take the form of a type of contract such as memorandums of understanding, service level agreements, letter of agreement, letter of intent, verbal agreement, or other written agreements.

QUESTION 991

As you prepare to close your project, which of the following is an input to the close project or phase process?

- A. Work performance information
- B. Expert judgment
- C. Accepted deliverables
- D. Change requests

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Accepted deliverables is an input to the close project or phase. The other selections are inputs or tools and techniques for other processes.

QUESTION 992

Managing change to the scope baseline is the main objective of the process of control scope. The scope baseline consists of the following components EXCEPT _____

- A. Project scope statement
- B. WBS
- C. WBS dictionary
- D. Scope management plan

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The scope management plan is not part of the scope baseline. However, both the scope baseline and the scope management plan are a part of the larger project management plan.

QUESTION 993

Assume you have been working with your sponsor to prepare your charter, and you plan to present it to your Steering Committee on Friday. You are managing a software project, and the business need stated that you should use agile for the first time in our company rather than waterfall. In the Develop Project Charter process, this is then _____

- A. Tool and technique
- B. Part of the enterprise environment factors as an input to this process
- C. A high-level requirement
- D. Stated in the strategic plan as a tool and technique in this process

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The project charter formally authorizes the existence of the project and provides the project manager with the organizational resources for the project activities. Using agile is an example of a high-level requirement, which also is included in the charter.

QUESTION 994

Procurement documents are used in the identify stakeholder process because they _____

- A. Are an enterprise environmental factor and an input to the process
- B. Are an organizational process asset and an input to the process
- C. Note key stakeholders as parties in the contract
- D. Serve as a way to prioritize and classify stakeholders

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Procurement documents are an input to the identify stakeholder process. If the project results from a procurement activity or is based on an established contract, the parties in the contract are key project stakeholders. Others, such as suppliers, are also stakeholders and should be added to the stakeholder list.

QUESTION 995

You completed your stakeholder analysis. How do you want to manage those stakeholders that have a high interest in your project and high power over decisions affecting your project?

- A. Manage them closely
- B. Keep them satisfied
- C. Keep them informed
- D. Monitor them occasionally

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

You must manage them closely. High-power/high-interest stakeholders who do not support your project could have a devastating effect on your project.

QUESTION 996

Change requests include a group of potential changes to a project. Types of change requests include all the following EXCEPT _____

- A. Defect repairs
- B. Maintenance requests
- C. Corrective actions
- D. Preventive actions

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Defect repairs, corrective actions, and preventive actions are types of change requests that occur on a project. Maintenance requests typically would be outside the scope of the project itself.

QUESTION 997

You are working on a project that needs approval from your City Council and the courts, because the project is one with significant environmental and social impacts. Although many consumer groups are advocates of this project, others are opposed to it. Hearings are scheduled to resolve these issues and to obtain the needed permits to proceed. In preparing your human resource plan, you decide to designate a person as the court liaison, which is an example of a _____

- A. Role
- B. Responsibility
- C. Required competency
- D. Ability of the team member to make appropriate decisions

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The human resource plan documents roles and responsibilities on the project. A role is the function assumed by or assigned to a person in the project. The court liaison is an example of such a role on a project.

QUESTION 998

Assume you are managing an international project. Your team is located in Atlanta, Georgia, US; Berlin, Germany; and Melbourne, Australia. You and your sponsor are located in Paris, France, and your customer is located in Athens, Greece. Recognizing the different locations of the stakeholders in your project in its initial stages, a best practice to follow in terms of working toward project success is to_____

- A. Determine who decides the project is a success
- B. Aligning the personal inputs of different project participants with a vision focused on success
- C. Establishing the project culture during the initiating stage of the project
- D. Identifying basic cultural characteristics and selecting one to follow

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Project approval criteria should be documented in the project charter. These criteria include determining what constitutes success, who decides the project is successful, and who signs off on the project.

QUESTION 999

As a project manager, you recognize the importance of actively engaging key project stakeholders on a project. You have prepared an analysis of your stakeholders early in your project and classified them according to their interest, influence, and involvement in your project.

You want to now _____

- A. Focus on relationships necessary to ensure success
- B. Assess stakeholder legitimacy
- C. Determine the urgency that each stakeholder requires when he or she requests information about the project
- D. Focus on each stakeholder's power relevant to the project

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The project manager has limited time on a project, and his or her time should be used as efficiently and effectively as possible. Therefore, by performing a stakeholder analysis, the project manager can identify the stakeholder relationships that can be leveraged to build coalitions and potential partnerships to enhance project success and to determine relationships that need to be influenced differently at different stages of the project or phase

QUESTION 1000

B.
Based on a recent quality audit of your project, your organization's quality assurance department is supportive of your approach as it notes the following characteristics of quality that are being followed consistency. They include all of the follow EXCEPT_____ A. Cost of quality

- Customer satisfaction
- C. Management responsibility
- D. High-performing team

Correct Answer: D
Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

This high-performing team is covered in develop project team and obviously is important and necessary. However, regarding quality management other key concepts are prevention over inspection and continuous improvement.

QUESTION 1001

The plan quality management process includes all the following techniques EXCEPT_____

- A. Benchmarking
- B. Design of experiments
- C. Process analysis
- D. Control charts

Correct Answer: C
Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

Process analysis is used as a tool and technique in perform quality assurance. The tools and techniques used during plan quality management are the seven basic quality tools (cause-and-effect diagrams, flowcharts, check sheets, Pareto diagrams, histograms, control charts, and scatter diagrams), cost-benefit analysis, cost of quality, benchmarking, design of experiments, statistical sampling, additional quality planning tools (brainstorming, force field analysis, nominal group technique, and quality management and control tools, [affinity diagrams, process decision program charts interrelationship diagrams, tree diagrams, prioritization matrices, activity network diagrams, and matrix diagrams]), and meetings.

C.

QUESTION 1002

You are managing a major international project that involves multiple performing organizations.

To establish the guiding rules for the project regarding quality, you and your project team must develop a_____

- A. Improvement management plan
- B. Configuration management plan
Quality policy
- D. List of quality metrics for the project

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The quality policy includes the overall intentions and the direction of the organization regarding quality and as formally expressed by top management. When the performing organization lacks a formal quality policy or when the project involves multiple performing organizations, as in a joint venture, the project management team must develop a quality policy for the project as an input to its quality planning. PMI®, PMBOK® Guide, 2013, 234

QUESTION 1003

You are working on a project that management has decided to terminate early, because the product was rendered obsolete by the introduction of new technology by a competitor. You have awarded a contract for part of the project that will be terminated, and fortunately have a clause that enables you to terminate it for convenience at any time. This means that_____

- A. Your contractual obligations are complete once you issue the termination for convenience
- B. You may need to compensate the seller for seller preparations and for any completed or accepted work
- C. You need to compensate the seller only for accepted work that was completed prior to the termination order
- D. Specific rights and responsibilities are determined once the termination order is issued

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

D.

Early termination of a contract is a special case of procurement closure. The rights and responsibilities of the parties are contained in a termination clause of the contract. Typically such a clause allows the buyer to terminate the whole contract or a portion of it for cause or convenience at any time. In doing so, the buyer may need to compensate the seller for seller's preparations and for any completed and accepted work related to the terminated part of the contract.

QUESTION 1004

Of the following, which one is NOT true concerning a contract?

- A. It is a legal relationship subject to remedy in the courts.
- B. It can take the form of a complex document or a simple purchase order.

- C. It is a mutually binding legal relationship that obligates the seller to provide specific products, services, or results and obligates the buyer to pay the seller.
- D. It includes a specific contract management plan.

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

A contract management plan is not part of a contract. It is used to identify how the contract will be administered.

QUESTION 1005

All of the following can be used in lieu of the term "bidders conferences" EXCEPT _____

- A. Contractor conferences
- B. Pre-bid conferences
- C. Vendor conferences
- D. Project review meetings

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Bidders conferences are meetings with prospective sellers prior to the preparation of a bid or proposal to answer questions and clarify issues. They are a tool and technique in the conduct procurements process. Project review meetings are conducted to assess project performance and status.

QUESTION 1006

Assume you are preparing your procurement management plan. A useful tool and technique is to _____

- A. Have a meeting
- B. Use your risk register
- C. Review the requirements document
- D. Use your stakeholder register

Correct Answer: A

Section: Mix Questions

Explanation**Explanation/Reference:**

Explanation:

Meetings are another tool and technique in plan procurement management. They are held as research alone may not provide specific information for a procurement strategy without additional information exchange with potential bidders. Through collaborating with potential bidders the organization purchasing the material or service may benefit. Suppliers may benefit to influence a mutually beneficial approach or product.

QUESTION 1007

Your role in the project includes helping to resolve problems; making recommendations regarding priorities; accelerating activities to meet the target schedule; promoting communications among project team members; and helping management monitor the project's progress on a regular basis. Most of the people working on your project are scientists or technical experts. You are working in which of the following types of organizational structures?

- A. Task force
- B. Balanced matrix
- C. Project expeditor
- D. Project coordinator

Correct Answer: C

Section: Mix Questions

Explanation**Explanation/Reference:**

Explanation:

A variation of the weak matrix organizational structure, the project expeditor has no formal authority to make or enforce decisions. Nonetheless, the project expeditor must be able to persuade those in authority to maintain the project's visibility so that resources will be allocated as needed to meet the project's schedule, budget, and quality constraints. This approach is considered to be effective in high-technology and research and development environments.

QUESTION 1008

In order for a matrix organizational approach to be successful, the two-boss situation should be resolved. To overcome the two-boss problem, it is important to _____

- A. Have the project manager and the functional manager work together to complete performance evaluations
- B. Prepare a responsibility chart to define responsibilities
- C. Guarantee a balance of power between the functional manager and the project manager
- D. Promote interface relationship management

Correct Answer: A

Section: Mix Questions**Explanation****Explanation/Reference:**

Explanation:

In a matrix environment, project team members have two bosses: the project manager and their functional line manager. People often are unclear as to which manager is their "real" boss, as there may be a continual shifting balance of power. To avoid confusion regarding performance issues, it is a best practice to have the project manager and functional line manager complete the individual's performance evaluations. Also, greater weight should be given to the project manager's assessment for the time the individual actually worked on the project.

QUESTION 1009

The resource calendar is an output of which following process?

- A. Develop project team
- B. Acquire project team
- C. Estimate activity durations
- D. Manage project team

Correct Answer: B

Section: Mix Questions**Explanation****Explanation/Reference:**

Explanation:

The resource calendar is an output from the acquire project team process. Other outputs are project staff assignments and updates to the project management plan, especially the human resource management plan. A resource calendar is also an output of the develop human resource plan process as part of the staffing management plan and the conduct procurements process.

QUESTION 1010

An intentional activity to ensure future performance of project work is aligned with the project management plan is_____

- A. Preventive action
- B. Corrective action
- C. Implemented change requests
- D. Work performance information

Correct Answer: A

Section: Mix Questions
Explanation

Explanation/Reference:

Explanation:

As a specific subset of change requests, approved preventive actions are an input to the direct and manage project work process. Such actions are intentional to ensure the future performance of the project work is aligned with the project management plan.

QUESTION 1011

Close procurements is a process that involves includes activities for administrative closure such as _____

- A. Customer acceptance and final payment
- B. Audit project success or failure and archiving records
- C. Final contractor payment and lessons learned
- D. Transition of the final product and acceptance of deliverables

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Administrative closure includes step-by-step methodologies that address: actions and activities necessary to satisfy completion or exit criteria for the phase or the project; actions or activities to transfer the products, services, or results to the next phase or to production or operations; and activities to collect project or phase records, audit success or failure, gather lessons learned, and archive information for future use in the organization.

QUESTION 1012

As a project manager, not only must you be a leader, but you also must be responsible for the management, administrative, and technical aspects of the project. Which following skill is NOT representative of the skills needed for project leadership/interpersonal relations?

- A. Influencing the organization by sharing power and getting others to cooperate toward common goals
- B. Creating an environment to meet project objectives while offering maximum self-satisfaction related to what people value the most
- C. Helping a group of people bound by a common sense of purpose to work interdependently with each other
- D. Understanding of policies, operating procedures, and regulations of external stakeholder organizations

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Successful project managers have expertise and skills in all three following areas: leadership/interpersonal, project management/administration, and technical. The understanding of policies, operating procedures, and regulations of external stakeholder organizations is representative of project management/administrative skills, not leadership/interpersonal skills.

QUESTION 1013

Assume you are managing a project, and your project management plan has been approved. Your project has a high level of change associated with it. There is active and ongoing stakeholder involvement. This means you probably are working with a(n)_____

- A. Adaptive life cycle
- B. Iterative life cycle
- C. Incremental life cycle
- D. Predictive life cycle

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The adaptive life cycle is one that is known as change driven or one with agile methods and is set up to respond to change and ongoing stakeholder involvement. This approach differs from iterative and incremental as durations are very rapid and are fixed in time and cost. This approach is preferred in a rapidly changing environment where requirements and scope are difficult to define in advance and when it is possible to define small incremental improvements, which deliver value to stakeholders.

QUESTION 1014

One way to help mitigate personnel risks that may occur during the end of the project is to _____

- A. Meet individually with each team member
- B. Provide specific recognition to each team member who has worked on the project
- C. Prepare a staff release plan
- D. Document the time each person is to work on the project in a resource calendar

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The staff release plan determines the method and timing of releasing team members. Morale is improved if there are smooth transitions for the staff to upcoming projects. This staff release plan also helps to mitigate human resource risks that may occur. It is part of the staffing management plan, which is part of the human resource plan.

QUESTION 1015

You are conducting a stakeholder analysis on your project. After identifying potential stakeholders, the next step in the process is to_____

- A. Determine their desired level of participation
- B. Provide detailed contact information for each identified stakeholder
- C. Perform an assessment to see how each stakeholder might react in certain situations
- D. Analyze each stakeholder's impact or support and classify them

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The second step in the stakeholder analysis process is to analyze the potential impact or support each stakeholder could generate and then to classify the stakeholders to define an approach or strategy.

QUESTION 1016

Assume your project communication management plan has been approved by your sponsor and the members of your Steering Committee. You are managing a global project and have team members working virtually in four continents and stakeholders in numerous locations. Your next step is to_____

- A. Set up an information management system
- B. Select communications technology
- C. Determine performance reporting methods
- D. Select a communications model

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Although all four listed are tools and techniques in the manage communications process (another is communications methods), since this project is a virtual one, the choice of technology is an important consideration. It can vary from project to project and throughout the life cycle, but as the project manager the focus is to ensure the choice is important for the information that is communicated.

QUESTION 1017

Although your project team is working virtually, you are striving to make it a high-performing team.

You held a virtual kickoff meeting to ensure there was a shared project vision. You now see that team members are addressing the work to be done, but they do not seem to be collaborating. You realize the team is_____

- A. Concerned about their formal roles and responsibilities
- B. Independent
- C. Forming
- D. Storming

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

During the storming stage, the team is addressing the work, technical decisions, and the project management approach. However, if team members are not collaborating and open to different ideas and perspectives, the environment becomes counterproductive.

QUESTION 1018

You are conducting a stakeholder analysis on your project. Your organization uses an approach to classify stakeholders based on their level of authority and their active involvement in the project.

This approach is known as_____

- A. A power/interest grid
- B. A power/influence grid
- C. An influence/impact grid
- D. A salience model

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Although a number of classification models are available to help prioritize the key stakeholders, the power/influence grid groups stakeholders based on their level of authority or power and their active involvement or interest in the project.

QUESTION 1019

When managing projects, one important technique is capturing lessons learned from previous projects to improve the organization's project management process. Therefore, in planning the project, it is important to plan the closing procedures, particularly to review the_____

- A. Risk responses that were used
- B. Checklists for risk identification
- C. WBS and scope documents
- D. Team members' performance feedback

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Checklists are a tool and technique of the identify risks process and include risks encountered on similar, previous projects identified through the lessons learned process. The project team will review the checklist as part of the identify risks process as well as during closeout. To help others in the future, the team will add to the list as necessary based on its experience.

QUESTION 1020

The basic approach to quality management in projects is to be compatible with which of the following:

- A. Six-Sigma, failure mode and effect analysis, and total quality management
- B. The International Organization for Standardization (ISO)
- C. Methods, such as those recommended by Deming, Juran, and Crosby
- D. Inspection over prevention

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Project quality management is intended to be compatible with International Organization for Standardization quality standards.

QUESTION 1021

During a bidders conference, it is important that _____

- A. Only qualified sellers participate
- B. All potential sellers are given equal standing
- C. The evaluation criteria for the proposal is used to determine participation
- D. Responses to questions be provided solely to the prospective seller that asked the question

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Bidders conferences are conducted to ensure all prospective sellers have a clear and common understanding of the requirements. They are not used to prequalify vendors. Thus, all vendors are treated equally.

QUESTION 1022

One key interpersonal skill used to manage stakeholder expectations is _____

- A. Negotiation skills
- B. Building trust
- C. Compromise
- D. Conversation

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Building trust helps to build the foundation of the relationship and is a critical component in effective team leadership. Without trust, it is difficult to establish positive relationships with the various stakeholders engaged in the project. If trust is compromised, people will disengage, and collaboration becomes more difficult if not impossible.

QUESTION 1023

You are a project manager leading the construction project of a new garbage incinerator. Local residents and environmental groups are opposed to this project because of its environmental impact. Management agrees with your request to partner with a third party that will be responsible for providing state-of-the-art "air scrubbers," to clean the exhaust to an acceptable level. This decision will delay the project but will allow it to continue. It is an example of which following risk response?

- A. Passive acceptance
- B. Active acceptance
- C. Mitigation
- D. Transference

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Risk transference is shifting some or all negative impact of a threat and the ownership of the response to the threat to a third party. It does not eliminate the threat posed by an adverse risk.

QUESTION 1024

All the following are processes in project procurement management EXCEPT _____.

- A. Terminate procurements
- B. Control procurements
- C. Plan procurement management
- D. Close procurements

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Termination is a word used to define a contract ending through mutual agreement by both parties, the default of one party, or for the convenience of the buyer. PMI®, PMBOK® Guide, 2013, 355, 387

QUESTION 1025

Working in the systems integration field, you are primarily responsible for coordinating the work of numerous subcontractors. Your current project is coming to an end. You have 15 major subcontractors as well as a variety of other sellers. Now that you are closing contracts (procurements), you should_____

- A. Conduct a trend analysis
- B. Use earned value to assess lessons learned
- C. Ask each contractor to meet with you individually at its own expense
- D. Conduct a procurement audit

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The procurement audit attempts to identify successes and failures relative to the procurement process especially in terms of the preparation or administration of other procurement contracts on the project or on other projects in the organization. Uncovering and reporting both successes and failures can contribute to the project management knowledge base and improve the quality of project management services. A procurement audit should be conducted as part of the close procurements process.

QUESTION 1026

You are managing a moderately risky project. You have done well identifying risks and assessing them both on the probability of the risk event occurring and on the level of impact that the risk could have on your project if it actually occurred. But to help with a "next" level of qualitative risk analysis, you could use a_____

- A. Risk priority assessment
- B. Risk quality assessment
- C. Risk urgency assessment
- D. Quantitative risk analysis

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Risks that may occur in the near-term need urgent attention. The purpose of the risk urgency assessment is to identify those risks that have a high likelihood of occurring. Assessing risk urgency can be combined with the risk ranking that is determined from the probability and impact matrix for a final risk severity rating.

QUESTION 1027

You are identifying possible risks to your project concerning the development of a nutritional supplement. You want to reach out to your experts and build consensus on the risks that qualitative and quantitative risk analysis can address later. Although you can use various techniques, a key information gathering technique that helps to build consensus is_____

- A. Documentation review
- B. Probability/impact analysis
- C. Checklist analysis
- D. Delphi technique

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

When consensus is necessary, the Delphi technique is a frequently used information gathering technique. A facilitator first sends out a questionnaire to the experts to solicit ideas. The responses then are summarized and returned to the experts for further comment. Consensus generally is reached after a few such rounds. The Delphi technique helps to reduce bias in the data and the undue influence of one person on the outcome.

QUESTION 1028

Managing five contractors on your project for a new stadium in your City that can be used for baseball and for football and can be easily converted for either sport is a challenge along with managing your 15 person project team. You decided to conduct an audit of one of your contractors and are_____

- A. Using it as a baseline for improvements to the other contracts under way
- B. Verifying compliance in the seller's work processes
- C. Accompanying it with a project quality audit
- D. Using it for lessons learned documentation

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Inspections and audits are tools and techniques in the control procurements process. They are required by the buyer and supported by the seller in the procurement contracts and can be conducted as the project is executed to verify compliance in the seller's work processes or deliverables.

QUESTION 1029

A weighting system can be used for all but which one of the following reasons?

- A. To select a single seller that will be asked to sign a standard contract
- B. To establish a negotiating sequence by ranking all proposals by the weighted evaluation scores that have been assigned
- C. To quantify qualitative data to minimize possible bias
- D. To establish minimum requirements of performance for one or more of the evaluation criteria

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Weighting systems are developed and used to help select the best vendor as part of the proposal evaluation techniques. By assigning a numerical weight to each evaluation criteria, the buyer can emphasize one area as being more important than another. These proposal evaluation techniques are a tool and technique in the conduct procurements process.

QUESTION 1030

One way to make it more likely practice project risk management on projects is to

- A. Hold meetings
- B. Have the team take an orientation class on risk management early in the project
- C. Give one team member the responsibility for risk management working in conjunction with the PMO
- D. Assign each team member a risk to own, which is documented in the risk register

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Meetings are a tool and technique in the control risks process. Risk management should be an agenda item at periodic status meetings. While the amount of time needed for risk management will vary depending on the identified risks, their priority, and the difficulty of the response, the more often risk management is practiced, the easier it becomes. Frequent discussions about risk make it more likely that risks and opportunities will be identified.

QUESTION 1031

Your firm specializes in roller-coaster construction. It recently received an RFP to build the world's most "death-defying" roller coaster. You know that such a roller coaster has never been built before and that this would be a high-risk project. You are receiving a cost-plus-award-fee contract, which means_____

- A. Your fee will be paid for completed work
- B. Your fee amount will not change unless there is a scope change
- C. Your fee is generally not subject to appeals
- D. If your final cost is greater, you will share costs with the buyer based on a pre-negotiated cost sharing formula

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

This contract type reimburses the seller for all legitimate costs, but the majority of the fee is earned only based on the satisfaction of broad subjective performance criteria defined and incorporated in the contract. The fee determination is based on subjective determination of seller performance by the buyer; it generally is not subject to appeals.

QUESTION 1032

Work performance information in control risks means that_____

- A. Recommended preventive or corrective action is considered through change requests
- B. Outcomes of risk reassessments and risk audits are documented
- C. Templates to the risk management plan and the risk register are recommended
- D. A mechanism to communicate and support project decision making is provided

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

All of the answers are outputs in the control risks process, however, work performance information specifically provides a mechanism to communicate and support project decision making.

QUESTION 1033

A number of factors affect make-or-buy decisions such as_____

- A. Desired level of quality
- B. Risk-related contract decisions
- C. Value delivered by vendors meeting the needs
- D. Performance data

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Other factors to consider include the core capabilities of the organization, the risks associated with meeting the need in a cost-effective way, and capability internally compared with the vendor community.

QUESTION 1034

For complex procurement items, often contract negotiation can be an independent process. An example of an input if such a process is used is_____

- A. Open items list
- B. Approved changes
- C. Documented decisions
- D. Expert judgment

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Issues or an open item list are examples of inputs if contract negotiation is an independent process. Outputs are documented decisions. While contract negotiations may need to be a separate process for complex procurements, for simple procurement items, the terms and conditions of the contract can be fixed and nonnegotiable.

QUESTION 1035

Marketplace conditions are an input to which one of the following processes?

- A. Plan procurement management
- B. Conduct procurements

- C. Control procurements
- D. Close procurements

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Enterprise environmental factors, which include marketplace conditions that the team needs to be aware of as it develops its plans for purchases and acquisition, are an input to the plan procurement management process.

QUESTION 1036

Each project can benefit from stakeholder involvement; however, it is in both the project manager's and the teams' best interest to ensure that all project stakeholders have positive attitudes toward the project and its goals and objectives. Working as a project manager, you have a number of key stakeholders on your project. The stakeholder that identifies potential conflicts between organizational strategies and project goals is the_____

- A. Chairperson of the Governance Board
- B. Program manager
- C. Director of the project management office
- D. Chief Operating Officer

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Organizational strategy provides guidance and direction to project management. Portfolio managers, sponsors, or program managers identify alignment or potential conflicts between organizational strategies and project goals and communicates them to the project manager.

QUESTION 1037

While many different techniques can be used to rate or score proposals, all will use_____

- A. A screening system
- B. A weighting system in conjunction with a screening system
- C. Expert judgment and some form of proposal evaluation techniques

D. Quality ratings and contractual compliance

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Expert judgment is a tool and technique used in the conduct procurements process. It, along with some form of proposal evaluation techniques as developed during the plan procurements process and noted as source selection criteria, is used to rate and score proposals. This does not preclude the use of other tools and techniques, but these tools and techniques are used in all evaluations.

QUESTION 1038

When determining the message that you will deliver to stakeholders, knowing both the content (what you want to say) and your audience is important. Which of the following helps you to understand how others may interpret your message?

- A. Sender-receiver models
- B. Facilitation techniques used in delivery
- C. Negotiation skills
- D. Presentation skills used in the development of the message

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Sender-receiver models incorporate feedback loops to provide opportunities for interaction/participation and remove barriers to communication.

QUESTION 1039

One of the reasons why it is challenging to work on a virtual team is that e-mail is the primary form of communications. However, words alone typically comprise what percent of the total impact of any message?

- A. Seven percent
- B. 15 percent
- C. 38 percent
- D. 55 percent

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

Albert Mehrabian, a researcher, discovered that words alone account for just seven percent of any message's impact. Vocal tones account for 38 percent of the impact and facial expressions account for 55 percent of the message. Thus, project managers should use nonverbal ingredients to complement verbal message ingredients whenever possible and should recognize that nonverbal factors generally have more influence on the total impact of a message than verbal factors. The lack of nonverbal cues makes project communications in a virtual environment more challenging.

QUESTION 1040

Assume you are working on a multi-phase project as your project is planned to last three years. A best practice is to_____

- A. Periodically review the business case
- B. Use a single prime contractor and have this contractor award any subcontracts
- C. Rely on your PMO for guidance
- D. Set up a 'tight matrix'

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

Explanation:

The business case is an input to the develop project charter process. On a multi-phase project, it should be reviewed periodically to ensure the project is on track to deliver the business benefits.

QUESTION 1041

On a large medical billing system project, the team is large and communication has been quite a challenge to control. The Project Expeditor has been used to help with this problem. What is one of the main differences between the Project Expeditor and Project Coordinator?

- A. the Project Expeditor is another title for the Project Manager
- B. the Project Expeditor is another title for Project Coordinator
- C. the Project Expeditor has limited or no decision-making ability
- D. the Project Expeditor has decision-making ability

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1042

The data warehouse project is about halfway complete at a major retail client.

Your company is doing the implementation and has twelve team members in various locations across three different buildings. Communication and team-building has been a real challenge. Which of the following would fix or improve this problem?

- A. Changing the organization to a functional structure
- B. Co-location
- C. Replacing the Project Manager
- D. Hiring Project Coordinators

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1043

What is the typical role of senior management on a project?

- A. Support the project
- B. Pays for it
- C. Supports the project and resolves resource and other conflict
- D. Resolves resource and other conflicts

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1044

The sponsor plays a key role in project success. Which of the following is the best description of the sponsor?

- A. Senior management
- B. Customer
- C. Product manager
- D. CIO

Correct Answer: B

Section: Mix Questions Explanation

Explanation/Reference:

QUESTION 1045

Which of the following roles controls resources and manages a business unit?

- A. Functional management
- B. Senior management
- C. Sponsor
- D. Project management

Correct Answer: A

Section: Mix Questions Explanation

Explanation/Reference:

QUESTION 1046

What is the main deliverable from the Planning phase of a project?

- A. Charter
- B. Work results
- C. Project management plan
- D. A signed contract

Correct Answer: C

Section: Mix Questions Explanation

Explanation/Reference:

QUESTION 1047

Which of the following is not a regulation?

- A. The building code for a city
- B. The documented way to dispose of old paint
- C. The average speed on a highway in a week
- D. The zoning for an industrial area

Correct Answer: C

Section: Mix Questions Explanation

Explanation/Reference:

QUESTION 1048

What is the main output of Monitoring and Controlling?

- A. Charter
- B. Controlling stakeholders
- C. Corrective action
- D. Project product

Correct Answer: C

Section: Mix Questions Explanation

Explanation/Reference:

QUESTION 1049

The Project Manager and Functional Manager are having a disagreement on resource allocation for a new broadband project. The Functional Manager wants the resource for an operational issue that needs attention, and the Project Manager wants the resource to work on the project so it stays on schedule as planned. Which of the following roles can help resolve this problem?

- A. Functional management
- B. Senior management
- C. Sponsor
- D. Project management

Correct Answer: B

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1050

The company is implementing a new project management approach. In the past, their projects have been disorganized, not in alignment with business goals, and not focused on interactivity between the projects where applicable. They want to have a better focus on grouping related projects together by business unit and product lines. Which of the following best describe what they are trying to accomplish?

- A. Project management
- B. Operations management
- C. Management by objectives
- D. Portfolio management

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1051

You are the Project Manager on a cellular bluetooth amplifier project and are in the Planning phase. During a team meeting, a Functional Manager attempts to validate if the project meets company goals. The Functional Manager will report this finding back to senior management to determine if the project should continue, be modified or be canceled. What is this process called?

- A. Delphi Technique
- B. Management by objectives (MBO).
- C. Return on investment
- D. Management product analysis

Correct Answer: B

Section: Mix Questions

Explanation/Reference:

QUESTION 1052

Which of the following is used to control schedule related items on a project?

- A. Schedule Control
- B. Schedule management plan
- C. Work breakdown structure
- D. Time management plan

Correct Answer: A

Section: Mix Questions **Explanation**

Explanation/Reference:

QUESTION 1053

Which of the following is considered an advantage of a functional organization if you are an accountant?

- A. Having a home to go to when the project is complete
- B. Not having a home when the project is complete
- C. Having more than one project to work on
- D. Having more than one boss

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1054

On a wireless internet access project, the team is large with 40 people, and controlling communication has been a challenging for the team to make progress. The Project Coordinator has been used to help with this problem. What is one of the main differences between the Project Coordinator and the Project Expeditor?

- A. The Project Expeditor is another title for the Project Manager
- B. The Project Coordinator has decision-making ability

<https://vceplus.com/>

- C. The Project Expeditor is another title for Project Coordinator

QUESTION 1055

Which of the following best describes utilizing program management across an organization?

- A. Managing of related or similar projects in a coordinated way
- B. The process of computer program management
- C. Managing a television program
- D. Done for a purpose

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1056

Two people at work are discussing roles and responsibilities as they relate to the company and the projects it has. They are discussing the role of the Project Manager and the Functional Manager.

<https://vceplus.com/>

What is the main role of the Functional Manager?

- A. To control resources
- B. To manage the project when the Project Manager isn't available
- C. To define business processes
- D. To manage the Project Managers

Correct Answer: A

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1057

Which of the following is not a regulation?

- A. The building code for a city
- B. The documented way to dispose of old paint
- C. The average number of losing lottery tickets in a week
- D. The zoning for an industrial area

Correct Answer: C

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1058

A Project Manager has completed the Scope Definition process. The customer and sponsor have shortened the schedule by four weeks and decided that the work breakdown structure will be excluded. What would be the best action the Project Manager should take?

- A. Begin execution of the project
- B. Provide the customer and sponsor an updated schedule and budget
- C. Call a meeting and notify the team of the change in schedule
- D. Discuss with the customer and sponsor the ramifications of excluding the WBS

Correct Answer: D

Section: Mix Questions

Explanation

Explanation/Reference:

QUESTION 1059

The Project Manager is involved in Project Scope Management. She will be involved for the entire project management life cycle. Which group of processes will she be involved in performing these activities?

- A. Initiation, Scope Planning, Scope Definition, Scope Verification, Scope Management
- B. Scope Forecasting, Scope Definition, Scope Verification, Scope Control
- C. Scope Planning, Scope Definition, Create WBS, Scope Verification, Scope Control
- D. Scope Planning, Scope Description, Scope Verification, Integrated Change Control

Correct Answer: C

Section: Mix Questions
